*Strategy for Victory* Jul 28 2022 Unlike any other book that has looked at air support for the British army in the Second World War, *Strategy for Victory: The Development of British Tactical Air Power, 1919-1943* examines the highly contentious and protracted debate between the British army and the RAF over air support from the perspectives of the airmen - both the Air Staff in the UK and the RAF deployed on expeditionary operations overseas.

*The Nature of the Mechanical Bond* Feb 20 2022

"The story is told by THE inventor-pioneer-master in the field and is accompanied by amazing illustrations... [it] will become an absolute reference and a best seller in chemistry!" Alberto Credi "... the great opus on the mechanical bond. A most impressive undertaking!" Jean-Marie Lehn Congratulations to co-author J. Fraser Stoddart, a 2016 Nobel Laureate in Chemistry. In molecules, the mechanical bond is not shared between atoms—it is a bond that arises when molecular entities become entangled in space. Just as supermolecules are held together by

supramolecular interactions, mechanomolecules, such as catenanes and rotaxanes, are maintained by mechanical bonds. This emergent bond endows mechanomolecules with a whole suite of novel properties relating to both form and function. They hold unlimited promise for countless applications, ranging from their presence in molecular devices and electronics to their involvement in remarkably advanced functional materials. *The Nature of the Mechanical Bond* is a comprehensive review of much of the contemporary literature on the mechanical bond, accessible to newcomers and veterans alike. Topics covered include: Supramolecular, covalent, and statistical approaches to the formation of entanglements that underpin mechanical bonds in molecules and macromolecules Kinetically and thermodynamically controlled strategies for synthesizing mechanomolecules Chemical topology, molecular architectures, polymers, crystals, and materials with mechanical bonds The stereochemistry of the mechanical bond (mechanostereochemistry), including the novel types of dynamic and static isomerism and chirality that emerge in mechanomolecules Artificial molecular switches and machines based on the large-amplitude translational and rotational motions expressed by suitably designed catenanes and rotaxanes. This contemporary and highly interdisciplinary field is summarized in a visually appealing, image-driven format, with more than 800 illustrations covering both fundamental and applied research. *The Nature of the Mechanical Bond* is a must-read for everyone, from students to experienced researchers, with an interest in chemistry's latest and most non-canonical bond. **Caring for Family Pets** Aug 05 2020 This book helps pet owners fully understand what it means to care for a companion animal, from choosing a pet to veterinary visits and beyond.

*Kindred Spirits* Nov 07 2020 In *Kindred Spirits*, Anne Benvenuti visits with individuals and groups working in animal conservation, rescue, and sanctuary programs around the world. We meet not only cats and dogs but also ravens, elephants, cheetahs, whales, farm and circus

animals, monkeys, even bees. A psychologist and storyteller, Benvenuti focuses on moments of transformative contact between humans and other animals, portraying vividly the resulting ripples that change the lives of both animals and humans. Noting that we are all biologically members of one animal family, she expertly weaves emergent understandings of animal and human neurobiology, showing that the ways in which other animals feel and think are actually similar to humans. Love, grief, fear, rage, sadness, curiosity, play: these are shared by us all, a key insight of affective neuroscience that informs Benvenuti's perceptions of human-animal relationships. She effortlessly drops clues to understanding human motivation and behavior into her narratives, and points to ways in which we all—other animals and humans alike—must come up with creative responses to problems such as climate change. As we travel with her to both backyard and far-flung locations, we experience again and again the surprising fact that other animals reach back to us, with curiosity, interest, even care. Benvenuti writes for the animal-loving public but also for anyone who loves a good story, or is interested in ecology, animal welfare, psychology, or philosophy.

**Thomas Middleton: Four Plays** Nov 27 2019

This New Mermaids anthology brings together the four most popular and widely studied of Thomas Middleton's plays - *Women Beware Women*; *The Changeling*; *The Roaring Girl* and *A Chaste Maid in Cheapside* - with a new introduction by William Carroll, examining the plays in the context of early modern theatre, culture and politics, as well as their language,

characters and themes. On-page commentary notes guide students to a better understanding and combine to make this an indispensable student edition ideal for study and classroom use from A Level upwards.

**On World Religions** Sep 17 2021 '... Swamiji attended the World Parliament of Religions at Chicago in 1893 as a true representative of his country and religion...Through his speeches at Chicago, and his subsequent work in America and England, [he] showed the universal relevance and significance of India's ancient philosophy and spiritual culture in solving many of the problems associated with modern living'.

—Shri Pranab Mukherjee, The President of India  
Based on the ideas propagated by Swami Vivekananda, this book presents a brief survey of various approaches to religion and offers different perspectives of religious diversity. Scholars and philosophers of many religious traditions examine the social and cultural issues that lie at the interstices of this religious diversity. The volume throws light on several mega trends—knowledge revolution, a new kind of humanism stressing on the rights of underprivileged people, equality of gender, and protection against all forms of exploitation, injustice along with the awareness toward environmental concerns, as well as spiritual revolution—all characteristics of a new age. The contributors to this volume have devoted themselves to studying specific facets of this vast and intricate theme over many years of their respective professional careers. The interview with HH Dalai Lama, Maulana Wahiduddin Khan, Karan Singh and Reverend Mpho Tutu forms the key feature of this book. The volume will appeal to those interested in Philosophy, Religion, History, Culture and Asian Studies.

Allies in Air Power Apr 12 2021 In the past century, multinational military operations have become the norm; but while contributions from

different nations provide many benefits—from expanded capability to political credibility—they also present a number of challenges. Issues such as command and control, communications, equipment standardization, intelligence, logistics, planning, tactics, and training all require consideration. Cultural factors present challenges as well, particularly when language barriers are involved. In *Allies in Air Power*, experts from around the world survey these operations from the birth of aviation to the present day. Chapters cover conflicts including World War I, multiple theaters of World War II, the Korean War, the Vietnam War, the Gulf War, Kosovo, the Iraq War, and various United Nations peacekeeping missions. Contributors also analyze the role of organizations such as the UN, NATO, and so-called "coalitions of the willing" in laying the groundwork for multinational air operations. While multinational military action has become commonplace, there have been few detailed studies of air power cooperation over a prolonged period or across multiple conflicts. The case studies in this volume not only assess the effectiveness of multinational operations over time, but also provide vital insights into how they may be improved in the future.

**Shakespeare Reloaded** Aug 29 2022

*Shakespeare Reloaded* encourages middle secondary students to imaginatively engage with Shakespeare's plays and poetry as they actively explore key ideas and themes and how these are expressed through language. This active approach to studying Shakespeare will complement and enhance the study of individual text.

Annual Reports of the War Department Jun 14 2021

*A Brief Guide to James Bond* Jun 26 2022 The world's fascination with Bond is unstoppable. James Bond is the greatest British fictional hero of the post-war era. He also has a huge following

in the US - and around the world - as a legendary Cold War warrior, and now as a daredevil able to take on the villains of the post-Cold War world. The Bond books are all in print. Today, Sebastian Faulks is writing new stories while Charlie Higson is writing children's versions. In this comprehensive guide to Ian Fleming, the books, the films and the world that was created out of 007, Nigel Cawthorne uncovers Bond's allure. It comes with special sections on the main characters - Q, M, the Bond Girls, and the women who first inspired them; the cars, and the incomparable baddies. It will be the ideal gift for fans and aficionados alike and will be published to coincide with the 50th anniversary of DOCTOR NO; the new film is scheduled for autumn 2012.

The Brains That Pull the Triggers Feb 08 2021

History shows us the same grim phenomenon over and over: under extreme circumstances, apparently ordinary citizens turn into merciless torturers and systematic executioners of defenseless victims. War crimes and genocides may be orchestrated by dictators and terrorist leaders, but they are carried out by individuals who otherwise show empathy, sound moral judgment, and aversion to violence. How does this happen? Is the pull of a murderous regime strong enough to make harmless men become amoral monsters, or is there some underlying psychological or physiological trait that predisposes certain people toward this transition? Can the pathological switch between sensitive human and desensitized killer be isolated, redicted, and prevented? Can it be overridden by compassion and altruism? Is violent aggression addictive? What implications does this have for the way we try and punish perpetrators of such crimes? These are among the questions taken up in a series of conferences on mass violence held from 2015 to 2017 at the Paris Institute of Advanced Studies. In this volume, neuroscientists, sociologists, historians, and legal scholars share research and insights on the roots of radicalization, in-group loyalty, how we learn to follow rules, and many other themes. The result is a troubling but distinctly

illuminating glimpse of human nature, and a model of how interdisciplinary dialogue can shed light into its darkest corners. With contributions from Xabier Agirre Aranburu; Scott Atran; Alain Berthoz and Bérangère Thirioux; Thomas Boraud; Michel Botbol; Emile Bruneau; Christopher R. Browning; David Cohen and Nicolas Campelo; Jean-Paul Costa; Susan T. Fiske; Itzhak Fried; Julie Grèzes and Jorge L. Armony; Patrick Haggard; Etienne Koechlin; Heather D. Lucas, Daniel Sanchez, Jessica D. Creery, Xiaoqing Hu, and Ken A. Paller; Gretty M. Mirdal; Mathias Pessiglione; Richard Rechtman; Trevor W. Robbins; Edmund T. Rolls; Françoise Sironi; James K. Stewart; and Jean-Pol Tassin.

**Last Stop Before Tomorrow** Dec 09 2020

Last Stop Before Tomorrow shares the compelling tale of three people as they wrestle with the riddles, paradoxes, and dilemmas of climate change and technology, and search for answers to the human predicament and their own lives. Jules, a computer genius, finds himself working with Sir Henry Percival McIntyre, CEO of a multinational energy company, who knows he must change the course of his global enterprise as humanity struggles to change the course of history. Maryanne, Jules' artist lover, distrusts the alliance and is filled with premonitions. As Maryanne, Jules, and Sir Henry are brought together, they are swept along on a journey accompanied by Prometheus, bringer of fire, and Pandora, the inquisitive, whose legacies also hang in the balance as they wonder if the outcome will be tragic or transcendent. The writing is brilliant. Its not just a story, its an experience. - B. Wolfe, artist The book has sweep, velocity, and power. Kept me on edge of my seat to the end. - B. Lebaron, musician
