The Evolution of Human Language May 07 2020 Wolfgang Wildgen presents three perspectives on the evolution of language as a key element in the evolution of mankind in terms of the development of human symbol use. (1) He approaches this question by constructing possible scenarios in which mechanisms necessary for symbolic behavior could have developed, on the basis of the state of the art in evolutionary anthropology and genetics. (2) Non-linguistic symbolic behavior such as cave art is investigated as an important clue to the developmental background to the origin of language. Creativity and innovation and a population's ability to integrate individual experiments are considered with regard to historical examples of symbolic creativity in the visual arts and natural sciences. (3) Probable linguistic 'fossils' of such linguistic innovations are examined. The results of this study allow for new proposals for a 'protolanguage' and for a theory of language within a broader philosophical and semiotic framework, and raises interesting questions as to human consciousness, universal grammar, and linguistic methodology. Children of a Compassionate God Dec 02 2019 Luke 1-6:16 forms the literary context for the Sermon on the Plain. This context grounds Jesus' teaching authority as the Son of God. The beatitudes and woes (6:20-26) establish a revolutionary vision of the authentic human life. The love commandment is grounded in two general ethical principles -- the Golden Rule (6:31) as a maxim of general altruism and the imitatio Dei (6:36) making human conduct respond to the deepest human desires intimated in the Rule. Consequently, Christian disciples are to avoid hostile judgment, as their master did (6:37-42); one can judge truly only by examining the fruits one produces (6:43-45). These commands, which carry human authenticity beyond its limits, are the only way to avoid total destruction (6:46-49).--From publisher's description.
