The River of Doubt Aug 19 2021 NATIONAL BESTSELLER • At once an incredible adventure narrative and a penetrating biographical portrait—the bestselling author of *Destiny of the Republic* brings us the true story of Theodore Roosevelt's harrowing exploration of one of the most dangerous rivers on earth. The River of Doubt—it is a black, uncharted tributary of the Amazon that snakes through one of the most treacherous jungles in the world. Indians armed with poison-tipped arrows haunt its shadows; piranhas glide through its waters; boulder-strewn rapids turn the river into a roiling cauldron. After his humiliating election defeat in 1912, Roosevelt set his sights on the most punishing physical challenge he could find, the first descent of an unmapped, rapids-choked tributary of the Amazon. Together with his son Kermit and Brazil's most famous explorer, Cândido Mariano da Silva Rondon, Roosevelt accomplished a feat so great that many at the time refused to believe it. In the process, he changed the map of the western hemisphere forever. Along the way, Roosevelt and his men faced an unbelievable series of hardships, losing their canoes and supplies to punishing whitewater rapids, and enduring starvation, Indian attack, disease, drowning, and a murder within their own ranks. Three men died, and Roosevelt was brought to the brink of suicide. The River of Doubt brings alive these extraordinary events in a powerful nonfiction narrative thriller that happens to feature one of the most famous Americans who ever lived. From the soaring beauty of the Amazon rain forest to the darkest night of Theodore Roosevelt's life, here is Candice Millard's dazzling debut.

Molecules of Nature Jan 30 2020 Molecules of nature are created by living organisms in their quest to survive and thrive in Earth's challenging environments. This ages-old evolutionary struggle has produced an immense library of chemicals from which humans have selected invaluable therapeutics critical to modern medicine. Natural products presently provide half of all prescription medications and 70% of all cancer drugs. The success of continued drug development from natural products depends upon the diversity of molecules of nature, which in turn depends upon biodiversity. Unfortunately, human-caused damage to the environment, from pollution to habitat loss to overexploitation of resources, is causing unprecedented ecological damage and death of species: a mass extinction event. Unless this biotic crisis is obviated, humanity will lose a primary source of future novel medicines. This book assembles a powerful argument for nature's critical role in providing medicines for humanity and how that irreplaceable service is threatened by the extinction crisis. A sampling of the molecules of nature employed in modern medicine reads like a catalog of biodiversity. For example, one of the most prescribed drugs in the United States is lisinopril, which controls high blood pressure. Lisinopril originated from the venom of a deadly viper from the Amazonian forests. A denizen of US southwestern deserts provided a therapeutic for type-II diabetes. The ancient horseshoe crab of the US Atlantic coast enables a critical test for deadly endotoxins in medical products of all kinds. Once, a diagnosis of acute lymphocytic leukemia in children was a death sentence. A tropical flower from Madagascar provided two natural products that changed a 90% fatality rate to a 90% cure rate. The Pacific Yew tree from the US northwest was discovered to contain the potent anticancer agent Taxol, now vital in the treatment of breast and ovarian cancers and Kaposi's sarcoma. This book tells the fascinating story of these and other medicines. It also summarizes some of the driving forces of the Sixth Mass Extinction and shows how it threatens at least half of the planet's species with extinction. We rightly ask: What will be the future of medicine without the contribution of millions of species? How many treatments for disease will be forever lost? What cures are we asking future generations to forgo? As we willy-nilly extinguish the future of one organism after another together with all the knowledge they hold, we are like the looters of the Great Library of Alexandria. The final chapter challenges readers to pursue a different outcome: By uniting our efforts, we can still preserve many of the remaining species on our blue-green planet and the invaluable gifts they offer.

Das Geräusch der Dinge beim Fallen Apr 26 2022 Bogotá, Kolumbien, im Sommer 2009: Der Jura-Professor Antonio Yammara liest in der Zeitung von einem Nilpferd, das aus dem ehemaligen Privatzoo des legendären Drogenkönigs Pablo Escobar entflohen ist. Unmittelbar fühlt er sich in die Zeit zurückversetzt, als der Krieg zwischen Escobars Medellín-Kartell und den Regierungstruppen auf Kolumbiens Straßen eskalierte. Damals musste er hautnah miterleben, wie ein Freund ermordet wurde. Noch Jahre später quälen ihn die Erinnerungen. Bei seinen Nachforschungen über den Mord entdeckt Antonio, wie stark sein eigenes Leben und das seines Freundes von der gewaltsamen Vergangenheit des Landes bestimmt wurden. Das Geräusch der "Dinge beim Fallen" ist eine preisgekrönte Tour de Force und ein intimes Porträt einer Generation, die der Drogenhandel in einem lebendigen Albtraum gefangen hielt. Für diesen großen Roman wurde Juan Gabriel Vásquez mit dem mit \$ 175.000 dotierten "Premio Alfaguara de novela" ausgezeichnet.

Ecopsychology Mar 02 2020 An ecopsychology that integrates our totemic selves—our kinship with a more than human world—with our technological selves. We need nature for our physical and psychological well-being. Our actions reflect this when we turn to beloved pets for companionship, vacation in spots of natural splendor, or spend hours working in the garden. Yet we are also a technological species and have been since we fashioned tools out of stone. Thus one of this century's central challenges is to embrace our kinship with a more-than-human world—"our totemic self"—and integrate that kinship with our scientific culture and technological selves. This book takes on that challenge and proposes a reenvisioned ecopsychology. Contributors consider such topics as the innate tendency for people to bond with local place; a meaningful nature language; the epidemiological evidence for the health benefits of nature interaction; the theory and practice of ecotherapy; Gaia theory; ecovillages; the neuroscience of perceiving natural beauty; and sacred geography. Taken together, the essays offer a vision for human flourishing and for a more grounded and realistic environmental psychology.

Floating Off the Page Jun 24 2019 On any given day, millions of Wall Street Journal readers put aside the serious business and economic news of the day to focus first on the paper's middle column (a.k.a. the A-hed), a virtual sound-bubble for light literary fare -- a short story, a tall tale, an old yarn, a series of vignettes, and other unexpected delights that seem to "float off the page." In this first-ever compendium of middle-column pieces, you'll find an eclectic selection of writings, from the outlandish to the oddly enlightening. Read about: • one man's attempt to translate the Bible into Klingon • sheep orthodontics, pet-freezing, and toad-smoking • being hip in Cairo, modeling at auto shows, piano-throwing • the fate of mail destined for the World Trade Center after 9/11 • the plight of oiled otters in Prince William Sound ...and much, much more. Edited by 20-year Journal veteran Ken Wells, and with a foreword by Liar's Poker author Michael Lewis, *Floating Off the Page* is the perfect elixir for fans of innovative prose in all its forms and function.

Der General in seinem Labyrinth May 28 2022 Sein Denkmal steht in fast jeder Stadt Lateinamerikas. Ein Staat, eine Währung, Straßen und Plätze sind nach ihm benannt. Simón Bolívar, der General und Held des Unabhängigkeitskrieges der südamerikanischen Kolonien gegen die spanische Krone, wird noch heute als der Libertador, der Befreier, verehrt. Der Bürgerssohn aus Caracas mit einem Schuß Mulattenblut in den Adern, der sich in Rom, Paris, London auskannte und in den Salons seiner Zeit glänzte, der Tausende von Büchern las, überquerte mehrfach die Anden und ritt mit seinen Soldaten Tausende von Meilen durch den Kontinent, um seine Vision von einem befreiten und vereinigten Südamerika zu verwirklichen. Er schrieb unermüdlich Briefe, persönliche und politische, er konnte ebenso unnachahmlich fechten wie tanzen und war ein unwiderstehlicher Bewunderer schöner Frauen. Über 10 Jahre erlebte er als Präsident des von ihm geschaffenen Staates Kolumbien die Höhen des Ruhms, aber auch die Niederungen korrumpierender Macht und die Angriffe seiner Gegner. 1830 erklärte Bolívar in Santa Fe de Bogota seinen Rücktritt. "Wer sich einer Revolution verschreibt, pflügt das Meer", sagte er bitter am Ende seines Lebens, als der Traum von der Einheit zerstoßen war und er schwerkrank mit wenigen Getreuen den Magdalena-Strom hinab zur Karibik fuhr, um möglicherweise ins Exil zu gehen. Gabriel García Márquez beschreibt in seinem Roman diese letzte Reise des 47jährigen Bolívar. In Rückblenden läßt er noch einmal den glorreichen Libertador auftreten, holt aber auch den General vom Denkmalssockel herunter und zeigt in einem spannungsreichen Geflecht historischer Ereignisse den Menschen in seinem körperlichen und seelischen Verfall, im Labyrinth seiner Leiden und verlorenen Träume.

Leben, um davon zu erzählen Mar 26 2022 Die Memoiren von Gabriel García Márquez - "Klassiker zu Lebzeiten" FAZDer erste Teil der Memoiren von Gabriel García Márquez sind ein Welterfolg. Die Erstauflage von über einer Million Exemplaren war in der spanischsprachigen Welt schnell vergriffen. Die deutsche Ausgabe stand sofort auf allen Bestsellerlisten. _ Leben, um davon zu erzählen_ ist ein großes Buch, das nicht nur bewegt und begeistert, sondern Lust macht, die Romane und Erzählungen des Nobelpreisträgers zu lesen oder wieder – und wieder – zu lesen. "Nicht was wir gelebt haben, ist das Leben, sondern das, was wir erinnern und wie wir es erinnern, um davon zu erzählen." Und so erzählt Gabriel García Márquez diesem Motto seines Buches folgend vom Leben seiner Eltern, denen er in Die Liebe in den Zeiten der Cholera ein Denkmal setzte, von der eigenen Kindheit und Jugend. Er erzählt von großer Armut und wilden Liebesabenteuern, von Freunden fürs Leben und der Leidenschaft für die Literatur.

The Clouded Leopard Feb 10 2021 For many years and through many of the world's most remote regions, Wade Davis has traveled in search of the rare places where cultural diversity survives, untainted by the influences of globalization and modernization. The Clouded Leopard brings together the extraordinary travels that sprang from this quest. His travels emphasize the fragility of the planet yet also illuminate the places and people where the bond between landscape and spirit is preserved. Beautiful and disturbing, tragic and yet hopeful, his work sends out a timely message that cannot be ignored.

Magdalena Oct 01 2022 A captivating new book from Wade Davis--award-winning, best-selling author and National Geographic Explorer-in-Residence for more than a decade--that brings vividly to life the story of the great Río Magdalena, illuminating Colombia's complex past, present, and future Travelers often become enchanted with the first country that captures their hearts and gives them license to be free. For Wade Davis, it was Colombia. Now in a masterly new book, Davis tells of his travels on the mighty Magdalena, the river that made possible the nation. Along the way, he finds a people who have overcome years of conflict precisely because of their character, informed by an enduring spirit of place, and a deep love of a land that is home to the greatest ecological and geographical diversity on the planet. As Gabriel García Márquez once wrote during his own pilgrimage on the river: "The only reason I would like to be young again would be the chance to travel again on a freighter going up the Magdalena." Only in Colombia can a traveler wash ashore in a coastal desert, follow waterways through wetlands as wide as the sky, ascend narrow tracks through dense tropical forests, and reach verdant Andean valleys rising to soaring ice-clad summits. This rugged and impossible geography finds its perfect coefficient in the topography of the Colombian spirit: restive, potent, at times placid and calm, in moments explosive and wild. Both a corridor of commerce and a fountain of culture, the wellspring of Colombian music, literature, poetry, and prayer, the Magdalena has served in dark times as the graveyard of the nation. And yet, always, it returns as a river of life. At once an absorbing adventure and an inspiring tale of hope and redemption, Magdalena gives us a rare, kaleidoscopic picture of a nation on the verge of a new period of peace. Braiding together memoir, history, and journalism, Wade Davis tells the story of the country's most magnificent river, and in doing so, tells the epic story of Colombia.

River Notes Oct 21 2021 Plugged by no fewer than twenty-five dams, the Colorado is the world's most regulated river drainage. The Colorado River provides most of the water supply of Las Vegas, Tucson, and San Diego, and much of the power and water of Los Angeles and Phoenix, cities that are home to more than 25 million people. If it ceased flowing, the water held in its reservoirs might hold out for three to four years, but after that it would be necessary to abandon most of southern California and Arizona, and much of Colorado, New Mexico, Utah and Wyoming. For the entire American Southwest the Colorado is indeed the river of life, which makes it all the more tragic and ironic that by the time it approaches its final destination, it has been reduced to a shadow upon the sand, its delta dry and deserted, its flow a toxic trickle seeping into the sea. In this remarkable blend of history, science, and personal observation, acclaimed author Wade Davis tells the story of America's Nile, how it once flowed freely and how human intervention has left it near exhaustion, altering the water temperature, volume, local species, and shoreline of the river Theodore Roosevelt once urged us to "leave it as it is." Yet despite a century of human interference, Davis writes, the splendor of the Colorado lives on in the river's remaining wild rapids, quiet pools, and sweeping canyons. The story of the Colorado River is the human quest for progress and its inevitable if unintended effects—and an opportunity to learn from past mistakes and foster the rebirth of America's most iconic waterway. A beautifully told story of historical adventure and natural beauty, *River Notes* is a fascinating journey down the river and through mankind's complicated and destructive relationship with one of its greatest natural resources.

Wild Earth, Wild Soul Sep 27 2019 Humankind has the capacity and know-how to create Earth-honoring cultures in a new way for new times. Through tapping into ancestral memories, taking what's best from the human potential movement, and collaborating with present day indigenous peoples we can find our way home. Practicing the key ingredients of a lasting culture is an ecstatic way to live. This book shows you how.

The Wayfinders Jun 28 2022 Every culture is a unique answer to a fundamental question: What does it mean to be human and alive? In *The Wayfinders*, renowned anthropologist, winner of the prestigious Samuel Johnson Prize, and National Geographic Explorer-in-Residence Wade Davis leads us on a thrilling journey to celebrate the wisdom of the world's indigenous cultures. In Polynesia we set sail with navigators whose ancestors settled the Pacific ten centuries before Christ. In the Amazon we meet the descendants of a true lost civilization, the Peoples of the Anaconda. In the Andes we discover that the earth really is alive, while in Australia we experience Dreamtime, the all-embracing philosophy of the first humans to walk out of Africa. We then travel to Nepal, where we encounter a wisdom hero, a Bodhisattva, who emerges from forty-five years of Buddhist retreat and solitude. And finally we settle in Borneo, where the last rainforest nomads struggle to survive. Understanding the lessons of this journey will be our mission for the next century. For at risk is the human legacy -- a vast archive of knowledge and expertise, a catalogue of the imagination. Rediscovering a new appreciation for the diversity of the human spirit, as expressed by culture, is among the central challenges of our time.

The Ethnopoetics of Shamanism Nov 29 2019 Over the last century, Western portrayals of shamanism have changed radically toward an ethnopoetics of shamanism. While shamanic practices had long been indirectly registered by Westerners, it is only since the late nineteenth century that they have taken on symbolic import within discourses of primitivism and debates over magic and rationality.

The Bloomsbury Handbook of Religion and Nature Oct 28 2019 Divided into four parts—Earth, Air, Fire, and Water—this book takes an elemental approach to the study of religion and ecology. It reflects recent theoretical and methodological developments in this field which seek to understand the ways that ideas and matter, minds and bodies exist together within an immanent frame of reference. The Bloomsbury Handbook of Religion and Nature focuses on how these matters materialize in the world around us, thereby addressing key topics in this area of study. The editors provide an extensive introduction to the book, as well as useful introductions to each of its parts. The volume's international contributors are drawn from the USA, South Africa, Netherlands, Norway, Indonesia, and South Korea, and offer a variety of perspectives, voices, cultural settings, and geographical locales. This handbook shows that human concern and engagement with material existence is present in all sectors of the global community, regardless of religious tradition. It challenges the traditional methodological approach of comparative religion, and argues that globalization renders a comparative religious approach to the environment insufficient.

Grand Canyon Oct 09 2020 Set against the majestic backdrop of one of the world's natural wonders, this book is a stunning photographic journey along the Colorado River, with commentary from river expert and acclaimed author Wade Davis.

Sufficiently Robust Jul 06 2020 William Cathcart-Rake shares his memories of a half-century of hiking in the Grand Canyon. During that time he spent sixty days and walked five hundred miles below the rim. As he recounts his thoughts and experiences of eighteen separate treks below the rim, he includes many fascinating facts about the Canyons natural and human history. As the years go by, the author discovers that the Canyon has more to offer than just being a challenging place to hike—it becomes a sanctuary for reflection and renewal. His time in the canyon is more than days below the rim, miles walked, switchbacks negotiated, stream crossings, walking speed, and pounds carried. Conquering the canyonan impossible and foolish quest ceased to be a goal. He returned to the canyon because of the effect it had on him, not because of what he could do in it or to it. The canyon allowed him to discover his ability to persevere despite discomfort, afforded an opportunity to learn more about the natural world we live in, and gave him a deeper appreciation of the need to seek the solace afforded by sauntering below the rim.

Into The Silence Nov 21 2021 WINNER OF THE 2012 SAMUEL JOHNSON PRIZE A monumental work of history, biography and adventure - the First World War, Mallory and Mount Everest 'The price of life is death' For Mallory, as for all of his generation, death was but 'a frail barrier that men crossed, smiling and gallant, every day'. As climbers they accepted a degree of risk unimaginable before the war. What mattered now was how one lived, and the moments of being alive. While the quest for Mount Everest may have begun as a grand imperial gesture, it ended as a mission of revival for a country and a lost generation bled white by war. In a monumental work of history and adventure, Davis asks not whether George Mallory was the first to reach the summit of Everest, but rather why he kept climbing on that fateful day.

The Answer Is Still No Dec 31 2019 The Answer Is Still No is an important, urgent book that compiles interviews with people who live along the route of the proposed Enbridge pipeline in Northern British Columbia. The oil pipeline and supertankers – linking the tar sands of Alberta to the demand of the growing Asian market – are a key component of Canada's strategy of natural resource extraction. But for the people living along the proposed pipeline route, Enbridge poses a massive environmental risk, which threatens their way of life. This edited collection takes the passionate words and voices of twelve citizens and activists and results in one powerful position when it comes to blind economic development at the expense of our environment and communities: The answer is still "no."

One River Nov 02 2022 From the author of INTO THE SILENCE, winner of the Samuel Johnson Prize for Non-Fiction In 1941, Richard Evans Schultes took a leave of absence from Harvard University and disappeared into the Northern Amazon of Colombia. The world's leading authority on the hallucinogens and medicinal plants of the region, he returned after twelve years of travelling through South America in a dug-out canoe, mapping uncharted rivers, living among local tribes and documenting the knowledge of shamans. Thirty years later, his student Wade Davis landed in Bogota to follow in his mentor's footsteps – so creating an epic tale of undaunted adventure, a compelling work of natural history and a testament to the spirit of scientific exploration.

California Dreaming Dec 11 2020 California matters, both as a place and as an idea. What famed historian Kevin Starr has called "the California Dream" is a vital part of American self-understanding. Just as America was meant to be a place of renewal, even redemption, for Europe, so too California was intended as a place of renewal for America. Therefore, California—place and idea—provides a fertile ground for scholars to think deeply about what it means to articulate "the promise of American life." This book follows in the train of George Marsden's classic *The Outrageous Idea of Christian Scholarship*—believing that people of faith have a contribution to make to scholarship—and of Jay Green's more recent book, *Christian Historiography: Five Rival Views*—believing that scholars of faith should engage in moral inquiry. In this book, eight authors inquire into the moral questions that emerge from studying California.

DuMont Reiseabenteuer: Im Schatten der Seidenstraße, Entlang der historischen Handelsroute von China nach Kurdistan Jun 16 2021 Eine große historische Handelsroute ganz neu erlebt In Bussen, Zügen, klapprigen Taxis und Geländewagen, auf Eselskarren und Kamelen folgt Colin Thubron dem Verlauf der ältesten und berühmtesten aller historischen Handelsrouten. Im Herzen Chinas beginnend, steigt sie auf in die zentralasiatischen Gebirgsmassive, führt durch Uiguren-Land, durch Usbekistan, Kirgisistan und Afghanistan und zieht sich schließlich durch die weiten Ebenen des Iran und den kurdischen Teil der Türkei bis ins alte Antiochia am Mittelmeer. In sieben Monaten legt Colin Thubron mehr als elftausend Kilometer zurück. Mit Zähigkeit und bewundernswertem Durchhaltevermögen meistert er die Strapazen seiner geradezu epischen Reise. Den Rucksack nur mit dem Nötigsten gefüllt, das Geld in einer leeren Flasche Mückenschutzmittel versteckt, Sandstürmen, Schnee und Hitze trotzend, sucht er nach den Spuren einer Jahrtausende alten Geschichte und ist immer und überall ein sensibler Beobachter, neugieriger Gesprächspartner und glänzender Erzähler, der sich auf die Menschen, denen er begegnet, einlässt und ihre Identität erspürt. Das Werk zeigt Thubrongs tiefe Passion für die Belange und die Geschichte einer Weltgegend, die uns weithin unbekannt ist.

Wade Davis Photographs Jan 24 2022 A fascinating photographic journey to indigenous cultures around the world by renowned anthropologist Wade Davis. Anthropologist and best-selling author Wade Davis has traveled the world, befriending indigenous peoples on every continent and engaging in their spiritual lives and practices. To him, no culture is primitive—every daily habit, every ritual, every ceremony expresses the human genius. In this book he takes us into the heart of 20 different world cultures, from the ancient salt mines of the Sahara to the icy world of the Inuit, from the pastoral nomads of Mongolia to the dreaming Aboriginals of Australia. Through sensitive text and revealing photos, enter what Davis calls our "ethnosphere": the extraordinary matrix of cultures thriving on this planet.

Historical Dictionary of the Civil War Sep 19 2021 The Civil War was the most traumatic event in American history, pitting Americans against one another, rending the national fabric, leaving death and devastation in its wake, and instilling an anger that has not entirely dissipated even to this day, 150 years later. This updated and expanded two-volume second edition of the *Historical Dictionary of the Civil War* relates the history of this war through a chronology, an introductory essay, an extensive bibliography, and hundreds of cross-referenced dictionary entries on persons, places, events, institutions, battles, and campaigns. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Civil War.

Tree of Rivers Apr 14 2021 Amazonia contains by far the world's largest river and the greatest expanse of tropical rain forest, home to the greatest biological diversity on the planet. This enthralling book brilliantly explains why the rain forest is crucial for our planet's survival, and vividly describes the passionate struggles that have taken place to utilize, protect and understand it. John Hemming's thrilling account recalls the adventures and misadventures of intrepid explorers, Jesuits and the rubber barons who enslaved thousands of Indians. It also tells of nineteenth-century botanists, humanitarians and advocates for Indian rights, as well as the archaeologists and anthropologists who have uncovered the secrets of early man here. Hemming also describes the Amazon's flora, fauna and natural beauty, all now under threat as the forests are destroyed to feed our appetite for timber, beef and soya.

Rivers Jul 26 2019 Explores how these rivers (the planet's two longest rivers, which flow through African deserts and Amazon jungles) came to exist, their place in history, what makes each unusual, and environmental challenges.

Light at the Edge of the World Aug 31 2022 For more than 30 years, renowned anthropologist Wade Davis has traveled the globe, studying the mysteries of sacred plants and celebrating the world's traditional cultures. His passion as an ethnobotanist has brought him to the very center of indigenous life in places as remote and diverse as the Canadian Arctic, the deserts of North Africa, the rain forests of Borneo, the mountains of Tibet, and the surreal cultural landscape of Haiti. In *Light at the Edge of the World*, Davis explores the idea that these distinct cultures represent unique visions of life itself and have much to teach the rest of the world about different ways of living and thinking. As he investigates the dark undercurrents tearing people from their past and propelling them into an uncertain future, Davis reiterates that

the threats faced by indigenous cultures endanger and diminish all cultures.

Turning Points of the Civil War Sep 07 2020 James A. Rawley examines the seven turning points of the Civil War: the course of the slaveholding borderland in 1861, First Bull Run, the Trent affair, Antietam, the Emancipation Proclamation, Gettysburg and Vicksburg, and the presidential election of 1864. Among the topics unifying his book are slavery, democracy, British policy, military organization and progress, and the roles of Lincoln, McClellan, Davis, and Lee. The afterword looks at the Civil War itself as a turning point in American history. In a preface to this Bison Book edition, James A. Rawley, considers recent books that sustain the idea of turning points during the Civil War.
