Haunted — Incredible True Stories of Ghostly Encounters 2-Book Bundle Apr 24 2022 It was an irrational decision. Despite having just moved into a beautiful new house, the Williams family gave in to an odd, overwhelming desire to purchase and move into a Victorian home they had come upon by chance. They were curious, of course, as to why the house had in the past had such a high vacancy rate. But that curiosity didn't last long, because shortly after moving in, strange things began to happen. At first the family tried telling themselves there were logical explanations for the strange things they all were witnessing. But before long they came to accept the fact that they were sharing their home with ghosts. *Haunted* is the Williams family's story from the point of view

of the mother, Dorah. Through her chilling reminiscences, we witness the all-too-real goings-on in the house. Upon writing *Haunted*, Dorah thought her situation was unique. What she didn't realize was how many others would relate to how it feels to be haunted, too. After being flooded by emails from people with similar experiences, Dorah began to realize this wasn't uncommon at all. So *Haunted Too* came to be. Not only will it entertain the reader, as good ghost stories always have, but it will also help the reader to better understand this phenomenon, with the inclusion of shared experiences, opinions, and advice of professionals in this field.

Time Travel True Stories Oct 31 2022 What do Scientists Say About Time Travel? It's fair to say that most scientists today will tell you that time travel is impossible. Three of today's top physicists - Charles Liu, Brian Green and Michio Kaku - all hold that time travel is, if not impossible, unlikely in the extreme. However, one of the most brilliant minds of our time, physicist Stephen Hawking, disagrees - although only partially. He believes that time travel is theoretically possible, but only into the future. But What Do Real People Experience? The opinion of science, however, has never stopped thousands of people around the world from reporting what they firmly believe are actual experiences of spontaneous time travel! Still others insist that time travel is not only possible, but they have already done it as part of top secret government programmes. Claims for time travel range from the highly

flaky to the astoundingly believable. They are especially difficult to dismiss when time travel reports come from absolutely ordinary, rock-solid people who have nothing to gain by proclaiming they travelled in time. Many people who report time travel experiences don't necessarily believe it themselves. What happened to them was so strange, so unexpected, yet so real; they simply have no other good explanation for their experience. You will meet a number of such individuals in this book, most of their stories straight out of the headline of local newspapers. No doubt, a story or two will strike the reader as pure balderdash. On the other hand, some of these cases of time travel are tantalizing and unexplainable. They also come with a certain amount of solid evidence, such as stopped clocks, frozen machines and electromagnetic devices acting in inexplicable ways. Physicist and NASA scientist Tom Campbell said that scientific advances always 'come from the fringe.' Thus, even if you consider some of these stories stepping dangerously 'out there' onto that fringy edge, remember that many of yesterday's fringe theories are today's scientific fact. At the very least, it doesn't hurt to approach the idea of time travel with an open mind and a sense of wonder.

True Stories May 14 2021 An irresistible collection of favorite writings from an author celebrated for his bravura style and sheer unpredictability Francis Spufford's welcome first volume of collected essays gathers an array of his

compelling writings from the 1990s to the present. He makes use of a variety of encounters with particular places, writers, or books to address deeper questions relating to the complicated relationship between story-telling and truth-telling. How must a nonfiction writer imagine facts, vivifying them to bring them to life? How must a novelist create a dependable world of story, within which facts are, in fact, imaginary? And how does a religious faith felt strongly to be true, but not provably so, draw on both kinds of writerly imagination? Ranging freely across topics as diverse as the medieval legends of Cockaigne, the Christian apologetics of C. S. Lewis, and the tomb of Ayatollah Khomeini, Spufford provides both fresh observations and thought-provoking insights. No less does he inspire an irresistible urge to turn the page and read on.

Call the Nurse Feb 29 2020 Tired of the pace and noise of life near London and longing for a better place to raise their young children, Mary J. MacLeod and her husband encountered their dream while vacationing on a remote island in the Scottish Hebrides. Enthralled by its windswept beauty, they soon were the proud owners of a near-derelect croft house—a farmer’s stone cottage—on “a small acre” of land. Mary assumed duties as the island’s district nurse. *Call the Nurse* is her account of the enchanted years she and her family spent there, coming to know its folk as both patients and friends. In anecdotes that are by turns funny, sad, moving, and tragic, she recalls them all, the crofters and their laird, the boatmen and tradesmen, young lovers and forbidding churchmen. Against the old-fashioned island culture and the grandeur of mountain and sea unfold indelible stories: a young woman carried through snow for airlift to the hospital; a rescue by boat; the marriage of a gentle giant and the island beauty; a ghostly encounter; the shocking discovery of a woman in chains; the flames of a heather fire at night; an unexploded bomb from World War II; and the joyful, tipsy celebration of a ceilidh. Gaelic fortitude meets a nurse’s compassion in these wonderful true stories from rural Scotland.
