The Blanket is Blue Apr 16 2021 John and Stella joyfully welcome the birth of twins, Baby Boy Smith and Baby Girl Smith. Then

the unthinkable happens, Baby Girl Smith is taken and John and Stella are left to grieve for the child that is lost to them. In but an instant, John and Stella are thrust into the deception and heartbreak that is black market adoption. Emmett Winslow purchases a baby girl for his self-indulgent wife and Jennifer Smith becomes Elizabeth Winslow. Mr. Smith meets Mr. Winslow through their respective business dealings and the two families form a friendship, but no one is prepared for the devastating consequences the truth brings when it is revealed. The truth of her identity alters everything Elizabeth has thought of as her past. Hurt and confused she runs from the truth searching for an identity that will be hers alone. One day Elizabeth finds love and that love leads her to a place of hope and forgiveness where she can reclaim her past and face her future. This fast-paced paranormal thriller will have you sitting on the edge of your seat as the darkness of Deception and the light of Hope battle for the souls of two fathers and for the daughter they love more than their own lives.

From the Moon, Earth is Blue Feb 12 2021 "In the Museum of Modern Art," writes Wendy Barker, "chaos / displays itself tidily.

Even the viewers // know the dance: stroll, stop, gaze, whisper. / Stroll, stop." Barker's poems tour an imagined museum, allowing us to observe the observer as she learns to see by means of her own creativity. Perspective is crucial to achieving internal balance — in a painting or a soul. After all, "from the moon, earth is blue."

Planet Earth Is Blue Mar 16 2021 "Tender and illuminating. A beautiful debut." --Rebecca Stead, Newbery Medal-winning author of

When You Reach Me A heartrending and hopeful debut novel about a nonverbal girl and her passion for space exploration, for fans of See You in the Cosmos, Mockingbird, and The Thing About Jellyfish. Twelve-year-old Nova is eagerly awaiting the launch of the space shuttle Challenger--it's the first time a teacher is going into space, and kids across America will watch the event on live TV in their classrooms. Nova and her big sister, Bridget, share a love of astronomy and the space program. They planned to watch the launch together. But Bridget has disappeared, and Nova is in a new foster home. While foster families and teachers dismiss Nova as severely autistic and nonverbal, Bridget understands how intelligent and special Nova is, and all that she can't express. As the liftoff draws closer, Nova's new foster family and teachers begin to see her potential, and for the first time, she is making friends without Bridget. But every day, she's counting down to the launch, and to the moment when she'll see Bridget again. Because Bridget said, "No matter what, I'll be there. I promise."

Outside, the Sky is Blue Sep 02 2022 OUTSIDE, THE SKY IS BLUE is a beautifully drawn, heart-breaking yet also joyful memoir of growing up, of living with mental ill health and cancer, and of working out what it means to be in a family, what it means to lose a family - and what's left when you're the last one left. When Christina Patterson's brother Tom died very suddenly, she faced the harrowing task of clearing out his house. Tom had always been the one who held on to the family treasures and memories, but now Christina had to sift through box after box of letters, papers, photos and belongings, not just of Tom's, but of their parents and their older sister, Caroline. Those boxes, albums and papers tell the story of a young couple who decide, when their children are small, to swap a glamorous diplomatic life in Rome for a housing estate in Surrey. But their new suburban life, of trips to National Trust houses, fizzy drinks over TV costume drama and walks at Wisley Gardens, is increasingly disrupted by Caroline's, erratic behaviour. As she is diagnosed with schizophrenia, Tom seeks solace in sport and Christina in a youth club where she hopes to meet boys, but finds God. 'Patterson is a passionate, funny woman who refuses simply to struggle on. She believes in living. And throwing parties. And friendship' Sunday Times

The Gentleman Is Blue Jul 20 2021 "The atrocious crime of being a young man...I shall neither attempt to palliate nor deny." --

William Pitt the Elder Graphic, caustic, and humorous, *The Gentleman Is Blue* tells the story of Alex, a wealthy young man struggling with his sexuality at a privileged Catholic high school in Louisiana. Scathing wit and sarcastic jibes cannot conceal the turbulence brewing within this group of students at St. Andrews High. *The Gentleman Is Blue* is a taste of dark humor served Southern style. Wealth, sexuality, love, discrimination, and fear shape this coming of age tale told in the grand tradition of the Southern novel.

My Ocean Is Blue Sep 21 2021 A girl's poetic exploration of the ocean she loves. "This is my ocean," the young girl begins as she heads over the dunes with her mother. Then, passing the day at the seaside, she lyrically describes her ocean in simple, sensory detail. It is both "slimy" and "sandy," "sparkly" and "dull." It has wonderful sounds, as it "splashes and crashes and echoes and squawks." And there are so many colors, from "rusted orange" to "polished green." Though "mostly it's blue." Nothing escapes the girl's careful observations. And at day's end, she can't wait to for her next trip to the beach. This enchanting nature companion will awaken the explorer in every child.

Basic Analytical Chemistry Apr 04 2020 Pergamon Series in Analytical Chemistry, Volume 2: Basic Analytical Chemistry brings together numerous studies of the vast expansion in the use of classical and instrumental methods of analysis. This book is composed of six chapters. After providing a theoretical background of analytical chemistry, this book goes on dealing with the fundamental principles of chemical equilibria in solution. The subsequent chapters consider the advances in qualitative and quantitative chemical analyses. These chapters present a unified view of these analyses based on the Bronsted-Lowry theory and the donor-acceptor principle. These topics are followed by discussions on instrumental analysis using various methods, including electrochemical, optical, spectroscopic, and thermal methods, as well as radioactive isotopes. The final chapters examine the separation methods and the essential features of organic chemical analysis that are different from methods for inorganic compounds. This book is of value to analytical chemists and researchers.

Green as the Sky Is Blue Jan 14 2021 Simon Avend, a South African living in Australia, can be unruly. He often sets out to exotic destinations, indulging his desires in places like Bali, Istanbul, Tokyo, and the Wild Coast. But along the way unsettling memories arise, of people and also places, especially the cattle farm in the Eastern Cape where he grew up. He approaches a therapist to help him make sense of his past, a process that leads them both on a journey of discovery. When circumstances bring Simon back to South Africa, he must confront the beauty and bitterness of his country of birth, and of the people to whom he is bound. *Green as the Sky Is*

Blue is a bold, unflinching exploration of sexuality, intimacy, and the paradox that lies at the heart of our humanity.

The World Is Blue Oct 03 2022 A Silent Spring for our era, this eloquent, urgent, fascinating book reveals how just 50 years of swift and dangerous oceanic change threatens the very existence of life on Earth. Legendary marine scientist Sylvia Earle portrays a planet teetering on the brink of irreversible environmental crisis. In recent decades we've learned more about the ocean than in all previous human history combined. But, even as our knowledge has exploded, so too has our power to upset the delicate balance of this complex organism. Modern overexploitation has driven many species to the verge of extinction, from tiny but indispensable biota to magnificent creatures like tuna, swordfish, and great whales. Since the mid-20th century about half our coral reefs have died or suffered sharp decline; hundreds of oxygen-deprived "dead zones" blight our coastal waters; and toxic pollutants afflict every level of the food chain. Fortunately, there is reason for hope, but what we do—or fail to do—in the next ten years may well resonate for the next ten thousand. The ultimate goal, Earle argues passionately and persuasively, is to find responsible, renewable strategies that safeguard the natural systems that sustain us. The first step is to understand and act upon the wise message of this accessible, insightful, and compelling book.
