Defining The Curriculum Sep 23 2019 This book explores some of the major processes involved in the definition of school subject knowledge. Using historical ethnographic methods, the contributors to the collection highlight and examine some of the factors involved at national, institutional and classroom levels in the making of school subjects. The first section of the book outlines the theoretical and methodological basis for the study of school subjects, and the reasons for and the possibilities of such a study are considered. In the second section some histories of school curricula are presented from a variety of settings - colonial schools in Africa, working-class schools of the nineteenth century, nursery schools - and the conflicting forces of determination and change in school subjects are identified and examined. The third section focuses on the contemporary school situation and the papers isolate and investigate some of the interest groups and social processes which enter into or affect the realization of school knowledge in the classroom.

Teaching and Learning Foreign Languages Mar 30 2020 Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000.

McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.
