The Inside Job Jan 07 2021 Hale, who turned double-agent against the corrupt spy organization he was raised in, knows his super-spy parents can't come home until the Sub Rosa Society is neutralized--and that he and his friends are all that's standing between SRS and their worldwide crimes. So

Hale wants to hit the bad guys where it hurts: their bank account. Hale and his allies all travel to Switzerland and discover that this won't be a smash-and-grab job like they expected. SRS doesn't have any actual money that can be taken--it's all hidden in secret digital accounts. Oh, and some super heavy gold bars. To take them down, Hale's crew will have to undo SRS's crimes and get to the inside man at the bank, all while artfully evading SRS's notice. There's plenty of action, a big fluffy show dog, a nefarious clown, and, as readers expect from this series, all kinds of comedic, high-stakes adventure.

converter • Solving flex-fuel design and engine power problems The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.

This comprehensive history traces the birth and rebirth of the electric boat from 1835 to the present, celebrating the Golden Age of electric launches, 1880-1910.
