[Metaphor in Focus](#) Sep 22 2021 This book is a philosophical guide on metaphor use. Previous research concerning metaphors has focused on either the theoretical-linguistic problems or the uses in specific research fields. Although these domains share some common interests, there has been little cross-communication. The aim of this volume is to bridge the gap between the theoretical and the empirical side of the research on metaphor use, by analysing the role of metaphor over different domains of use. Therefore, while adopting a theoretical-philosophical point of view, the volume also presents the interdisciplinary connections between philosophy and other academic areas such as linguistics, cognitive science, discourse analysis, communication studies, didactics, economics, arts and political science.

The essential role of language in survey research Jul 01 2022 Language users, such as survey respondents and interviewers, must speak the same language literally and figuratively to interact with each other. As diversity grows in the United States and globally, interviewers and respondents may speak a different language or speak the same language differently that reflects their own cultural norms of communication. This book discusses the role of language in survey research when comparisons across groups, cultures, and countries are of interest. Language use in surveys is dynamic, including words, symbols (e.g., arrows), and even emojis. The entire survey life cycle is carried out through language. Researchers write or translate questions and instructions that will address research questions and then pretest them using various techniques, including qualitative inquiry that focuses on context beyond just "the numbers." Human or virtual data collectors use persuasive messages to communicate with survey respondents and encourage their survey participation. Respondents must comprehend and interpret survey questions and instructions to provide a response. All of these survey processes and products contribute to data quality, and the role of language is essential. Praise for The Essential Role of Language in Survey Research "This book highlights the importance of language issues for data quality, provides frameworks for conceptualizing the underlying processes, presents diverse methods for identifying problems at an early stage, and illustrates and evaluates potential solutions in the form of improved translation and pretesting procedures." --Daphna Oyserman and Norbert Schwarz, University of Southern California "The role of language and issues of language are particularly salient for multinational, multiregional, or multicultural (3MC) comparative surveys that are designed to collect data and compare findings from two or more populations. This book highlights the critical need to consider a range of issues pertaining to language at various aspects and stages of 3MC survey design and implementation." --Julie de Jong, Kristen Cibelli Hibben, and Jennifer Kelley, University of Michigan, and Dorothee Behr, GESIS-Leibniz Institute for the Social Sciences, Germany "The need to reach increasingly diverse target populations requires survey researchers to be ever more aware of the role of verbal and nonverbal language in the survey research process. This book provides a great resource for readers new to the subject, as well as experts, seeking to understand the implications of language for survey design, implementation, and resulting data quality." --Antje Kirchner, RTI International, and Coeditor of Big Data Meets Survey Science: A Collection of Innovative Methods "Covering a range of topics fundamental to high-quality surveys in cross-cultural contexts, this new volume features 'language' in its varied roles within survey methodology and practice, including questionnaire design, translation, and fieldwork implementation for quantitative and qualitative research. The Essential Role of Language in Survey Research uses in-country examples and analyses from across the globe to underscore specific challenges that survey researchers confront in their work." --Patrick Moynihan and Martha McRoy, Pew Research Center

[Handbook of Pediatric Behavioral Healthcare](#) Sep 10 2020 This handbook addresses the delivery of high quality pediatric behavioral healthcare services that are multitiered, evidence-based, and integrated, involving interprofessional collaboration across child serving systems, such as pediatrician offices and schools. The book sets forth a contemporary, leading edge approach that reflects the relationship between biological and psychosocial development and the influence of multiple systems, including the family, community, school, and the healthcare system on child development and functioning. It assists child-focused providers in developing knowledge about the relationship between biological and psychosocial development and between pediatric physical health and behavioral health problems. Chapters cover common chronic illnesses and behavioral conditions and include guidelines for screening, assessment, diagnosis, prevention, and coordinated intervention. Chapters also include representative case studies that help illustrate efficacious, effective service-delivery approaches. The handbook concludes with recommendations for future research and directions for integrated pediatric behavioral healthcare. Topics featured in the Handbook include: Behavioral health aspects of chronic physical health conditions, including asthma, diabetes, chronic pain, traumatic brain injury, and cancer. Physical health implications of behavioral health and educational problems, including ADHD, learning disabilities, substance abuse, and ASD. Coping with chronic illness and medical stress. Patient adherence to medical recommendations and treatments. School reintegration after illness. The Handbook of Pediatric Behavioral Healthcare is a must-have resource for researchers, professors, and graduate students as well as clinicians, therapists, and other practitioners in clinical child and school psychology, primary care medicine, social work, child and adolescent psychiatry, public health, health psychology, pediatric medicine, nursing, behavioral therapy, rehabilitation, and counseling.

The Architecture of Focus Oct 24 2021 This collection investigates the architecture of focus in linguistic theory from different theoretical perspectives. Research on focus and information structure in the last four decades has shown that the phenomenon of focus is highly complex, the theoretical approaches manifold, and the data highly sensitive. The main emphasis has been placed on the integration of the notion of focus in generative grammar. In recent years, however, the approaches to focus and information structure underwent a radical change in perspective. The theoretical concept of focus, its related terms and phenomena became the object of research. Along with it, the research questions shifted: instead of locating focus in the architecture of grammar, linguists investigate the architecture of focus itself. The central underlying idea of this collection is to document this change in perspective with the aim of isolating essential keystones and research areas in both the theoretical and empirical domain. The book is structured accordingly. Following the introduction, there are four main sections. The general section discusses the theoretical foundations of focus within grammar. The second section hosts papers which investigate the representation of focus and topic at the syntax-pragmatics interface. The third section discusses the phonological representation of focus and its relation to meaning. The papers of the final section investigate different types of focus constructions in a variety languages. The collection of papers on the architecture of focus, its interpretation and representation mirror the establishment of the focus research field.

Context-Dependence in the Analysis of Linguistic Meaning Jun 19 2021 This collection of papers addresses context-dependence and methods for dealing with it. The book also records comments to the papers and the authors' replies to the comments. In this way, the contributions themselves are contextually dependent. It represents an inquiry into the activities on the semantics side of the pragmatics boundary.

Focus Particles in German Aug 22 2021 This study explores the grammar of focus particles in German. It gives a thorough description and analysis of focus particle constructions and links their syntactic, semantic, and information structural properties to their prosodic characteristics. The study also shows that focus particles present a particularly well-suited subject for the investigation of the modularity of grammar in general. The first part of the book deals with the syntax, semantics, and pragmatics of focus particle constructions and results in a modular account of the relation between their word order, information structure, and meaning. The second part presents a corpus study and several speech production and perception experiments investigating the prosodic realization of the constructions. The integration of these two lines of research results in a comprehensive theory of focus particles and of the interaction of grammar and information structure in German.

Topic and Focus Nov 24 2021 During the 2001 Linguistic Summer Institute at University of California, Santa Barbara, a group of linguists gathered at a workshop to discuss the expression and role of topicalization and focus from a variety of perspectives: phonetic, phonological, syntactic, semantic, and pragmatic. The workshop was designed to lay the groundwork for collaborative efforts between linguists devoted to the study of meaning and linguists engaged in the quantitative study of intonation. This volume contains papers emerging from the Santa Barbara Workshop on Topic and Focus. A wide variety of methodologies and research interests related to topic and focus are represented in the papers. Some works present results of phonetic studies, either acoustic or perceptual, on the expression of topic and/or focus, others examine semantic or pragmatic features of topic and/or focus, while others are concerned with the interface between intonation and meaning. Data from several different languages are represented in the papers, including several languages with relatively little documentation particularly in the venue of topic and focus, e. g. Basque, Chickasaw, Indonesian, Polish, Taiwanese. The broad sample of languages coupled with the wide variety of research topics addressed by the papers promise to enrich our typological understanding of topic and focus phenomena and provide an impetus for further research. The following paragraphs offer brief summaries of the papers contained in this volume: Gorka Elordieta's paper describes prosodic conditions governing focus in a dialect of Basque with pitch accents.

The Syntax of Information-Structural Agreement Apr 17 2021 In this research monograph, Johannes Mursell discusses the syntactic impact of information-structural features on agreement. So far, the syntactic contribution of this type of feature has mostly been reduced to movement of topics or foci clause-initial position. Here, the author looks at a different phenomenon, syntactic agreement, and how this process can be dependent on information-structural properties. Based partly on original fieldwork from a typologically diverse set of languages, including Tagalog, Swahili, and Lavukaleve, it is argued that for most areas for which information-structural features have been discussed, it is possible to find cases where these features influence phi-feature agreement. The analysis is then extended to cases of Association with Focus, which does not involve phi-features but can still be accounted for with agreement of information-structural features. The book achieves two main goals: first it provides a uniform analysis for different constructions in unrelated languages. Second, it also gives a new argument that information-structural features should be treated as genuine syntactic features.

The Syntax of Topic, Focus, and Contrast Jan 27 2022 This book addresses how core notions of information structure (topic, focus and contrast) are expressed in syntax. The authors propose that the syntactic effects of information structure come about as a result of mapping rules that are flexible enough to allow topics and foci to be expressed in a variety of positions, but strict enough to capture certain cross-linguistic generalisations about their distribution. In particular, the papers argue that only contrastive topics and contrastive foci undergo movement and that this is because such movement has the function of marking the scope of contrast. Several predications are derived from this proposal: such as that a focus cannot move across a topic - whether the latter is in situ or not. Syntactic and semantic evidence in support of this proposal is presented from a wide range of languages (including Dutch, English, Japanese, Korean and Russian) and theoretical consequences explored. The first chapter not only outlines its theoretical aims, but also provides an introduction to information structure. As a consequence, the book is accessible to advanced students as well as professional linguists.
