Totalitarian Societies and Democratic Transitions November 28 2021 This book is a tribute to the memory of Victor Zaslavsky (1937–2009), sociologist, émigré from the Soviet Union, Canadian citizen, public intellectual, and observer of Eastern Europe. In seventeen essays leading European, American and Russian scholars discuss the theory and the history of totalitarian society with a comparative approach. They revisit and reassess the work of Zaslavsky considered the most important project in the latter part of his life: the analysis of Eastern European societies, especially Soviet societies and their difficult "transition" after the fall of communism in 1989–91. The

the contributions reflects the diversity of specialists in the volume, but also reveals Zaslavsky's gift: he surrounded himself with talented people from many different fields and disciplines. In line with Zaslavsky's work and scholarly method, the book promotes new theoretical and methodological approaches to the concept of totalitarianism for understanding Soviet and East European societies, and the study of fascist and communist regimes in general.

Koba the Dread Oct 03 2022 A brilliant weave of personal involvement, vivid biography and political insight. Koba the Dread is the successor to Martin Amis's award-winning memoir, Experience. Koba the Dread is the appeal of one of the most powerful belief systems of the 20th century — one that spread throughout the world, both captivating it and staining it red. It addresses itself to the central lacuna of 20th-century thought: the indulgence of Communism by the intellectuals of the West. In between the personal beginnings and the ending, Amis gives us perhaps the best one-hundred pages ever written about Stalin: Koba the Dread, Terrible. The author's father, Kingsley Amis, though later reactionary in tendency, was a "Comintern doer" (as he would come to put it) from 1941 to 1956. His second-closest, and then his closest friend (after the poet Philip Larkin), was Robert Conquest, our leading Sovietologist whose book of 1968, The Great Purge, was second only to Solzhenitsyn's The Gulag Archipelago in undermining the USSR. The present memoir explores these connections. Stalin said that the death of one person was tragic, the death of a million was "statistic." Koba the Dread, during whose course the author absorbs a particular, a familial death, is a study of Stalin's aphorism.

The Life of Kingsley Amis Aug 01 2022 In this authorised biography, Zachary Leader argues that Kingsley Amis was not only the finest comic novelist of his generation, but a dominant figure in post-war British writing: novelist, poet, critic and polemicist. Drawing not only on interviews with a range of Amis's friends, relatives, fellow writers, students and colleagues, many of them never before consulted, but also on hundreds of unpublished letters, Leader's biography will for the first time give a full picture of Amis's childhood, school life as a teacher, critic, political and cultural commentator, professional author, husband, father and lover. It explores Amis's fears and phobias, and the role that drink played in his life. And of course he pays due attention to Amis's work. As the editor of The Letters of Kingsley Amis, hailed in The Sunday Telegraph as 'one of the major monuments to the epistolary art', Leader is more than qualified to be his authorised biographer. It will surprise, entertain and illuminate.

Character and Satire in Post War Fiction Mar 30 2022 This monograph analyses the use of caricature as one of the key strategies in narrative fiction since the war. Close analysis of some of the best known postwar

including Toni Morrison, Philip Roth, Joyce Carol Oates, Angela Carter and Will Self, reveals how they use caricature to express postmodern conceptions of the self. In the process of moving away from the modernist emphasis on subjectivity, postmodern characterisation has often drawn on a much older satirical tradition which Hogarth and Gillray in the visual arts, and Dryden, Pope, Swift and Dickens in literature. Its key images of the human as reduced to the status of an object, an animal or a machine, or the human body as dismembered, represent the fragmentation of the human spirit. Gregson argues that this return to caricature is symptomatic of a satirical attitude to the self which is particularly characteristic of contemporary culture.

Critical Approaches to International Criminal Law May 28 2022 Drawing on the critical legal tradition, the collection of international scholars gathered in this volume analyse the complicities and limitations of International Criminal Law. This area of law has recently experienced a significant surge in scholarship and public debate; individual criminal accountability is now firmly entrenched in both international law and international consciousness as a necessary mechanism of responsibility. Critical Approaches to International Criminal Law: An Introduction shifts the debate towards that which has so far been missing from the discussion: the possible injustices, exclusions, and biases of International Criminal Law. This collection is the first dedicated to the topic of critical approaches to international criminal law. It will be a valuable resource for scholars and students of international criminal law, international law, international legal theory, criminal law, and criminology.

Father and Son Jun 30 2022 An innovative study of two of England's most popular, controversial, and influential writers, Father and Son breaks new ground in examining the relationship between Kingsley Amis and his son Martin Amis. Through intertextual readings of their essays and novels, Gavin Keulks examines how the two men's work negotiated the boundaries of their personal relationship while claiming territory in the literary domain between mimesis and modernist aesthetics. There was a battle over the nature of reality itself, a two-front realism war conducted by loving family members and rival, antithetical writers. Keulks argues that the relationship functioned as a source of literary inspiration and that their work illuminates many of the major thematic and stylistic shifts that have characterized the British novel since 1950.

The Stability of Laughter Feb 12 2021 A "sad and corrupt" age, a period of "crisis" and "upheaval"—what T. S. Eliot famously summed up as "the panorama of futility and anarchy which is contemporary history." Modernism has always been characterized by its self-conscious sense of suffering. Why, then, was it so obsessed with laughter? From Baudelaire, Nietzsche, Bergson and Freud to Pirandello, Beckett, Hughes, Barnes, and Joyce, no moment in cultural history has written about laughter this much. James Nikopoulos investigates modernism's paradoxical relationship with mirth. Why was the gesture we conventionally associate with happiness the only sensible way of responding to a world, as Max Weber wrote, that had been "disenchanted of its meaning"? In answering these questions, Nikopoulos also delves into our ongoing relationship with laughter. He looks at contemporary research in emotion and evolutionary theory, as well as to the two-thousand-plus-year history of the philosophy of humor, in order to propose a novel way of understanding laughter, humor, and their complicated relationships with modern life. The Stability of Laughter explores how art unsettles the simplifications we revert to in our attempts to make sense of human history and social interaction.

Stalinism Revisited Apr 28 2022 Deals with the period of takeover and of 'high Stalinism' in Eastern Europe (1945-1955). These years are considered to be fundamentally characterized by institutional and ideological transfers based upon the premise of radical transformism and of cultural revolution. Both a balance-sheet politico-historical synthesis that reflects the archival and thematic novelties which came about in the communism studies after 1989.

Clio's Bastards Feb 24 2022 Clio's Bastards uses an examination of the discipline of history in Canadian universities as the point of entry for a much larger exploration of the intellectual, spiritual, and moral confronting Western civilization today. Over the past four decades, academic history was slowly perverted as historians adopted new sociological approaches to the study of the past. Historians altered the content and goals of the discipline as they sought not Truth but Justice as part of a larger ideological program of social change. And today, the pervasive sociological way of seeing, understanding, and explaining our world has become the "new common sense" right across the Western world, both inside and outside the academy. Sociological thought, however, is neither "new" nor "advanced" nor is it "progressive" as its adherents think it is simply recrudescence Sophistry and Cynicism, destructive philosophies which ruined and fouled ancient Greece the source and inspiration for Western civilization.
