Medicine Meets Virtual Reality 16 Jul 25 2019 We humans are tribal, grouping ourselves by a multitude of criteria: physical, intellectual, political, emotional, etc. The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past. This growing connectivity begs the question: will individuals and their communities come together to solve some very urgent global problems? At MMVR, we explore ways to harness information technology to solve healthcare problems - and in the industrialized nations we are making progress. In the developing world however, things are more challenging. Massive urban poverty fuels violence and misery. Will global networking bring a convergence of individual and tribal problem-solving? Recently, a barrel-shaped water carrier that rolls along the ground was presented, improving daily life for many people. Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries. They produce durable and simple laptops which are inexpensive to produce. At MMVR, we focus on cutting-edge medical technology, which is generally pretty expensive. While the benefits of innovation trickle downward, from the privileged few to the broader masses, we should expand this trickle into a flood. Can breakthrough applications in stimulation, visualization, robotics, and informatics engender tools as ingeniously as the water carrier or laptop? With some extra creativity, we can design better healthcare for the developing world too.

Enhancing the Skills of Early Childhood Trainers Jul 17 2021 Intended as a resource for both trainers and trainees in early childhood development and education, and based on the principles of active learning and participatory training, this five-part training pack encourages the incorporation of active learning materials in training and invites cooperation in adapting participatory training materials to specific cultural settings. The first part of the training pack, "Introduction to the Training Pack," introduces the principles of active learning and participatory training; discusses reasons for the development of the training pack; outlines the four main distinguishing features of the training materials; and provides an overview of the contents of the training pack. The second part, "Delivering Effective Training," discusses principles related to the processes of training adults and of adult learning, and details seven effective participatory training methods, including role-play, focused activities, and case studies. This part of the training pack also takes a critical look at the training evaluation and makes some suggestions for change. The third part, "Guide to the Development of the Young Child," presents current scientific knowledge about universal stages of development, and of certain patterns and processes that characterize given developmental stages, regardless of culture. The developmental information is divided by age level up to 6 years. The fourth part, "Rationale for Experiential/Participatory Methods," explores the efficacy of experiential/participatory learning in training of early childhood teachers. This part examines the theories of major figures in philosophy, psychology, and education, and discusses the concepts of knowledge, cultural difference, and adult learning from a theoretical perspective. The fifth part of the training set, "Resource List," provides an annotated bibliography and list of resources to assist trainers using experiential/participatory learning. (HTH)

 Ancient Greek Agriculture Jul 29 2022 The initial focus of Ancient Greek Agriculture is firmly on the art of agriculture proper, the tools and the technique, the plants cultivated and the animals reared. Thereafter, Isager and Skydsgaard focus on the position of agriculture in the society of gods and men in the Greek city-states . The arguments of Ancient Greek Agriculture are strengthened by the book's close adherence to contemporary Greek sources, literary as well as archaeological, avoiding the use of later as well as Roman material.
