Reimagining Journalism and Social Order in a Fragmented Media World Oct 12 2020 This book examines journalism's ability to promote and foster cohesive and collective action while critically examining its place in the intensifying battle to maintain a society's social order. From chapters discussing the challenges journalists face in covering populism and Donald Trump, to chapters about issues of race in the news, intersections of journalism and nationalism, and increased mobilities of audiences and communicators in a digital age, Reimagining Journalism and Social Order in a Fragmented Media World focuses on the pitfalls and promises of journalism in moments of social contestation. Rich with perspectives from across the globe, this book connects journalism studies to critical scholarship on social order and social control, nationalism, social media, geography, and the function of news as a social sphere. In a fragmented media world and in times of social contestation, Reimagining Journalism and Social Order in a Fragmented Media World provides readers with insights as to how journalism operates in order

to highlight—and enhance—elements and actions that bring about order. This book was originally published as a special issue of *Journalism Studies* and a special issue of *Journalism Practice*.

Doing Reflective Practice in English Language Teaching Sep 03 2022 This practical and engaging book introduces readers to reflective practice in English language teaching. Assuming no background knowledge, Thomas S. C. Farrell clearly and accessibly walks through ways that teachers can integrate and implement reflective practice in the classroom and in other contexts to benefit their teaching and their own professional development. Each chapter covers an important dimension of reflective practice and features many ready-to-use activities that are designed to empower teachers and allow them to overcome challenges they'll face throughout their careers. Covering many types of reflection and the many purposes it serves, this book addresses written reflection, lesson planning, classroom observation, classroom management, group communication and more. This resource is ideal for preservice and early career language teachers and is an important supplement to courses in language education and applied linguistics programs.

How to Be Like Coach Wooden Jun 19 2021 John Wooden is an American icon. Since he announced his retirement thirty years

ago, “Coach” remains one of our country's most popular and heroic figures. What John Wooden accomplished as basketball coach at UCLA will never be repeated—eighty-eight victories in a row, ten national championships—but what makes his legacy even more amazing is how he did it: with honor, integrity and grace. In his research for *How to Be Like Coach Wooden*, Pat Williams recounts well over 800 interviews. The result is an inspiring motivational biography about a great hero of basketball and one of the most amazing leaders in history. *How to Be Like Coach Wooden* is the next dynamic book in the *How to Be Like* "character biography" series, which focuses on drawing out important lessons from the lives of great men and women. In this book, readers will learn from Coach Wooden, a beacon of honesty, goodness and faith. Wooden cared about winning in basketball, but he cared more about winning in life.

Applications of Regression Models in Epidemiology Aug 02 2022 A one-stop guide for public health students and practitioners learning the applications of classical regression models in epidemiology This book is written for public health professionals and students interested in applying regression models in the field of epidemiology. The academic material is usually covered in

public health courses including (i) Applied Regression Analysis, (ii) Advanced Epidemiology, and (iii) Statistical Computing. The book is composed of 13 chapters, including an introduction chapter that covers basic concepts of statistics and probability. Among the topics covered are linear regression model, polynomial regression model, weighted least squares, methods for selecting the best regression equation, and generalized linear models and their applications to different epidemiological study designs. An example is provided in each chapter that applies the theoretical aspects presented in that chapter. In addition, exercises are included and the final chapter is devoted to the solutions of these academic exercises with answers in all of the major statistical software packages, including STATA, SAS, SPSS, and R. It is assumed that readers of this book have a basic course in biostatistics, epidemiology, and introductory calculus. The book will be of interest to anyone looking to understand the statistical fundamentals to support quantitative research in public health. In addition, this book:

- Is based on the authors' course notes from 20 years teaching regression modeling in public health courses
- Provides exercises at the end of each chapter
- Contains a solutions chapter with answers in STATA, SAS, SPSS, and R
- Provides real-world public health applications of the theoretical aspects contained in the chapters

International Arbitration: Law and Practice in Switzerland Nov 05 2022 This book expounds the theory of international arbitration law. It explains in easily accessible terms all the fundamentals of arbitration, from separability of the arbitration agreement to competence-competence over procedural autonomy, finality of the award, and many other concepts. It does so

with a focus on international arbitration law and jurisprudence in Switzerland, a global leader in the field. With a broader reach than a commentary of Chapter 12 of the Swiss Private International Law Act, the discussion contains numerous references to comparative law and its developments in addition to an extensive review of the practice of international tribunals. Written by two well-known specialists - Professor Kaufmann-Kohler being one of the leading arbitrators worldwide and Professor Rigozzi one of the foremost experts in sports arbitration - the work reflects many years of experience in managing arbitral proceedings involving commercial, investment, and sports disputes. This expertise is the basis for the solutions proposed to resolve the many practical issues that may arise in the course of an arbitration. It also informs the discussion of the arbitration rules addressed in the book, from the ICC Arbitration Rules to the Swiss Rules of International Arbitration, the CAS Code, and the UNCITRAL Rules. While the book covers commercial and sports arbitrations primarily, it also applies to investment arbitrations conducted under rules other than the ICSID framework.

Specialty Competencies in Group Psychology Aug 29 2019 Human beings are born into groups, educated in groups, and belong to many groups, yet routinely attribute individual motives to their actions when in fact group-influenced behaviors are the more likely culprit. The theory, research, and practice of group dynamics, group psychology, and group psychotherapy illuminate useful ways for us to learn group skills and to better understand how we are influenced by groups. In *Specialty Competencies in Group Psychology* Sally Barlow provides a comprehensive overview of the foundational and functional competencies related to the field of group psychology. Barlow describes the potential treatment benefits of group work and shows how the wide range of applicability makes this a relevant volume across diverse areas, regardless of the population receiving treatment or the theoretic orientation of the therapist. This volume distills the uniqueness and contributions of the specialty in a way that benefits not only psychologists who specialize in group psychotherapy, but also clinicians who have previously taken a more traditionally individual approach to treatment. Series in Specialty Competencies in Professional Psychology Series Editors Arthur M. Nezu and Christine Maguth Nezu As the field of psychology continues to grow and new specialty areas emerge and achieve recognition, it has become increasingly important to define the standards of professional specialty practice. Developed and conceived in response to this need for practical guidelines, this series presents methods, strategies, and techniques for conducting day-to-day practice in any given psychology specialty. The topical volumes address best practices across the functional and foundational competencies that characterize the various psychology specialties, including clinical psychology, cognitive and behavioral psychology, school psychology, geropsychology, forensic psychology,

clinical neuropsychology, couples and family psychology, and more. Functional competencies include common practice activities like assessment and intervention, while foundational competencies represent core knowledge areas such as ethical and legal issues, cultural diversity, and professional identification. In addition to describing these competencies, each volume provides a definition, description, and development timeline of a particular specialty, including its essential and characteristic pattern of activities, as well as its distinctive and unique features. Written by recognized experts in their respective fields, volumes are comprehensive, up-to-date, and accessible. These volumes offer invaluable guidance to not only practicing mental health professionals, but those training for specialty practice as well.

Applied Problem-Solving in Healthcare Management Oct 24 2021 Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. Applied Problem-Solving in Healthcare Management is a practical textbook devoted to developing and strengthening problem-solving and decision-making leadership competencies of healthcare administration students and healthcare management professionals. Built upon the University of Minnesota Master of Healthcare Administration Program's Problem-Solving Method, the text describes the "never assume" mindset and the structured method that drive evidence-based, action-oriented problem-solving. The "never assume" mindset requires healthcare leaders to understand themselves and their stakeholders, and to engage in waves of divergent and convergent thinking. This structured method guides the problem solver through the phases of defining, studying, and acting on complex interrelated organizational problems that involve multiple root causes. The book also describes how the Problem-Solving Method is complementary to quality improvement methods and can be used in healthcare organizations along with Lean, Design Thinking, and Human Centered Design. Providing step-by-step instruction including useful tips, tools, activities, and case studies, this effective resource demonstrates the utility of the method for all types of health organization settings including health systems, hospitals, clinics, population health, and long-term care. For students taking health management, capstone, and experiential learning courses, including internship and residency projects, this book allows them to test and apply their problem-solving and decision-making skills to real-world situations. Beyond the classroom, it is an indispensable resource

for organizations seeking to enhance the problem-solving skills of their workforce. The authors of the text have nearly 75 years of combined experience in healthcare management, leadership, and professional consulting, and teaching and advising healthcare administration students in classrooms, on student capstone, internship and residency projects, and case competitions. Synthesizing their expertise, this text serves as a guide for those who wish to strengthen their problem-solving abilities to systematically identify, analyze, study, and solve pressing organizational challenges in healthcare settings. Key Features:
Describes a mindset and a structured problem-solving method that builds leadership competencies Encourages a step-by-step problem-solving approach to define, study, and act on problems to drive action-oriented solutions Supports experiential learning and coaching for students and professionals early in their careers, applicable especially to healthcare management, capstone, and student consulting courses, internship and residency projects, case competitions, and professional development in organizations Compares the Problem-Solving Method to other complementary methods used in many healthcare organizations, including Lean, Design Thinking, and Human Centered Design

Use Case Driven Object Modeling with UML Theory and Practice Nov 24 2021 Diagramming and process are important topics in today's software development world, as the UML diagramming language has come to be almost universally accepted. Yet process is necessary; by themselves, diagrams are of little use. Use Case Driven Object Modeling with UML - Theory and Practice combines the notation of UML with a lightweight but effective process - the ICONIX process - for designing and developing software systems. ICONIX has developed a growing following over the years. Sitting between the free-for-all of Extreme Programming and overly rigid processes such as RUP, ICONIX offers just enough structure to be successful.
