Handbook of Research on Educational Leadership for Equity and Diversity
31 2020 The rapid growth of diversity within U.S. schooling and the heightened attention to the lack of equity in student achievement, school completion, and postsecondary attendance has made equity and diversity two of the principle issues in education, educational leadership, and educational leadership research. The Handbook of Research on Educational Leadership for Equity and Diversity is the first research-based handbook that comprehensively addresses the broad diversity in U.S. schools by race, ethnicity, culture, language, gender, disability, sexual identity, and class. The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools, yet at the same time candidly critiques the destructive deficit thinking, biases, and prejudices that undermine school success for many groups of students. Well-known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to

Mar

school leaders. Each chapter reviews theoretical and empirical evidence of these inequities and provides research-based recommendations for practice and for future research. Celebrating the broad diversity in U.S. schools, the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity, and provides evidence-based practices to promote student success for all children.

Curriculum Development for Students with Mild Disabilities Jul 04 2020 Many teachers of students with mild disabilities experience difficulty writing IEPs, and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks (goals and benchmarks), this resource assists in preparing IEPs, including the new process of identification of children with disabilities through their responses to intervention (RTI). An additional focus is on the impact of federal laws (IDEA and NCLB) on the curriculum and assessment in schools today. The book has been reorganized into ten chapters, including: historical perspectives; early childhood special education curricula; oral expression curricula; reading and listening curricula; written expression curricula; mathematics curricula; educational technology curricula K-12; social and self competence curricula; science curricula; and evaluation reports/case studies (Appendix).
