Dunkirk Dec 29 2019 *** Special 75th Anniversary Edition *** Hugh Sebag-Montefiore's Dunkirk: Fight to the Last Man tells the story of the rescue in May 1940 of British soldiers fleeing capture and defeat by the Nazis at Dunkirk. Dunkirk was not just about what happened at sea and on the beaches. The evacuation would never have succeeded had it not been for the tenacity of the British soldiers who stayed behind to ensure they got away. Men like Sergeant Major Gus Jennings who died smothering a German stick bomb in the church at Esquelbecq in an effort to save his comrades, and Captain Marcus Ervine-Andrews VC who single-handedly held back a German attack on the Dunkirk perimeter thereby allowing the British line to form up behind him. Told to stand and fight to the last man, these brave few battalions fought in whatever manner they could to buy precious time for the evacuation. Outnumbered and outgunned, they launched spectacular and heroic attacks time and again, despite ferocious fighting and the knowledge that for many only capture or death would end their struggle. 'A searing story . . . both meticulous military history and a deeply moving testimony to the extraordinary personal bravery of individual soldiers' Tim Gardam, The Times 'Sebag-Montefiore tells [the story] with gusto, a remarkable attention to detail and an inexhaustible appetite for tracking down the evidence' Richard Ovary, Telegraph Hugh Sebag-Montefiore was a barrister before becoming a journalist and then an author. He wrote the best-selling Enigma: The Battle for the Code. One of his ancestors was evacuated from Dunkirk.

Personality And Strategy: Dec 21 2021 This thesis examines the impact that the dominant personalities of General Douglas MacArthur and Admiral Ernest King had in shaping Allied strategy in the Pacific during the Second World War. The concept of dominant personality is defined as containing three essential elements: arrogance, tenacity, and supreme competence. The lives of MacArthur and King are examined, demonstrating that the actions of each consistently reflected these characteristics, allowing them to dominate those around them. Three key decisions from the Pacific war are scrutinized for the impact of one or both of these dominant personalities. King and MacArthur affected these decisions in different ways. In the first, the decision to initiate carrier raids against Japan in early 1942, King acted unopposed in pushing his audacious plans through. The second decision was to invade Guadalcanal (Operation Watchtower) in August 1942. King and MacArthur drove this decision in parallel competition, each striving to begin offensive operations and each desiring to be in control. Finally, the long competition between the Central and Southwestern Pacific drives for primacy, culminating with the debate over invading Luzon or Formosa, is examined. In this case, MacArthur and King pursued mutually exclusive courses and stalemate nearly resulted.

The Oxford Companion to Comparative Politics May 26 2022 Fills a gap in scholarship on an increasingly important field within Political Science. Party Personnel Strategies Mar 31 2020 Key party goals serve to advance a policy brand and maximize seats in the legislature. This book offers a theory of how political parties assign their elected members — their "personnel" — to specialized legislative committees to serve collective organizational goals, here known as "party personnel strategies". Individual party members vary in their personal attributes, such as prior occupation, gender, and local experience. Parties seek to harness the attributes of their members by assigning them to committees where their expertise is relevant, and where they may enhance the party's policy brand. However, under some electoral systems, parties may need to trade-off the harnessing of expertise against the pursuit of seats, instead matching legislators according to electoral situation (e.g. marginality of seat) or characteristics of their constituency (e.g. population density). This book offers an analysis of the extent to which parties trade these goals by matching the attributes of their personnel and their electoral needs to the functions of the available committee seats. The analysis is based on a dataset of around six thousand legislators across thirty-eight elections in six established parliamentary democracies with diverse electoral systems.

Portrait of the Kings Jan 10 2021 Much of the scholarship on the book of Kings has focused on questions of the historicity of the events described. Alison L. Joseph turns her attention instead to the literary characterization of Israel's kings. By examining the narrative techniques used in the Deuteronomistic History to portray Israel's kings, Joseph shows that the Deuteronomist in the days of the Josianic Reform constructed David as a model of adherence to the covenant, and Jeroboam, conversely, as the ideal opposite of David. The redactor further characterized other kings along one or the other of these two models. The resulting narrative functions didactically, as if instructing kings and the people of Judah regarding the consequences of disobedience. Attention to characterization through prototype also allows Joseph to identify differences between pre-exilic and exilic redactions in the Deuteronomistic History, bolstering and also revising the view advanced by Frank Moore Cross. The result is a deepened understanding of the worldview and theology of the Deuteronomistic historians.
