Systematic Theology, Volume 1, Fourth Edition Oct 25 2022 "Rivals the major

systematic theologies of this century." --Baptist History and Heritage Journal, July 1996 "One of the characteristics of Garrett's system that needs especially to be noted is its balanced, judicious, and nearly invariably objective presentation of materials. While holding true to the teachings of his own Baptist faith, Garrett so carefully and judiciously presents alternatives . . . that teachers and students from other confessional and denominational positions will find his work instructive." --Consensus, 1997 "If one is searching for an extensive exposition of the biblical foundations and historical developments of the various loci of systematic theology, there is no more complete presentation in a relatively short work than this . . . Pastors will especially find this feature to be a real help in teaching theology . . . [It is] an indispensable contribution to the task of systematic theology." --Journal of the Evangelical Theological Society, September 1999 "Many students and pastors will find all they need here, and will in addition be helped to relate their knowledge to recent developments in the theological world." --The Churchman: A Journal of Anglican Theology, 1991 "A gold mine of helpful material." --The Christian Century, May 29-June 5, 1991 "No book that I know is more loaded with biblical and theological facts than this one. The prodigious research that must have gone into the preparation of this volume is truly mind-boggling." --Faith and Mission, Fall 1991 "Garrett has provided a massive and

scholarly systematic theology from a thoroughly conservative and comprehensive viewpoint. The work is well documented in both biblical and historical scholarship and will prove to be a classic." --William Hendrickson, Southern Baptist Theological Seminary "One of the most comprehensive, concise books of its type available; it should receive wide use in the classroom and in the study." --Robert H. Culpepper, Southern Baptist Theological Seminary

May 08 2021 The 5th Supplementary Series of the Beilstein Handbook (4th Edition) covers the compounds reported in the primary literature from 1960 up to 1980. Volume 20 deals with heterocyclic compounds which contain only one nitrogen atom as the ring-heteroatom and which bear no functional groups on the ring-carbon atoms. The ring-nitrogen atom may, however, be substituted by groups derived from compounds covered in any of the preceding volumes of the Beilstein Handbook. Subvolume 20/4 completes the coverage of parent compounds of general formula $C_nH_{2n+1}N$ and, in

addition, deals with parent compounds of general formula $C_nH_{2n-1}N$.
