Graphene, Carbon Nanotubes, and Nanostructures Aug 20 2021 Graphene, Carbon Nanotubes, and Nanostructures: Techniques and Applications offers a comprehensive review of groundbreaking research in nanofabrication technology and explores myriad applications that this technology has enabled. The book examines the historical evolution and emerging trends of nanofabrication and supplies an analytical understanding of some of the most important underlying nanofabrication technologies, with an emphasis on graphene, carbon nanotubes (CNTs), and nanowires. Featuring contributions by experts from academia and industry around the world, this book presents cutting-edge nanofabrication research in a wide range of areas. Topics include: CNT electrostatics and signal propagation models Electronic structure calculations of a graphene-hexagonal boron nitride interface to aid the understanding of experimental devices based on these heterostructures How a laser field would modify the electronic structure and transport response of graphene, to generate bandgaps The fabrication of transparent CNT electrodes for organic light-emitting diodes Direct graphene growth on dielectric substrates, and potential applications in electronic and spintronic devices CNTs as a promising candidate for next-generation interconnect conductors CMOS-CNT integration approaches, including the promising localized heating CNT synthesis method CNTs in electrochemical and optical biosensors The synthesis of diamondoids by pulsed laser ablation plasmas generated in supercritical fluids, and possible applications The use of DNA nanostructures in lithography CMOS-compatible silicon nanowire biosensors The use of titanium oxide-B nanowires to detect explosive vapors The properties of protective layers on silver nanoparticles for ink-jet printing Nanostructured thin-film production using microreactors A one-stop reference for professionals, researchers, and graduate students working in nanofabrication, this book will also be useful for investors who want an overview of the current nanofabrication landscape.

Embassy Construction Dec 12 2020 To provide safe and secure workplaces for overseas posts, the Dept. of State has built 64 new embassy compounds (NEC) and other facilities since 1999, has 31 ongoing projects, and plans to build at least 90 more. In 2007, State reported the U.S. contractor pool for building NECs had reached its limit and proposed legislation to amend the criteria to qualify for NEC awards. This report examined: (1) how contractor participation in the NEC program changed in recent years; (2) the degree to which State assessed the need for and potential outcomes of its proposed amendment; (3) factors contractors consider when deciding to participate in the program; and (4) actions State has taken to address reported declines in contractor participation. Top Secret America Jun 29 2022 The top-secret world that the government created in response to the 9/11 terrorist attacks has become so enormous, so unwieldy, and so agencies that no one knows how much money it costs, how many people it employs or exactly how many agencies duplicate work being done elsewhere. The result is that the system put in place to keep the United States safe may be putting us in greater danger. In Top Secret America, award-winning reporters Dana Priest and William Arkin uncover the enormous size, shape, mission, and consequences of this invisible universe of over 1,300 government facilities in every state in America; nearly 2,000 outside companies used as contractors; and more than 850,000 people granted "Top Secret" security clearance. A landmark exposé of a new, secret "Fourth Branch" of American government, Top Secret America is a tour de force of investigative reporting--and a book sure to spark national and international alarm.

The Accelerating Decline In America's High-Skilled WorkForce: Implications for Immigration Policy Jun 05 2020 Kirkegaard explores the increasingly dysfunctional state of present US high-skilled immigration laws and recommends a coherent set of immediate reforms, which should aim to facilitate continuously high and increasingly economically necessary levels of high-skilled immigration to the United States. In recent decades American skill levels have stagnated and struggled to make the global top 10. As baby boomers retire, the United States risks losing these skills altogether. In response, the United States should address high-skilled immigration in its broader foreign economic policies in an attempt to remain a global leader in the face of accelerating global economic integration.

Plunkett's Wireless, Wi-Fi, RFID and Cellular Industry Almanac 2007 Apr 03 2020 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access

are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2007 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our company profiles, nearly 350, include complete business descriptions and up to 27 executives by name and title.

Solving Cyber Risk Jan 13 2021 The non-technical handbook for cyber security risk management Solving Cyber Risk distills a decade of research into a practical framework for cyber security. Blending statistical data and cost information with research into the culture, psychology, and business models of the hacker community, this book provides business executives, policy-makers, and individuals with a deeper understanding of existing future threats, and an action plan for safeguarding their organizations. Key Risk Indicators reveal vulnerabilities based on organization type, IT infrastructure and existing security measures, while expert discussion from leading cyber risk specialists details practical, real-world methods of risk reduction and mitigation. By the nature of the business, your organization's customer database is packed with highly sensitive information that is essentially hacker-bait, and even a minor flaw in security protocol could spell disaster. This book takes you deep into the cyber threat landscape to show you how to keep your data secure. Understand who is carrying out cyber-attacks, and why Identify your organization's risk of attack and vulnerability to damage Learn the most cost-effective risk reduction measures Adopt a new cyber risk assessment and quantification framework based on techniques used by the insurance industry By applying risk management principles to cyber security, non-technical leadership gains a greater understanding of the types of threat, level of threat, and level of investment needed to fortify the organization against attack. Just because you have not been hit does not mean your data is safe, and hackers rely on their targets' complacency to help maximize their haul. Solving Cyber Risk gives you a concrete action plan for implementing top-notch preventative measures before you're forced to implement damage control.
