SENTIMENT ANALYSIS OF ENGLISH TWEETS USING DATA MINING Dec 19 2021 Due to the popularity of internet it becomes very easy for people to share their views over social networking websites. Most popular website among them is twitter. Twitter is a widely used social networking website that is used by the numerous people to give their opinion regarding a particular topic or product. So, today it becomes necessary to analyze the tweet of the people. The process to analyze and interpret the tweets is known as sentiment analysis. The main motive of this project is to identify how the tweets on the social networking website are used to identify the opinion of people regarding the particular product or policy. Twitter is a online website that allows the user to post the status of maximum 140 characters. Twitter has over 200 million registered users and 100 million active users [34]. So it comes to be a great source of valuable information. This project aims to develop a better way for sentiment analysis which is nothing a simple way to classify the tweets into positive, negative or neutral. The result of the sentiment analysis can be used by various organizations. Sentiment analysis can be used for forecasting the stock exchange, used to predict the popularity of any product in market, or used to predict the result of elections based on the public views on the social sites. The main motive of project is to develop a better way to accurately classify the unknown tweets according to their content.

Hollywood in San Francisco May 12 2021 One of the country's most picturesque cities and conveniently located just a few hours' drive from Hollywood, San Francisco became the most frequently and extensively filmed American city beyond the production hubs of Los Angeles and New York in the three decades after World War II. During those years, the cinematic image of the city morphed from the dreamy beauty of Vertigo to the nightmarish wasteland of Dirty Harry, although San Francisco itself experienced no such decline. This intriguing disconnect gives impetus to Hollywood in San Francisco, the most comprehensive study to date of Hollywood's move from studio to location production in the postwar era. In this thirty-year history of feature filmmaking in San Francisco, Joshua Gleich tracks a sea change in Hollywood production practices, as location shooting overtook studio-based filming as the dominant production method by the early 1970s. He shows how this transformation intersected with a precipitous decline in public perceptions of the American city, to which filmmakers responded by developing a stark, realist aesthetic that suited America's growing urban pessimism and superseded a fidelity to local realities. Analyzing major films set in San Francisco, ranging from Dark Passage and Vertigo to The Conversation, The Towering Inferno, and Bullitt, as well as the TV show The Streets of San Francisco, Gleich demonstrates that the city is a physical environment used to stage urban fantasies that reveal far more about Hollywood filmmaking and American culture than they do about San Francisco.

Soft Computing: Theories and Applications Feb 27 2020 This book focuses on soft computing and how it can be applied to solve real-world problems arising in various domains, ranging from medicine and healthcare, to supply chain management, image processing and cryptanalysis. It gathers high-quality papers presented at the International Conference on Soft Computing: Theories and Applications (SoCTA 2019), organized by The National Institute of Technology Patna, India. Offering valuable insights into soft computing for teachers and researchers alike, the book will inspire further research in this dynamic field.

Medical Writing Nov 25 2019 The first edition of this book (titled "The Clinician's Guide to Medical Writing") has become a standard in its field and remains an indispensable reference for any clinician, academic physician, or health professional who wishes to hone their writing skills. However, since its publication in 2004, significant changes have taken place in the way medical professionals communicate with each other and the world. Medical Writing: A Guide for Clinicians and Academicians, 2e retains all of the fundamental writing advice of the first edition and has been expanded to include two brand new chapters: How to Write a Research Protocol (including why a research project needs a written protocol, elements of the research protocol and common problems) How to Write a Grant Proposal (including sections on government and private grant funding sources, what you need to know about grant writing, and elements of a successful grant proposal) New information is also included throughout the book on becoming a successful writer, medical tables and figures, conflict of interest and disclosures, how to review a scientific article, statistical analysis, "pay-to-publish" journal publishing, electronic submission of manuscripts, issues in medical publishing and the future of medical writing and publication. New appendices address commonly encountered research and statistical terms and memorable aphorisms regarding writing, medical and otherwise.

Machine Learning Paradigms: Theory and Application Feb 09 2021 The book focuses on machine learning. Divided into three parts, the first part discusses the feature selection problem. The second part then describes the application of machine learning in the classification problem, while the third part presents an overview of real-world applications of swarm-based optimization algorithms. The concept of machine learning (ML) is not new in the field of computing. However, due to the ever-changing nature of requirements in today's world it has emerged in the form of completely new avatars. Now everyone is talking about ML-based solution strategies for a given problem set. The book includes research articles and expository papers on the theory and algorithms of machine learning and bio-inspiring optimization, as well as papers on numerical experiments and real-world applications.

Miami Manhunt Mar 10 2021 SCORE It's not just a name--it's a frame of mind. Nestled amid peach and candy-pink Art Deco buildings, Score is the hottest gay bar in Miami's South Beach. And for friends Ray Martinez, Ted Williams, and Brian Anderson, there's no better way to start the weekend than by checking out the steady stream of beautiful Latin men coursing in and out of Score's doors. . . While Miami is home to the most gorgeous males ever created by God or a lifetime gym membership, Ray, resident movie critic at The Miami News, would give the dating scene a one-star review. Tired of hooking up with sculpted, shallow hunks who use books as towel weights, Ray is thrilled to finally meet a guy he wants to take home to mami and papi. . . Ted, host of a popular Miami version of Entertainment Tonight, has enjoyed all the perks of his celebrity status. But being overexposed has its downside. Ted's longing for a deeper connection spurs a reckless move that could cost him everything. . . Brian has a life of leisure with his fabulously wealthy older boyfriend. The key rule to their open relationship: no sleeping with the same guy twice. But ever since Brian met a Puerto Rican love god named Eros, it's a rule he keeps breaking. . . A sexy, smart, and irresistibly witty new novel, Miami Manhunt explores one wild year when love gets crazy, hearts get broken and mended, and the only thing to count on is the fact that life will never be the same again. . .

An Analysis of the Educational and Professional Background of Newspaper Film Critics and the Influence These Critics Wield on Readers Feb 21 2022

How to Be a Film Critic in Five Easy Lessons Jan 20 2022 How to Be a Film Critic in Five Easy Lessons addresses the serious matter of the increasing gap between the published opinions of professional film critics and the reception of popular film by traditional movie-goers, especially millennial movie fans. Recent reactions to the low grades emanating from Rotten Tomatoes, the iconic film review aggregation site, have inspired various constituencies to call for significant changes, including some major studio CEOs, some actors, and the readers of reviews themselves. A new generation and breed of film critics is needed, not raised to please baby boomers or Generation X movie fans, but younger viewers who make up 30% of ticket buyers. This study examines all this and offers five categories of film reviewers plying their trade as models of consistency. New critics have to start somewhere, most often in college film classes, and deciding what type of critic one wants to be begins here.

Practical Approaches to Teaching Film May 24 2022 Rachel Ritterbusch's Practical Approaches to Teaching Film is a collection of essays focusing on the use of film in settings ranging from an introductory film class to an upper-division Women's Studies course. Drawing on their experience in the classroom, contributors to this anthology show how movies can be used to promote critical thinking, create an awareness of the male gaze, challenge dominant ideology, and unmask the constructedness of film. This volume treats a wide variety of film texts, from box-office hits like The Da Vinci Code to underappreciated art films such as Susan Streitfeld's Female Perversions; from Pépé le Moko and other French classics to more contemporary francophone works like Chaos and Rosetta; from self-reflexive films that interrogate the act of filmmaking itself to those that draw attention to the phallocentric nature of cinematic apparatus. Common to all these essays is the belief that, if used judiciously, film can be a valuable pedagogical tool. Aimed both at those currently teaching film and those wishing to do so, this volume provides practical support in the form of sample syllabi, assignments, and a glossary of film terms.

Twenty-One Genres and How to Write Them Aug 15 2021 In this classroom-tested approach to writing, Brock Dethier teaches students how to analyze and write twenty-one genres that students are likely to encounter in college and beyond. This practical, student-friendly, task-oriented text confidently guides writers through step-by-step processes, reducing the anxiety commonly associated with writing tasks. In the first section, Dethier efficiently presents each genre, providing models; a description of the genres' purpose, context, and discourse; and suggestions for writing activities or "moves" that writers can use to get words on the page and accomplish their writing tasks. The second section explains these moves, over two hundred of them, in chapters ranging from "Solve Your Process Problems" and "Discover" to "Revise" and "Present." Applicable to any writing task or genre, these moves help students overcome writing blocks and develop a piece of writing from the first glimmers of an idea to its presentation. This approach to managing the complexity and challenge of writing in college strives to be useful, flexible, eclectic, and brief—a valuable resource for students learning to negotiate unfamiliar writing situations.

Computational Science and Technology Jan 08 2021 This book gathers the proceedings of the Fourth International Conference on Computational Science and Technology 2017 (ICCST2017), held in Kuala Lumpur, Malaysia, on 29–30 November 2017. These proceedings offer practitioners and researchers the opportunity to present exciting advances in computational techniques and solutions in this area. This also identify emerging issues, help to shape future research directions, and will enable industrial users to apply cutting-edge, large-scale and high-performance computational methods.

Applications of Cognitive Computing Systems and IBM Watson Jul 14 2021 This book presents reports and methods that demonstrate the ease with which cognitive applications can be built using IBM Watson application program interfaces (APIs). It includes application reports from two IBM Watson API-based competitions – Hackathon (24 hours) and a Challenge task (~3 months). It also features a selection of papers presented at I-CARE 2016, the IBM Collaborative Academia Research Exchange event, from the areas of "Theory and Cognitive Computing", "Data Platforms and Systems," and "Societal Applications." IBM has a long tradition of research collaboration with colleagues in academia, and I-CARE is an annual event initiated in 2009 to promote collaborative innovation and learning, and explore new ways of fostering a culture of innovation. I-CARE's main goal is to "amalgamate" the thought leadership in Indian academia with that in industry, and foster a symbiotic environment for establishing a rich research culture in India. The 8th edition of I-CARE presents a collection of

thought-provoking ideas and novel Indian research projects related to three crucial areas: cognitive computing, systems and platforms that support large-scale data processing and practical systems that are designed for the public good.

On Location Aug 23 2019 Classroom-based writing tutoring is a distinct form of writing support, a hybrid instructional method that engages multiple voices and texts within the college classroom. Tutors work on location in the thick of writing instruction and writing activity. On Location is the first volume to discuss this emerging practice in a methodical way. The essays in this collection integrate theory and practice to highlight the alliances and connections on-location tutoring offers while suggesting strategies for resolving its conflicts. Contributors examine classroom-based tutoring programs located in composition courses as well as in writing intensive courses across the disciplines.

Sentiment Analysis and Opinion Mining Jun 20 2019 Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online. Table of Contents: Preface / Sentiment Analysis: A Fascinating Problem / The Problem of Sentiment Analysis / Document Sentiment Classification / Sentence Subjectivity and Sentiment Classification / Aspect-Based Sentiment Analysis / Sentiment Lexicon Generation / Opinion Summarization / Analysis of Comparative Opinions / Opinion Search and Retrieval / Opinion Spam Detection / Quality of Reviews / Concluding Remarks / Bibliography / Author Biography

In Your Own Voice Jul 26 2022 A good columnist needs to have lots of ideas to write about people and issues that affect them. This volume will show young writers how curiosity and close observation of the world around them can turn into a column with a distinctive voice, whether they are writing an editorial, a review, a sports column, or a humorous piece. Studying examples from famous columnists or fellow student journalists can help writers develop their own style. Other types of columns, such as letters to the editor and surveys, are also discussed.

Anticipation Aug 27 2022 In 1999, the first new Star Wars movie in sixteen years came to theater screens worldwide. Leading up to the release of the film, the hype and media coverage reached epic proportions. The Phantom Menace graced every cover from Vanity Fair to Newsweek to Entertainment Weekly. Fans began camping in line for more than a month in Los Angeles just to be first to see the new film. Anticipation tells the real-life story of a movie that faced expectations unlike those of any other film in history, but had the advantage of years of anticipation and excitement from eager fans and the public. The Phantom Menace deserves a place in film history not only as the most anticipated film ever made, but also for its place as the first film presented to the public with digital projection technology, its status as one of the highest grossing films ever made, and the unbelievable devotion of thousands of fans who demonstrated the great meaning movies can have to people of all ages and social backgrounds.

Interpreting Films Sep 23 2019 Employing a wide range of examples from Uncle Tom's Cabin and Birth of a Nation to Zelig and Personal Best, Janet Staiger argues that a historical examination of spectators' responses to films can make a valuable contribution to the history, criticism, and philosophy of cultural products. She maintains that as artifacts, films do not contain immanent meanings, that differences among interpretations have historical bases, and that these variations are due to social, political, and economic conditions as well as the viewers' constructed images of themselves. After proposing a theory of reception study, the author demonstrates its application mainly through analyzing the varying responses of audiences to certain films at specific moments in history. Staiger gives special attention to how questions of class, gender, sexual preference, race, and ethnicity enter into film viewers' interpretations. Her analysis reflects recent developments in post-structuralism, cognitive psychology, psychoanalysis, and cultural studies, and includes a discussion of current reader-response models in literary and film studies as well as an alternative approach about historical readers and spectators.

The 62 full papers and 6 short papers presented were carefully reviewed and selected from a total of 108 submissions. The papers are organized in the following topical sections: artificial intelligence and IoT in agriculture; artificial intelligence and law; artificial intelligence in medicine; artificial intelligence in power and energy systems; artificial intelligence in transportation systems; artificial life and evolutionary algorithms; ambient intelligence and affective environments; general AI; intelligent robotics; knowledge discovery and business intelligence; multi-agent systems: theory and applications; and text mining and applications.

Looking Back at the Arkansas Gazette Sep 04 2020 With a legendary beginning as a printing press floated up the Arkansas River in 1819, the Arkansas Gazette is inextricably linked with the state's history, reporting on every major Arkansas event until the paper's demise in 1991 after a long, bitter, and very public newspaper war. Looking Back at the Arkansas Gazette, knowledgeably and intimately edited by longtime Gazette reporter Roy Reed, comprises interviews from over a hundred former Gazette staffers recalling the stories they reported on and the people they worked with from the late forties to the paper's end. The result is a nostalgic and justifiably admiring look back at a publication known for its progressive stance in a conservative Southern state, a newspaper that, after winning two Pulitzers for its brave rule-of-law stance during the Little Rock Central High Crisis, was considered one of the country's greatest. The interviews, collected from archives at the David and Barbara Pryor Center for Arkansas Oral and Visual History at the University of Arkansas, provide fascinating details on renowned editors and reporters such as Harry Ashmore, Orville Henry, and Charles Portis, journalists who wrote daily on Arkansas's always-colorful politicians, its tragic disasters and sensational crimes, its civil rights crises, Bill Clinton, the Razorbacks sports teams, and much more. Full of humor and little-known details, Looking Back at the Arkansas Gazette is a fascinating remembrance of a great newspaper.

Proceedings of the 23rd International Conference on Industrial Engineering and Engineering Management 2016 Jun 01 2020 International Conference on Industrial Engineering and Engineering Management is sponsored by Chinese Industrial Engineering Institution, CMES, which is the unique national-level academic society of Industrial Engineering. The conference is held annually as the major event in this area. Being the largest and the most authoritative international academic conference held in China, it supplies an academic platform for the experts and the entrepreneurs in International Industrial Engineering and Management area to exchange their research results. Many experts in various fields from China and foreign countries gather together in the conference to review, exchange, summarize and promote their achievements in Industrial Engineering and Engineering Management fields. Some experts pay special attention to the current situation of the related techniques application in China as well as their future prospect, such as Industry 4.0, Green Product Design, Quality Control and Management, Supply Chain and logistics Management to cater for the purpose of low-carbon, energy-saving and emission-reduction and so on. They also come up with their assumption and outlook about the related techniques' development. The proceedings will offer theatrical methods and technique application cases for experts from college and university, research institution and enterprises who are engaged in theoretical research of Industrial Engineering and Engineering Management and its technique's application in China. As all the papers are feathered by higher level of academic and application value, they also provide research data for foreign scholars who occupy themselves in investigating the enterprises and engineering management of Chinese style.

Ink-Stained Hollywood Jan 28 2020 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. For the first half of the twentieth century, no American industry boasted a more motley and prolific trade press than the movie business—a cutthroat landscape that set the stage for battle by ink. In 1930, Martin Quigley, publisher of Exhibitors Herald, conspired with Hollywood studios to eliminate all competing trade papers, yet this attempt and each one thereafter collapsed. Exploring the communities of exhibitors and creative workers that constituted key subscribers, Ink-Stained Hollywood tells the story of how a heterogeneous trade press triumphed by appealing to the foundational aspects of industry culture—taste, vanity, partisanship, and exclusivity. In captivating detail, Eric Hoyt chronicles the histories of well-known trade papers (Variety, Motion Picture Herald) alongside important yet forgotten publications (Film Spectator, Film Mercury, and Camera!), and challenges the canon of film periodicals, offering new interpretive frameworks for understanding print journalism's relationship with the motion picture industry and its continued impact on creative industries today.

The Independent Film Experience Sep 16 2021 You see them on the video shelves, with titles such as Shadow Tracker, Psycho Girls, and The Blair Witch Project. Skeptically, perhaps, you rent one and slip it into the VCR. Hey, you think, this isn't so bad--sometimes actually quite good. Suddenly, you discover that there is a whole range of movies from filmmakers operating outside the studio system that have their own attractions that the big budget fare can't match. You have, of course, discovered the world of independent filmmaking. A fascinating group of independent film directors and producers, in interviews with the author, discuss their work and the state of the independent film industry at the end of the 20th century. Joe Bagnardi, Dennis Devine, Andrew Harrison, Jeff Leroy, Andrew Parkinson, Brett Piper, and 23 others cover such topics as the increased interest in independent films and how they are changing thanks to high-tech advances. These filmmakers vary widely in age, experience, formats and budgets--and choice of subject matter--but they all have a great passion for their work.
