**Explosion-Resistant Buildings** Jul 29 2019 This excellent book highlights all aspects of the analysis and design of buildings subject to impact, explosion and fire. It is a definitive reference book and contains 10 chapters from a wide international perspective. Three-dimensional finite element and discrete element techniques are included. They are applied to buildings such as the World Trade Center (WTC Twin Towers) and the Federal Building in Oklahoma on the basis of the designers' drawings, data and other information. Many small case studies are also included. The book has a comprehensive bibliography and a large appendix providing background analysis and computer subroutines of recently developed programs.

**Pursuit of Liberation** Aug 10 2020 The authors of this volume collectively demonstrate the importance of critical service-learning in this historic moment as we participate in, and witness ongoing struggles for justice around the world. The contributors of this volume offer guidance to educators and scholars alike who are interested in designing, participating in, and studying the potential of alliances formed through critical service-learning. The volume emphasizes theoretical and historical foundations of critical service-learning, pressing questions facing the field, exploration of outcomes of, and ongoing challenges for the pedagogy, and design features and larger scale models of critical service-learning that can be implemented across the educational landscape of elementary, secondary, and higher education. ENDORSEMENTS: "This volume in the Advances in Service-Learning Research series does not disappoint. Emily Nemeth and Ashley Patterson have amassed an amazing team of authors who take readers on a rewarding journey across diverse cultural communities and educational contexts, revealing the limitations of traditional service-learning approaches in addressing issues of racial injustice. Readers of this volume will gain a greater understanding of the rapidly evolving and maturing nature of higher education service-learning pedagogy and the need to adopt more critical perspectives in the study and practice of service-learning." — Andrew Furco, University of Minnesota "Pursuit of Liberation, conceived and written during tumultuous times in the United States, offers hope for the possibility of social justice and liberation in educational spaces. The modern-day brutal lynching of George Floyd, an African American man by a white police officer, and the COVID-19 pandemic revealed the horridness and inhumanity of a country that advertises itself as a beacon of equity and inclusion. This volume is a reminder that social justice and liberation require vigilance. The editors, Professors Nemeth and Patterson, persuade us to understand that the work of inclusion and liberation in education is complex, multidisciplinary, continuous, and iterative. Most importantly, they convincingly assert that communities and educational institutions need to take bold steps toward a more just, hopeful, and loving world through critical service learning." — Shirley Mthethwa-Sommers, University of Mpumalanga

**Advances in Efficiency and Productivity Analysis** Apr 17 2021 The volume examines the state-of-the-art of productivity and efficiency analysis. It brings together a selection of the best papers from the 10th North American Productivity Workshop. By analyzing world-wide perspectives on challenges that local economies and institutions may face when changes in productivity are observed, readers can quickly assess the impact of productivity measurement, productivity growth, dynamics of productivity change, measures of labor productivity, measures of technical efficiency in different sectors, frontier analysis, measures of performance, industry instability and spillover effects. The contributions in this volume focus on the theory and application of economics, econometrics, statistics, management science and operational research related to problems in the areas of productivity and efficiency measurement. Popular techniques and methodologies including stochastic frontier analysis and data envelopment analysis are represented. Chapters also cover broader issues related to measuring, understanding, incentivizing and improving the productivity and performance of firms, public services, and industries.

**Chromatographic Techniques in the Forensic Analysis of Designer Drugs** Oct 24 2021 There is a dramatic rise of novel drug use due to the increased popularity of so-called designer drugs. These synthetic drugs can be illegal in some countries, but legal in others and novel compounds unknown to drug chemistry emerge monthly. This thoughtfully constructed edited reference presents the main chromatographic methodologies and strategies used to discover and analyze novel designer drugs contained in diverse biological materials. The methods are based on molecular characteristics of the drugs belonging to each individual class of compounds, so it will be clear how the current methods are adaptable to future new drugs that appear in the market.

**New Horizons in Design Science: Broadening the Research Agenda** Mar 17 2021 This book constitutes the thoroughly refereed proceedings of the 10th International Conference on Design Science Research in Information Systems and Technology, DESRIST 2015, held in Dublin, Ireland, in May 2015. The 22 full papers, 11 short papers and 10 short papers describing prototypes and products were carefully reviewed and selected from 111 submissions. The papers are organized in topical sections on design science research in action; meta perspectives; data mining and analytics; emerging themes; design practice and design thinking; and prototypes.

**A Handbook on Teaching & Research Aptitude (General Paper -I of UGC-NET/SET/JRF & PET Exams)** Dec 26 2021 Preface UGC NET exam pattern 2022 has been released by National Testing Agency (NTA) along with the official notification. As per the UGC NET 2022 exam pattern, the exam consists of two papers- Paper 1 and Paper 2. Both papers are comprised of objective-type multiple-choice questions (MCQs). There is no break between Paper 1 and 2. The exam will be conducted in Computer Based Test (CBT) mode. The medium of the UGC NET question paper is in English and Hindi languages only. Till December 2018, the UGC NET exam pattern was such that the test consisted of two papers (Paper 1 and 2) that were conducted in two different sessions. Candidates had to complete both the papers (Paper 1 and 2) in a duration of one and two hours, respectively. However, in June 2019, NTA changed the exam pattern as per which candidates now have to give both the papers in a single three-hour duration. In UGC NET Paper 1, the official website of NTA informs, "The questions will be generic in nature, intending to assess the teaching/research aptitude of the candidate. It will primarily be designed to test reasoning ability, comprehension, divergent thinking and general awareness of the candidate." This book 'A Handbook for General Paper on Teaching & Research Aptitude (Paper -I) of UGC-NET & PET Exams: A Crash Course for all Aspiring Students' (For All 101 Subjects) is an outcome of not just efforts from the authors, but contributions by many Research Scholars. We take this opportunity to thank all those who supported in publication of this book. Many research scholars have been kind enough to share their research works in form of Video sessions on Teaching & Research Aptitude, Power-point presentations, MCQs in google form etc, so that a larger section of the aspiring students can take a guideline in preparing for the exams. This Book also contains useful QR codes for direct link to various folders and files on the drive for Syllabi for UGC NET Paper-I & Various MCQ's on different Open-source websites. We owe to many authors and websites whose writings formed the basis for this book. Our special acknowledgment and thanks to Indira Gandhi Open University, New Delhi and their open source websites [www.ignou.ac.in](http://www.ignou.ac.in) & [www.egyankosh.ac.in](http://www.egyankosh.ac.in). We also take this opportunity to thank Amazon and Kindle Publishing for the publication of this book. At the end we would like to say that there is always a room for improvement in whatever we do. We would appreciate any suggestions and feedback regarding this book from the readers on [mukulburghate@gmail.com](mailto:mukulburghate@gmail.com) so that the book can be made more interesting and meaningful. **Qualitative Comparative Analysis (QCA)** Jun 07 2020 This working paper gives an overview of Qualitative Comparative Analysis (QCA), a method that enables systematic cross-case comparison of an intermediate number of case studies. It presents an overview of QCA and detailed descriptions of different versions of the method. Based on the experience applying QCA to CIFOR's Global Comparative Study on REDD+, the paper shows how QCA can help produce parsimonious and stringent research results from a multitude of in-depth case studies developed by numerous researchers. QCA can be used as a structuring tool that allows researchers to share understanding and produce coherent data, as well as a tool for making inferences usable for policy advice. REDD+ is still a young policy domain, and it is a very dynamic one. Currently, the benefits of QCA result mainly from the fact that it helps researchers to organize the evidence generated. However, with further and more differentiated case knowledge, and more countries achieving desired outcomes, QCA has the potential to deliver robust analysis that allows the provision of information, guidance and recommendations to ensure carbon-effective, cost-efficient and equitable REDD+ policy design and implementation

**Policy Analysis in Mexico** Mar 29 2022 This is the first detailed examination of the practice of policy analysis in Mexico. In addition to contributing to a better knowledge of the nature of policy making in the country, it promotes evidence-based policy analysis and better policy results. Policy Analysis in Mexico studies the nature of policy analysis at different sectors and levels of government as well as by nongovernmental actors, such as unions, business, NGOs, and the media.

**Foundations of Intelligent Systems** Apr 05 2020 This volume contains the papers selected for presentation at the 17th International Symposium on Methodologies for Intelligent Systems (ISMIS 2008), held in York University, Toronto, Canada, May 21-23, 2008. ISMIS is a conference series started in 1986. Held twice every three years, ISMIS provides an international forum for exchanging scientific research and technological achievements in building intelligent systems. Its goal is to achieve a vibrant interchange between researchers and practitioners on fundamental and advanced issues related to intelligent systems. ISMIS 2008 featured a selection of latest research work and applications from the following areas related to intelligent systems: active media human-computer interaction, autonomic and evolutionary computation, digital libraries, intelligent agent technology, intelligent information retrieval, intelligent information systems, intelligent language processing, knowledge representation and integration, knowledge discovery and data mining, knowledge visualization, logic for artificial intelligence, soft computing, Web intelligence, and Web services. - searchers and developers from 29 countries submitted more than 100 full - pers to the conference. Each paper was rigorously reviewed by three committee members and external reviewers. Out of these submissions, 40% were selected as regular papers and 22% as short papers. ISMIS 2008 also featured three plenary talks given by John Mylopoulos, Jiawei Han and Michael Lowry. They spoke on their recent research in age-oriented software engineering, information network mining, and intelligent software engineering tools, respectively.

**Implementation of the ward based outreach teams programme in the rural area** Oct 12 2020 Academic Paper from the year 2016 in the subject Medicine - Public Health, grade: MBA, course: MBA, language: English, abstract: This paper investigates the implementation of ward Based Outreach Teams programme in the rural areas of the Kgetleng sub district, in the North West Province of South Africa. The Department of Health has set a long-term goal of establishing National Health Insurance in the country. This would provide equitable and universal coverage for a defined package of healthcare. One of the key pillars of National Health Insurance is the re-engineering of Primary Health Care, which has at its heart in the development of Ward-Based Outreach Teams who will take the responsibility for specific groups of households. In this regard, the South African Department of Health has considered re-engineering of the Primary Health Care model in the country in making sure health resources; technology and quality services are available, accessible and affordable to all communities. The North West province Department of Health is currently piloting the Primary Health Care re-engineering programme, which include the Ward Based Outreach Teams programme in all four Districts. Bojanala, Ngaka Modiri Molema, Dr. Kenneth Kaunda and Dr Ruth Segomotsi Mompoti. In Bojanala District, the pilot site is in ward five in Kgetleng sub district. In this paper, the quantitative research design was used where self-administered questionnaires were provided to the Community Health Workers (CHW) and the Outreach team leaders (OTL) for data collection. The findings of the paper indicated that Ward Based Outreach Teams contribute towards a better understanding of local health care needs, inform service priorities, refer patients to different stakeholders, and build stronger relationships between service providers

and users in the communities. The key elements to practice this service are person-centred comprehensive care, collaboration between people, practitioners, and continuity of health care in the community.

**The Routledge Companion to Behavioural Accounting Research** Aug 29 2019 Behavioural research is well established in the social sciences, and has flourished in the field of accounting in recent decades. This far-reaching and reliable collection provides a definitive resource on current knowledge in this new approach, as well as providing a guide to the development and implementation of a Behavioural Accounting Research project. The Routledge Companion to Behavioural Accounting Research covers a full range of theoretical, methodological and statistical approaches relied upon by behavioural accounting researchers, giving the reader a good grounding in both theoretical perspectives and practical applications. The perspectives cover a range of countries and contexts, bringing in seminal chapters by an international selection of behavioural accounting scholars, including Robert Libby and William R. Kinney, Jr. This book is a vital introduction for Ph.D. students as well as a valuable resource for established behavioural accounting researchers.

**Paper-Based Analytical Devices for Chemical Analysis and Diagnostics** Nov 05 2022 Paper-Based Analytical Devices for Chemical Analysis and Diagnostics is a valuable source of information for those interested in microfluidics, bioanalytical devices, chemical instrumentation/mechanization, in-field analysis, and more. This book provides a critical review of the scientific and technological progress of paper-based devices, as well as future trends in the field of portable paper-based sensors for chemical analysis and diagnostics directly at point of need. It uniquely focuses on the analytical techniques associated with each type of device, providing a practical framework for any researcher to use while learning how to use new types of devices in their work, deciding which ones are best for their needs, developing new devices, or working toward commercialization. Reviews the evolution of this area and offers predictions for the future of the field of paper-based analytical devices Explores the analytical techniques used in development of paper-based devices Discusses challenges and shortcomings specific to each type of device, helping users and developers to avoid pitfalls

**Critical Discourse Analysis** Mar 05 2020 Bringing together papers written by Norman Fairclough over a 25 year period, Critical Discourse Analysis represents a comprehensive and important contribution to the development of this popular field. The book is divided into seven sections covering the following themes: language in relation to ideology and power discourse in processes of social and cultural change dialectics of discourse, dialectical relations between discourse and other moments of social life methodology of critical discourse analysis research analysis of political discourse discourse in globalisation and 'transition' critical language awareness in education The new edition has been extensively revised and enlarged to include a total of twenty two papers. It will be of value to researchers in the subject and should prove essential reading for advanced undergraduate and postgraduate students in Linguistics and other areas of social science.

**TRAC: Trends in Analytical Chemistry** Oct 04 2022

**TRAC: Trends in Analytical Chemistry, Volume 8** provides information pertinent to the trends in the field of analytical chemistry. This book presents a variety of topics related to analytical chemistry, including protein purification, biotechnology, Raman spectroscopy in pharmaceutical field, electrokinetic chromatography, and flow injection analysis. Organized into 50 chapters, this volume begins with an overview of scientometric investigations that enable the quantitative study of the evolution of its various components and can thereby uncover how information is utilized to diffuse and generate knowledge. This text then discusses the economic significance of sensing and control as being the main factors in determining process economics and in offering products and business opportunities. Other chapters consider the important relationship between Raman spectroscopy and other analytical methods. This book discusses as well the interfaces between a gas chromatograph and a Fourier transform infrared spectrometer. The final chapter deals with chemometrics routines. This book is a valuable resource for analytical chemists, and biochemists.

**Foreign Affairs Research Papers Available** Jun 19 2021

**The Analytical Writer** Jul 09 2020 In *The Analytical Writing* Adrienne Robins explains college writing as a process of discovery, as a series of strategies that any college student can learn to apply. All strategies explained in this text are based on sound theories of teaching writing and on the patterns of successful writers. Writing and thinking should not be separated, and presenting only the steps without the accompanying explanation of how they influence thinking would be of little more help than having no method at all. By using this text the students will see as they plan, draft, and revise how their writing helps clarify their thoughts. This clearly written and engaging textbook is illustrated by real examples of student writing and appropriate cartoons. The second edition was revised and updated based on the large-scale evaluation of the first edition completed by professors and students. The new edition reflects four essential values: recognizing the diversity of writing processes, the necessity of peer and teacher interaction with the writer on drafts, the integration of writing and reading, and the appropriate uses of technology. Specific features of this second edition include: -new writing samples -electronic citation formats -updated library use chapter with technological guidance -concise paragraph chapter -revised introduction and conclusion chapter -rhetorical as well as grammatical explanations for punctuation usage -new cartoons -exercises drawn from students' papers -a condensed chapter on research papers -and an expanded, and clearer, chapter on special assignments and other writing tasks A Collegiate Press book
