[Seduction by Contract](#) Dec 09 2020 Consumers routinely enter into long-term contracts with providers of goods and services - from credit cards, mortgages, cell phones, insurance, TV, and internet services to household appliances, theatre and sports events, health clubs, magazine subscriptions, transportation, and

more. Across these consumer markets certain design features of contracts are recurrent, and puzzling. Why do sellers design contracts to provide short-term benefits and impose long-term costs? Why are low introductory prices so common? Why are the contracts themselves so complex, with numerous fees and interest rates, tariffs and penalties? Seduction by Contract explains how consumer contracts emerge from the interaction between market forces and consumer psychology. Consumers are short-sighted and optimistic, so sellers compete to offer short-term benefits, while imposing long-term costs. Consumers are imperfectly rational, so sellers hide the true costs of products and services in complex contracts. Consumers are seduced by contracts that increase perceived benefits, without actually providing more benefits, and decrease perceived costs, without actually reducing the costs that consumers ultimately bear. Competition does not help this behavioural market failure. It may even exacerbate it. Sellers, operating in a competitive market, have no choice but to align contract design with the psychology of consumers. A high-road seller who offers what she knows to be the best contract will lose business to the low-road seller who offers what the consumer mistakenly believes to be the best contract. Put bluntly, competition forces sellers to exploit the biases and misperceptions of their customers. Seduction by Contract argues that better legal policy can help consumers and enhance market efficiency. Disclosure mandates provide a promising avenue for regulatory intervention. Simple, aggregate disclosures can help consumers make better choices. Comprehensive disclosures can facilitate the work of intermediaries, enabling them to better advise consumers. Effective disclosure would expose the seductive nature of consumer contracts and, as a result, reduce sellers' incentives to write inefficient contracts. Developing its explanation through a general framework and detailed case studies of three major consumer markets (credit cards, mortgages, and cell phones), Seduction by Contract is an accessible introduction to the law and economics of consumer contracts, and a powerful critique of current regulatory policy.

**Cyberspace Safety and Security** May 26 2022 This book constitutes the refereed proceedings of the 4th International Symposium on Cyberspace Safety and Security (CSS 2012), held in Melbourne, Australia, in December 2012. The 30 revised full papers presented together with 7 invited talks were carefully reviewed and selected from 105 submissions. The papers cover the following topics: mobile security, cyberspace attacks and defense, security application and systems, network and cloud security, wireless security, security protocols and models.

Advances in Information and Communication Jun 02 2020 This book presents a remarkable collection of chapters that cover a wide range of topics in the areas of information and communication technologies and their real-world applications. It gathers the Proceedings of the Future of Information and Communication Conference 2019 (FICC 2019), held in San Francisco, USA from March 14 to 15, 2019. The conference attracted a total of 462 submissions from pioneering researchers, scientists, industrial engineers, and students from all around the world. Following a double-blind peer review process, 160 submissions (including 15 poster papers) were ultimately selected for inclusion in these proceedings. The papers highlight relevant trends in, and the latest research on: Communication, Data Science, Ambient Intelligence, Networking, Computing, Security, and the Internet of Things. Further, they address all aspects of Information Science and communication technologies, from classical to intelligent, and both the theory and applications of the latest technologies and methodologies. Gathering chapters that discuss state-of-the-art intelligent methods and techniques for solving real-world problems, along with future research directions, the book represents both an interesting read and a valuable asset.

*Security and Privacy in Mobile Information and Communication Systems* Nov 27 2019 This book constitutes the thoroughly refereed post-conference proceedings of the fourth International ICST Conference on Security and Privacy in Mobile Information and Communication Systems (MOBISEC 2012) held in Frankfurt/Main, Germany, in June 2012. The 13 revised full papers were carefully selected from numerous submissions and cover the application layer of security, highlighting the practical importance of security of mobile devices in concrete usages. Contributions to MobiSec 2012 range from treatments on user privacy issues, over mobile application and app security, to mobile identity management, and NFC. With the orientation toward applications, MobiSec is a perfect interface between academia and industry in the field of mobile communications.

**Digital Dilemmas** Dec 29 2019 Digital Dilemmas is a groundbreaking ethnographic, mixed method approach to understanding dynamics of power and resistance as they are played out around the future of the internet. M. I. Franklin looks at the way that publics, governments, and multilateral institutions are being redefined and reinvented in digital settings that are ubiquitous and yet controlled by a relative few. Franklin does this through three original and wide-ranging case studies that get at the way that computer-mediated power relations play out "on the ground" through a mixture of overlapping online and offline activity, at personal, community, and transnational levels. Case studies include online activities around homelessness and street papers in the U.S. and around the world, digital and human rights activism carried out through the United Nations, and the ongoing battle between proprietary and free and open source software proponents. The result is a thought-provoking and seminal work on the way that the new paradigms of power and resistance forged online reshape localized and traditional power structures offline.

**Beginning PhoneGap** Jul 16 2021 Create cross-platform mobile apps without having to learn a new language! PhoneGap is an open source solution, ideal for web developers wanting to build cross-platform mobile apps without having to learn a new language. Using HTML, CSS, and Javascript, PhoneGap allows you to jump into the mobile world and develop apps for iPhone, Android, and the BlackBerry. Walks you through installing the development software Covers the basics of each of PhoneGap's functional units Introduces various projects you can build with the framework Discusses using HTML, CSS, JavaScript Explores the features accelerometer and compass Examines media, storage and files, camera, contacts, geolocation, and more Within Beginning PhoneGap, each new chapter builds on the lessons taught in the previous so that by the end of the book, you can have mobile apps up and running! "NOTE: Several significant changes to the PhoneGap software occurred shortly after this book was published. The author has written extra pages to address these and other changes. You can download the updates to this book from the book's support page on the Wrox website."

**Photovoltaic Solar Energy** Sep 29 2022 Solar PV is now the third most important renewable energy source, after hydro and wind power, in terms of global installed capacity. Bringing together the expertise of international PV specialists Photovoltaic Solar Energy: From Fundamentals to Applications provides a comprehensive and up-to-date account of existing PV technologies in conjunction with an assessment of technological developments. Key features: Written by leading specialists active in concurrent developments in material sciences, solar cell research and application-driven R&D. Provides a basic knowledge base in light, photons and solar irradiance and basic functional principles of PV. Covers characterization techniques, economics and applications of PV such as silicon, thin-film and hybrid solar cells. Presents a compendium of PV technologies including: crystalline silicon technologies; chalcogenide thin film solar cells; thin-film silicon based PV technologies; organic PV and III-Vs; PV concentrator technologies; space technologies and economics, life-cycle and user aspects of PV technologies. Each chapter presents basic principles and formulas as well as major technological developments in a contemporary context with a look at future developments in this rapidly changing field of science and engineering. Ideal for industrial engineers and scientists beginning careers in PV as well as graduate students undertaking PV research and high-level undergraduate students.

*Signal Processing and Networking for Big Data Applications* Jun 26 2022 This unique text helps make sense of big data using signal processing techniques, in applications including machine learning, networking, and energy systems.

*Designing with Photovoltaics* Jun 14 2021 "Designing with Photovoltaics" cover a broad range of topics related to the design of products, buildings and vehicles with integrated photovoltaic (PV) technologies including storage aspect. It enables the reader to easily design new products, buildings and vehicles through use of innovative PV products. Diverse categories of product integrated PVs are discussed including applications of solar power for mobility and building integrated systems along with design- and manufacturing-related information about solar cells. Illustrating design cases of various PV-powered products, special attention is paid to end-users and environmental aspects of PV applications. Aimed at senior undergraduates, graduates and professionals in electrical engineering, architecture, design, physics, mechanical engineering and those specifically studying photovoltaics, it Covers the different product integrated photovoltaics (PIPV) with a focus on design and manufacturing Presents comprehensive overview of all aspects of designing with photovoltaics Includes product integrated PV, building integrated PV and solar powered mobility concepts Contains real design cases showing how to design with

photovoltaics Discusses context of environmental issues and user aspects
