Analyzing the Role of Citizen Science in Modern Research Nov 21 2021 As the need for sustainable development practices around the world continues to grow, it has become imperative for citizens to become actively engaged in the global transition. By evaluating data collected from various global programs, researchers are able to identify strategies and challenges in implementing civic engagement initiatives. Analyzing the Role of Citizen Science in Modern Research focuses on analyzing data on current initiatives and best practices in citizen engagement and education programs across various disciplines. Highlighting emergent research and application techniques within citizen science initiatives, this publication appeals to academicians, researchers, policy makers, government officials, technology developers, advanced-level students and program developers interested in launching or improving citizen science programs across the globe.

Science in the Media Jan 24 2022 This timely and accessible text shows how portrayals of science in popular media—including television, movies, and social media—influence public attitudes around messages from the scientific community, affect the kinds of research that receive support, and inform perceptions of who can become a scientist. The book builds on theories of cultivation, priming, framing, and media models while drawing on years of content analyses, national surveys, and experiments. A wide variety of media genres—from Hollywood blockbusters and prime-time television shows to cable news channels and satirical comedy programs, science documentaries and children's cartoons to Facebook posts and YouTube videos—are explored with rigorous social science research and an engaging, accessible style. Case studies on climate change, vaccines, genetically modified foods, evolution, space exploration, and forensic DNA testing are presented alongside reflections on media stereotypes and disparities in terms of gender, race, and other social identities. *Science in the Media* illuminates how scientists and media producers can bridge gaps between the scientific community and the public, foster engagement with science, and promote an inclusive vision of science, while also highlighting how readers themselves can become more active and critical consumers of media messages about science. *Science in the Media* serves as a supplemental text for courses in science communication and media studies, and will be of interest to anyone concerned with publicly engaged science.

Global Perspectives on Design Science Research Nov 02 2022 The LNCS series reports state-of-the-art results in computer science

research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS, including its subseries LNAI and LNBI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes -proceedings (published in time for the respective conference) -post-proceedings (consisting of thoroughly revised final full papers) -research monographs (which may be based on outstanding PhD work, research projects, technical reports, etc.) More recently, several color-cover sublines have been added featuring, beyond a collection of papers, various added-value components; these sublines include -tutorials (textbook-like monographs or collections of lectures given at advanced courses) -state-of-the-art surveys (offering complete and mediated coverage of a topic) -hot topics (introducing emergent topics to the broader community)

Applied Communication Research Methods Apr 26 2022 Applied Communication Research Methods: Getting Started as a Researcher demonstrates how to apply concepts to research problems, issues, projects, and questions that communication practitioners face every day. Recognizing that students engage more directly with research methods when they experience research through hands-on practice, authors Michael Boyle and Mike Schmierbach developed this text to demonstrate the relevance of research in professional roles and communication careers. Along with its distinctive approach to research methods instruction, this text also serves as an enhanced glossary and a superior reference. Students can easily navigate key concepts and terminology, which are linked to practical exercises within the context of the instruction. In-unit activities and features provide numerous opportunities to delve further into topics covered in class, including: Research in Depth - examples of a concept being used in scholarly research Reflect and React - thought-provoking problems and issues that promote reflection and discussion Voices from Industry - Q&As with professionals working in communication industries End-of-unit activities - exercises that reinforce concepts and content Online resources, including sample syllabi, test banks, and more, are available on the companion website: www.routledge.com/cw/boyle. Applied Communication Research Methods is a concise, engaging work that today's students and industry practitioners will embrace and keep on-hand throughout their careers.

Lean and Cleaner Production Jun 04 2020 This book explains how in moving towards Cleaner Production, the Lean Production Philosophy can be applied to reduce carbon emissions in prefabrication - one major source of the Greenhouse Gas (GHG) emissions which contribute to global climate change. This book examines theories and principles in the Lean Production Philosophy to develop situation-based carbon reduction strategies for precast concrete manufacturers and contractors in terms of Site layout, Supply Chain, Production, Stocks and Installation Management. It presents the empirical findings of surveys and case studies with managers and professionals working for precasters and contractors in Singapore, findings which provide good practical guidance for precast concrete manufacturers and contractors to achieve low carbon emissions and to perform better in many sustainability-based rating systems, such as the Singapore Green Labelling Scheme and the Building and Construction Authority (BCA) Green Mark Scheme.

Applied Mathematics for the Managerial, Life, and Social Sciences

May 16 2021 A traditional book with a modern feel, market-leading APPLIED MATHEMATICS FOR THE MANAGERIAL, LIFE, AND SOCIAL SCIENCES, Seventh Edition, teaches by application and uses real-world examples to motivate students. It combines solid theory with innovative technology, includes a robust supplement package, and offers unmatched flexibility that caters to both traditional and modern practitioners. Accessible for majors and non-majors alike, the Seventh Edition utilizes an intuitive approach that marries real-life instances to what would otherwise be abstract concepts. This is the focus of the insightful Portfolios, which highlight the careers of real people and discuss how they use math in their professions. Numerous exercises ensure that students have a solid understanding of concepts before advancing to the next topic. By offering a powerful array of supplements such as Enhanced WebAssign, the Seventh Edition enables students to maximize their study time and succeed in class. Data Science Advancements in Pandemic and Outbreak

Management Aug 26 2019 Pandemics are disruptive. Thus, there is a need to prepare and plan actions in advance for identifying, assessing, and responding to such events to manage uncertainty and support sustainable livelihood and wellbeing. A detailed assessment of a continuously evolving situation needs to take place, and several aspects must be brought together and examined before the declaration of a pandemic even happens. Various health organizations; crisis management bodies; and authorities at local, national, and international levels are involved in the management of pandemics. There is no better time to revisit current approaches to cope with these new and unforeseen threats. As countries must strike a fine balance between protecting health, minimizing economic and social disruption, and respecting human rights, there has been an emerging interest in lessons learned and specifically in revisiting past and current pandemic approaches. Such approaches involve strategies and practices from several disciplines and fields including healthcare, management, IT, mathematical modeling, and data science. Using data science to advance in-situ practices and prompt future directions could help alleviate or even prevent human, financial, and environmental compromise, and loss and social interruption via state-of-the-art technologies and frameworks. Data Science Advancements in Pandemic and Outbreak Management demonstrates how strategies and state-of-the-art IT have and/or could be applied to serve as the vehicle to advance pandemic and outbreak management. The chapters will introduce both technical and non-technical details of management strategies and advanced IT, data science, and mathematical modelling and demonstrate their applications and their potential utilization within the identification and management of pandemics and outbreaks. It also prompts revisiting and critically reviewing past and current approaches, identifying good and bad practices, and further developing the area for future adaptation. This book is ideal for data scientists, data analysts, infectious disease experts, researchers studying pandemics and outbreaks, IT, crisis and disaster management, academics, practitioners, government officials, and

students interested in applicable theories and practices in data science to mitigate, prepare for, respond to, and recover from future pandemics and outbreaks.

Illuminating the Path to Vibrant American Jewish Communities

Jun 16 2021 This book argues that the way to ensure that American Jewish life flourishes is to create vibrant local communities and that the ability to thrive will be won or lost in the trenches of each locality. For every generalization about the Jews of America, one can say, "maybe, but it depends where." In the United States, Jewish life is up close and personal where local variations on national themes make a huge difference. The author presents case studies using in-depth analysis of data from nine Jewish community studies to illuminate eleven critical American Jewish policy issues. The analysis is used to formulate a range of policy options for different types of communities. This book is for anyone who cares about the future of American Jewry. It should be of particular interest to the lay leaders and professionals who play a role in Jewish nonprofits. It is also of great interest to researchers and students of Jewish studies and Jewish communal service.

Chemistry + Student Solutions Manual Jul 26 2019 All general chemistry students face similar challenges, but they use their textbook differently to meet those challenges. Some read chapters from beginning to end, some consult the book as a reference, and some look to the book for problem-solving help. Chemistry, Fourth Edition supports all kind of learners, regardless of how they use the book, by helping them connect chemistry to their world, see that world from a molecular point of view, and become expert problem solvers. The Student's Solutions Manual contains solutions to all odd-numbered problems. To help students visualize approaches to problem-solving, the solutions manual contains original artwork. Much of this artwork has been integrated into the hints and feedback within SmartWork.

Design Science Research Methods and Patterns Oct 01 2022 Design research promotes understanding of advanced, cutting-edge information systems through the construction and evaluation of these systems and their components. Since this method of research can produce rigorous, meaningful results in the absence of a strong theory base, it excels in investigating new and even speculative technologies, offering

Place of Science in a World of Values and Facts Dec 23 2021 This is an engrossing book. It is also an unusual book: it is written by a scientist who is quite willing to talk about the softer side of life, about things such as love and respect and responsibility, and to try and position them in the context of his science. He is also willing to talk about religion, the manner in which it relates to science and science to it, and to attempt reconciliation of both. He sets himself a tough task, to tread the narrow path between the maudlin and the severely sober. In this, he is eminently successful. He is successful not because he aims at any grand synthesis, but because he has chosen the more modest path of simply laying out the cards on the table. This work is also unusual for another reason. The majority of books that attempt to explain science to a lay public, that try to describe its workings, its raison d'être, its hidden contents, its societal impact, its implications for our future, etc. , are written by theorists. This is hardly surprising. The theoretician, after all, is expected to think deeply, to be the great unifier, to be concerned with meaning. Very few books about science are written by scientists, ones who spend their time in a working experimental laboratory. This is such a book. And because it is, it is also a very different book.

Applied Design Science Research in the Context of Smart and

Sustainable Mobility Jul 30 2022 In this dissertation, the design of "information systems" (IS) for the future of mobility in form of smart, environmentally sustainable, flexible and dynamic mobility services are investigated. Specifically, the challenge of balancing vehicle supply and demand in shared vehicle services is addressed in a series of studies. One study includes the development of a taxonomy of vehicle relocation problems as a tool to describe them comprehensively and by this, facilitating a more precise solution development. The second study investigates the potential of IS in increasing the electric vehicle utilization in e-carsharing fleets that employs both electric and conventional vehicles. The third study includes the design and implementation of an IS that enables carsharing providers to construct pricing areas, which are designed to influence customer rental behavior. The fourth study addresses the vehicle supply and demand problem in services which provide autonomous driving vehicles for its customers,

e.g. self-driving taxis, by adapting concepts from carsharing literature. Lastly, the gathered insights from applying design-oriented research in various research projects and contexts are formulized in study five. It provides a research framework, method and publication schema for practical and iterative design-oriented research. Thus, the presented research addresses topics of smart and sustainable mobility as well as foundations of design-oriented research.

American Public Opinion toward Israel Mar 14 2021 This book examines trends in American public opinion about Israel in over 75 years, from 1944 to 2019. Analyzing data from hundreds of surveys in jargon-free writing, the authors show that public support for Israel has seen a dramatic shift toward increased division between partisan and select demographic groups, elaborating on the implications that this important change may have for the countries' special relationship. Scholars and students of American foreign policy, public opinion, Middle East politics and international relations, as well as policy analysts, policymakers, journalists and anyone interested in American policy toward Israel, will want to read this book. Special Features An Online Appendix including all surveys used throughout the book. A Roper Center-approved Data Tool that allows readers to create their own figures based on data used in the book:

The New ABCs of Research Apr 14 2021 The problems we face in the 21st century require innovative thinking from all of us. Be it students, academics, business researchers of government policy makers. Hopes for improving our healthcare, food supply, community safety and environmental sustainability depend on the pervasive application of research solutions. The research heroes who take on the immense problems of our time face bigger than ever challenges, but if they adopt potent guiding principles and effective research lifecycle strategies, they can produce the advances that will enhance the lives of many people. These inspirational research leaders will break free from traditional thinking, disciplinary boundaries, and narrow aspirations. They will be bold innovators and engaged collaborators, who are ready to lead, yet open to new ideas, self-confident, yet empathetic to others. In this book, Ben Shneiderman recognizes the unbounded nature of human creativity, the multiplicative power of teamwork, and the catalytic effects of innovation. He reports on the growing number of initiatives to promote more integrated approaches to research so as to promote the expansion of these efforts. It is meant as a guide to students and junior researchers, as well as a manifesto for senior researchers and policy makers, challenging widely-held beliefs about how applied innovations evolve and how basic breakthroughs are made, and helping to plot the course towards tomorrow's great advancements.

Human Benefit through the Diffusion of Information Systems

Design Science Research Sep 07 2020 This book constitutes the proceedings of the 2010 Joint International Working Conference of the International Federation for Information Processing Working Groups 8.2 and 8.6. Both working groups are part of IFIP Technical Committee 8, the technical committee addressing the field of Information Systems. IFIP WG 8.2, the International Federation of Information Systems and Organizations, was established in 1977. IFIP WG 8.6, Diffusion, Transfer and Implementation of Information Technology, was established in 1994. In accordance with their respective themes, both IFIP WG 8.2 and IFIP WG 8.6 have long had an interest in the human impact of information systems. In December 1998, they held a joint working conference in Helsinki, Finland, on the theme "Information Systems: Current Issues and Future Challenges." The two working groups' joint interest in and collaboration on research concerning the human side of IS is continued and extended through this joint working conference, held on the campus of Curtin University of Technology, from March 30 to April 1, 2010, in Perth, Western Australia. This conference, "Human Benefit Through the Diffusion of Information Systems Design Science Research," combines the traditional themes of the two working groups with the growing interest within the IS research field in the area of design science research.

It contains contributions from sustainability researchers from across the world.

Changing Face of Information: Support Services for Scientific Research Oct 28 2019 The health of scientific enterprise has become a critical political and social issue as nation states tackle austerity, diversity, global challenges, whilst simultaneously supporting a competitive and innovative national economy. A key asset in achieving such ambitions is for a scholarly information system which enables the fruits of the research effort to be disseminated efficiently. As the information support system struggles with adapting from a print-based to a digital process, the dysfunctionality current within STEM publishing in particular becomes evident. New ways of supporting research are emerging which require a new approach to publishing, an approach which takes on board the many demographic, social, technical and administrative changes taking place in both science itself and society. A radical strategic assessment is required and this book tracks key aspects required for any new future strategy. This book provides a catalogue of issues to which a future STEM information industry will need to adapt. They range from the effects of technology on the neurological processes of research to the growing use of technology to speed up the exchange of information among groups and laboratories; from considerations about quality control yet maintaining intellectual ownership; from changing from an elitist STEM system favouring academics to a more democratic process with wider appeal. There is the neglected non-academic market and its need to share in the results of the research effort, often through partnership and being part of a 'hive mind'. This is the large world of the unaffiliated knowledge workers, of which academia is numerically but a small part. The many changes taking place in scholarly information dictate that the future is unlikely to be a smooth and gradual evolution from the past. Radical new approaches are required, a revolution which takes on board the perfect storm of changes listed in this book. Just as such changes have changed the face of industries such as music and retail in recent years, so similar dramatic changes are likely to result in a restructuring of STEM into a more technologically-focused industry within the next decade. The implications for the current STEM stakeholders are profound.

Design Science Research Sep 19 2021 Consolidating existing knowledge in Design Science, this book proposes a new research method to aid the exploration of design and problem solving within business, science and technology. It seeks to overcome a dichotomy that exists in the field between theory and practice to enable researchers to find solutions to problems, rather than focusing on the explanation and exploration of the problems themselves. Currently, researchers concentrate on to describing, exploring, explaining and predicting phenomena, and little attention is devoted to prescribing solutions. Herbert Simon proposes the need to develop a Science of the Artificial (Design Science), arguing that our reality is much more artificial than natural. However, the research conducted on the Design Science premises has so far been scattered and erratic in different fields of research, such as management, systems information and engineering. This book aims to address this issue by bringing these fields together and emphasising the need for solutions. This book provides a valuable resource to students and researchers of research methods, information systems, management and management science, and production and operations management.

Design Science Research in Information Systems: Advances in Theory and Practice Sep 27 2019 This book constitutes the refereed proceedings of the 7th International Conference on Design Science Research in Information Systems and Technology, DERIST 2012, held in Las Vegas, NV, USA, in May 2012. The 24 revised full papers presented together with 7 revised short papers were carefully reviewed and selected from 44 submissions. The papers are organized in topical sections on DSRIS in practice, DSRIS methodologies and techniques, social and environmental aspects of DSRIS, theory and theory building in DSRIS, and evaluation of DSRIS projects.

Service-Oriented Perspectives in Design Science Research Mar 26 2022 This book constitutes the refereed proceedings of the 6th International Conference on Service-Oriented Perspectives in Design Science Research, DERIST 2011, held in Milwaukee, WI, USA, in May 2011. The 29 revised full papers presented together with 5 revised short papers were carefully reviewed and selected from 50 submissions. The papers are organized in topical sections on design theory, design science research strategies, design methods and techniques, design evaluation, design guidelines, service-oriented perspectives in design science, process design, neuroscience in design research, and designing for social media.

The Challenge of Change in Africa's Higher Education in the 21st Century Dec 11 2020 The Challenge of Change in Africa's Higher Education in the 21st Century brings the reader face to face with the mega challenges and key opportunities in Africa's higher education sector in the twenty-first century. Mwenda and Muuka are two of Africa's emergent scholars, with 20 published books and over 100 articles published in peer-reviewed journals between them as of 2008. Authors who are diverse in their knowledge and experience of the complexities of education in Africa join Mwenda and Muuka in this treatise, which traverses the higher education milieu on the continent from Cape Town in South Africa to Lagos in Nigeria. Stated simply, those who have long called for a new generation of scholars on education in Africa will find a healthy and refreshing answer in The Challenge of Change in Africa's Higher Education in the 21st Century. The motivation for this book was the editors' recognition of gaps in the current understanding of higher education in Africa. The book has clear advantages and defining features over other books on higher education on the continent in the following respects. The Challenge of Change in Africa's Higher Education in the 21st Century is a book written from and with twenty-first century realities, making it a significant addition to the continuing and urgent search for solutions to the continent's development dilemma. It is therefore critical reading and research material for many stakeholders including students, professors, universities, and research libraries on the one hand and higher education ministries in Africa on the other. The role of international development agencies and non-governmental organizations towards enhancement of higher education in Africa cannot be overemphasized.

1975 National Science Foundation Authorization, Hearings Before the Subcommittee on Science, Research, and Development of ..., 93-2, March 12, 13, 14, 15, 19, 1974 Feb 22 2022

Global Change and Future Earth Jun 24 2019 Global Change and Future Earth is derived from the work of several programs of the International Union of Geodesy and Geophysics (IUGG). It demonstrates how multi- and inter-disciplinary research outputs from the geoscience community can be applied to tackle the physical and societal impacts of climate change and contribute to the Future Earth programme of the International Council for Science. The volume brings together an international team of eminent researchers to provide authoritative reviews on the wide-ranging ramifications of climate change spanning eight key themes: planetary issues; geodetic issues; the Earth's fluid environment; regions of the Earth; urban environments; food security; and risk, safety and security; and climate change and global change. Covering the challenges faced by urban and rural areas, and in both developed and developing countries, this volume provides an important resource for a global audience of graduate students and researchers from a broad range of disciplines, as well as policy advisors and practitioners.

Research Design in Political Science Oct 09 2020 When embarking on a new research project students face the same core research design issues. This volume provides readers with practical guidelines for both qualitative and quantitative designs, discusses the typical trade-offs involved in choosing them and is rich in examples from actual research. *Das Marketing als Hilfsmittel zur Überwindung von Liquiditätskrisen in Banken: Möglichkeiten - Grenzen - Handlungsempfehlungen* Dec 31 2019 Seit dem Jahr 2007 kämpfen sowohl Regierungen als auch Unternehmen gegen die Auswirkungen der Finanzkrise. Der daraus resultierende Vertrauensverlust auf Kundenseite in das Bankensystem konnte bis heute nicht aufgefangen werden. Zu dem Vertrauensverlust kommt ein verändertes Verbraucherverhalten hinsichtlich der getätigten

Investitionen und der eingegangenen Risiken. Somit hat sich auch das Nachfrageverhalten von Seiten der Kunden verändert. Da davon ausgegangen werden kann, dass eine wechselseitige Beziehung zwischen dem Verhalten der Kunden und der Intensität einer Krise für Banken zu erkennen ist, gilt es in dieser Arbeit zu prüfen, inwieweit Marketingmaßnahmen an existenzbedrohliche Phasen einer Krise unter besonderer Berücksichtigung der Liquiditätskrise angepasst werden können und ob es möglich ist, gezielt Marketingmaßnahmen zu nutzen, um die Intensität der Krisenauswirkungen auf eine Bank abzuschwächen.

Congress and U.S. Veterans: From the GI Bill to the VA Crisis Mar 02 2020 Providing a compelling look at veterans' policy, this book describes why the Republican party is considered the party for veterans despite the fact that Congressional Democrats are responsible for a greater number of policy initiatives. • Includes content from nearly 20,000 e-newsletters sent from Congress members to constituents to demonstrate the differences in how Congress discusses and legislates veterans' issues • Provides a detailed description of the key legislative players, proposals, and communication strategies surrounding veterans' policies • Offers advice on providing for the future of veterans' policies and describes the risks and benefits associated with moving veterans' care into private industry • Offers the first in-depth case study on the implementation of the post-9/11 GI bill • Suggests the scandal surrounding the 2010 Phoenix VA hospital is an example of partisan differences in communication tactics

United States Income, Wealth, Consumption, and Inequality Jul 18 2021 Over the past 75 years, household income in the United States has increased substantially. Still, by some measures, income inequality has increased as well. This has been the subject of contested public policy and political discourse. The question still stands: How can we better articulate the nuanced changes in American incomes? It is difficult to have conversations about income inequality without an agreed-upon set of terms, metrics, and concepts. *United States Income, Wealth, Consumption, and Inequality*, edited by Diana Furchtgott-Roth, examines the trends in income growth in the United States and explores various measures of income, including market, post-tax, and post-transfer income. Within each chapter, distinguished experts explain how income and wealth--and the way we measure them--have changed in the United States, which demographic groups have benefited from these changes, and how mobility has changed over time and over generations. Specific chapters explain the roles of gender and race. The resulting book is relevant to modern international policy, particularly in light of the COVID-19 pandemic, and addresses what can be done to increase economic mobility in the United States.

The Social Scientific Study of Jewry Jan 12 2021 Continuing its distinguished tradition of focusing on central political, sociological, and cultural issues of Jewish life in the last century, this latest volume in the annual *Studies in Contemporary Jewry* series focuses on how Jewry has been studied in the social science disciplines. Its symposium consists of essays that discuss sources, approaches, and debates in the complementary fields of demography, sociology, economics, and geography. The social sciences are central for the understanding of contemporary Jewish life and have engendered much controversy over the past few decades. To a large extent, the multitude of approaches toward Jewish social science research reflects the nature of population studies in general, and that of religions and ethnic groups in particular. Yet the variation in methodology, definitions, and measures of demographic, socioeconomic, and cultural patterns is even more salient in the study of Jews. Different data sets have different definitions for what is "Jewish" or "who is a Jew." In addition, Jews as a group are characterized by high rates of migration, including repeated migration, which makes it difficult to track any given Jewish population. Finally, the question of identification is complicated by the fact that in most places, especially outside of Israel, it is not clear whether "being Jewish" is primarily a religious or an ethnic matter - or both, or neither. This volume also features an essay on American Jewry and North African Jewry; review essays on rebuilding after the Holocaust, Nazi war crimes trials, and Jewish historiography; and reviews of new titles in Jewish studies.

Measuring Supply Management's Budget Effects Aug 07 2020 Based on practice-oriented and practice-relevant research methods, Anna Quitt, designs an integrated process for measuring supply management's budget effects and develops Return on Spend as an innovative financial effectiveness indicator.
