Document Analysis Systems VI Jan 28 2020 This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems (DAS 2004) held during September 8–10, 2004 at the University of Florence, Italy. Several papers represent the state of the art in a broad range of “traditional” topics such as layout analysis, applications to graphics recognition, and handwritten documents. Other contributions address the description of complete working systems, which is one of the strengths of this workshop. Some papers extend the application domains to other media, like the processing of Internet documents. The peculiarity of this 6th

workshop was the large number of papers related to digital libraries and to the processing of historical documents, a taste which frequently requires the analysis of color documents. A total of 17 papers are associated with these topics, whereas two years ago (in DAS 2002) only a couple of papers dealt with these problems. In our view there are three main reasons for this new wave in the DAS community. From the scientific point of view, several research fields reached a thorough knowledge of techniques and problems that can be effectively solved, and this expertise can now be applied to new domains. Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries.

Denken hilft zwar, nützt aber nichts Dec 27 2019 Warum wir ticken, wie wir ticken Der Sachbuch-Bestseller des Verhaltens-Psychologen Dan Ariely erklärt, wie wir Entscheidungen treffen: mit der Logik der Unvernunft Kennen Sie das auch? Beim Anblick eines köstlichen Desserts fallen uns spontan tausend vernünftige Gründe ein, unser Diät-Gelübde zu brechen. Wir sind fest davon überzeugt, dass teure Produkte besser wirken als billige. Und für jeden von uns gibt es etwas, für das wir bereit sind, deutlich mehr Geld auszugeben, als wir haben – aus ganz vernünftigen Gründen, versteht sich. Bestseller-Autor Dan Ariely stellt unser Verhalten auf den Prüfstand, um herauszufinden, warum wir immer wieder unvernünftig handeln – und dabei felsenfest überzeugt sind, uns von Vernunft leiten zu lassen. Denn wenn wir Entscheidungen treffen, gehen wir davon aus, dass wir das Für und Wider vernünftig abwägen. In Wahrheit werden unsere Entscheidungen jedoch meist von vorgefassten Urteilen und einer gelernten Weltsicht beeinflusst. Unvernünftige Entscheidungen liegen offenbar in der menschlichen Natur begründet. Ebenso unterhaltsam wie spannend zeigt der renommierte amerikanische Verhaltens-Psychologe Dan Ariely in seinem Bestseller, wie die meisten unserer Entscheidungen tatsächlich zustande kommen, und wie unvernünftig unsere Vernunft oft ist. »Ein ebenso amüsantes wie lehrreiches Buch.« Der Spiegel

The Search for the Pink-Headed Duck Dec 07 2020 Fifty-two years after the pink-headed duck was last seen in the wild, Rory Nugent set off for India in search of this exceptionally rare bird. In Calcutta he prowled the fowl market, where a few of the ducks used to appear during the Raj. Traveling on to Delhi, he was befriended by a Cambridge-educated smuggler, and he learned of remote regions to the north where the duck might be found. In Sikkim, following the trail of a Yeti, he became lost in the Valley of Bliss and nearly imprisoned inside a forest of rhododendrons, each the size of a ranch house. Making his way to Assam, he bought a 13-foot skiff and paddled the Brahmaputra River from Burma to Bangladesh, with stops on an island, considered to be Kali's left breast, and at a Tantrist temple, where he stumbled on a grisly ritual in a graveyard. In a secluded marsh along the river he may have spotted the world's rarest duck.
