US Navy Ships vs Japanese Attack Aircraft Jul 28 2022 The striking power of the Imperial Japanese Navy's carrier-based attack aircraft was established at Pearl Harbor, and the IJN's carrier-based torpedo and dive-bombers showed their prowess again at the Battle of Coral Sea when they sank the US Navy carrier USS Lexington and damaged the carrier USS Yorktown. Even at the disastrous Battle of Midway, the relatively small number of IJN attack- and torpedo-bombers that were launched against the US fleet proved that they remained a potent force by heavily damaging Yorktown again, which allowed an IJN submarine to sink the carrier. At Guadalcanal, IJN carrier-based aircraft sank the carrier USS Hornet and badly damaged USS Enterprise twice. However, throughout 1942, US Navy ship defences brought down an increasing number of attacking IJN aircraft. The final major battle of the year, the Battle of Santa Cruz, exacted crippling losses on the IJN, setting the stage for the eclipse of the IJN's highly trained and effective aviation attack forces. Packed with illustrations and contemporary photographs, this engrossing volume details the design, tactics, and operational records of both the US Navy ships and the IJN aircraft which attacked them over the year following Pearl Harbor.

[Japanese Management in Evolution](#) Sep 17 2021 Japanese Management in Evolution illustrates the significant changes that have been taking place in Japanese business by focusing on "emerging industries" in the relatively neglected service and "creative" sectors as well as other key industries, and to put those changes in historical perspective by providing an overview of business development since World War II. By employing state-of-the-art research techniques and unconventional innovative approaches in analysing Japanese management – including network and discourse analysis, ethnographic explorations, and more – the book reveals historical developments and in-depth analyses of established and emerging composition of sectors and industries where cultural capital matters. Throughout the book, the common theme conveyed to readers is a consistently strong message that the change is ongoing and the evolution of management style is real in the Japanese context. The book would be of great interest to researchers, academics and practitioners in fields of global management, international management, and Asian capitalism.

No Matter Where the Journey Takes Me Aug 24 2019 Leprosy has tormented mankind since records began. For much of its long history it was without cure--a disfiguring disease that stigmatized those it affected, isolating them from society. Today there is an effective treatment, but the last mile to achieve a leprosy-free world is the hardest. Now approaching eighty years old, one Japanese philanthropic activist has played a key role in global efforts against leprosy, both as head of a private foundation and as the World Health Organization's 'Goodwill Ambassador for Leprosy Elimination'. In this book, he lays out his personal mission and philosophy, and explains how his father, the politician and philanthropist Ryoichi Sasakawa, influenced his decision to make leprosy elimination his life's work. Yohei Sasakawa has visited more than 100 countries, motivating political leaders, raising awareness via the media, encouraging frontline health workers, and helping to empower persons affected by leprosy and their families to speak out for their rights. His book is a validation of the path taken by a father and son to change the course of leprosy history, and to transform the circumstances of those affected by the disease for the better.

Japan's Aid Diplomacy and the Pacific Islands Aug 29 2022 Factors that have motivated and shaped Japan's official development assistance towards the pacific islands are explored. Also examined is how Japan has responded to these criticisms and challenges, the impact of competing interests and objectives on Japan's aid policies.

The Determinants of Leadership Feb 29 2020 This book investigates the determinants of leadership in East Asia, emphasizing the significance of followership in the success and failure of leadership projects proposed by China, Japan, and the United States. While doing so, it answers a central question in the field of international relations: Why do potential leader countries succeed in obtaining potential followers in some instances, but fail to do so in other instances? Employing an inclusive leadership and societal approach, the book investigates how the leading countries motivate followership in East Asian economic and security dynamics. It analyzes how Chinese, Japanese and American leadership obtained acceptance from potential followers, focusing on the significance of domestic politics of potential follower countries in shaping their governmental preferences and generating followership. The book features empirical evidence in six case studies, covering topics such as the successful Chinese endeavor of South Korea joining the Chinese initiative for the Asian Infrastructure and Investment Bank (AIIB), the failed US attempt to prevent South Korea

from doing so, the US's success to convince Japan to join the Trans-Pacific Partnership (TPP), the failed Japanese strive for winning South Korea's support for Japan's bid for a permanent seat at the UN Security Council (UNSC), the Chinese failure at obtaining the Philippines' backing of the Chinese aspirations in the South China Sea (SCS) during the Aquino Presidency, and, finally, the Chinese success on the same effort during the Duterte presidency. The book will appeal to students, scholars, and researchers of international relations interested in a better understanding of leadership determinants in East Asia, Global Power Shift, foreign policy, as well as East Asian economic and security dynamics.

China's Crisis Behavior Oct 07 2020 The first study to systematically analyze the patterns of China's foreign policy crisis behavior after the Cold War.
