Planning and Assessing the Curriculum in English Language Arts Aug 29 2019 Resisting the notion that there is a single English language arts curriculum that all schools can or should follow, this book focuses on processes for designing, implementing, and evaluating curriculums suited to the needs of individual schools and students. Part 1 of the book (The English Language Arts Curriculum in the 1990s), provides the theoretical underpinnings for this approach to curriculum. It begins with a historical overview of the evolution of English language arts programs. It then describes the origins of a "new English" that has been emerging over the past 3 decades and outlines its most promising characteristics. Part 2 of the book (Successful Curriculum Development in the English Language Arts), presents current curriculums and patterns of development. One chapter reports a survey of national Centers of Excellence in English in which curriculum makers describe the processes that led to their successful programs. A second chapter presents first-person narratives by four curriculum leaders from around the United States, describing a range of curriculum problems. Part 3 of the book (A Curriculum Developer's Handbook), offers a variety of tasks that individual curriculum developers and curriculum teams can undertake. Chapters discuss an assessment base for English programs, the curriculum framework, development and implementation of an English language arts curriculum, and (re)assessment of the skills and standards of the English language

arts program. A postscript discusses the English language arts curriculum of the future. Appendixes include: "The English Coalition Report" by the National Council of Teachers of English (NCTE) and the Modern Language Association (MLA); "Criteria for Planning and Evaluation English Language Arts Curriculum Guides" by the NCTE; "Evaluation Policy" by the Canadian Council of Teachers of English (CCTE); and a list of survey respondents. The Paths Writing Units, Argument Writing, Informative Writing, and Narrative Writing, complement the full instructional program and can also be used independently, providing in-depth writing instruction to support all students in grades 9–12 in meeting grade level standards. To emphasize the relationship between reading and writing, each Writing Unit includes accessible model texts that exemplify key elements of each text type, and source texts that provide a topic for the unit writing assignment. Individual lessons guide students through the writing process, providing instruction on grammar and conventions and highlighting collaboration and reflection as key elements of effective writing. Students' final essays are assessed using a checklist developed by the class over the course of the unit. The organization and distinctive content of the model and source texts in each unit afford teachers the flexibility to implement each unit independently of the others, and at any point during the curriculum. For example, a unit may be implemented to assess students' writing prior to implementation of the standard curriculum, to scaffold writing instruction leading into a writing assessment, or to support struggling writers by addressing gaps in skills as demonstrated in previous assessments. The Paths Writing Units provide teachers with invaluable opportunities to engage students as active participants in their own learning at every stage of the writing process, and to customize instruction to meet the varying needs of all students.
