*Going Concern Valuation* Sep 19 2021 Our purpose in writing this book is multifaceted. First, this book aims to present a clear understanding of going concern valuations, at the same time resolving the current misrepresentations surrounding the issue. Additionally, this book offers a new set of rules readers can use to determine which property types qualify as going concern valuations and which do not. This book presents an understanding that in performing a Going Concern Valuation of properties which are perceived to have a business component, it may not be possible to segregate, allocate, or value the components individually. For example, when appraising the going concern value of a motel with occupancy of 75% it could be argued and possibly proven that there is a value that can be separated from the overall value, or going concern value, to the business component. On the other hand, however, appraising that same motel with only 40% occupancy presents a completely different set of circumstances that could easily draw completely opposite conclusions. It simply may be a lack of sufficient tools or data to argue and prove that the business component in fact has value separate from the real estate. To do so with authority is tantamount to ignorance or arrogance.

*The 3-Degree Putting Solution* Feb 10 2021 The award-winning Golf Channel instructor and host of The Golf Fix revives a long-lost technique for adjusting your putter's loft, with winning results. Acclaimed instructor Michael Breed resurrects the crucial lessons of negative loft-3 degrees of it, to be precise-and shows how it can revolutionize any player's short game. Drawn from years of self-funded technical research, The 3-Degree Putting Solution presents the key to fixing putting woes once and for all. The secret is to change the loft on the putter face from 4 degrees of positive loft (as conventional wisdom dictates) to a negative loft of 3 degrees. The result? Backspin is greatly reduced, ensuring a

more consistent speed and a "truer" roll. And by leaning the putter shaft forward, golfers can all but eliminate the ball's pesky air jump immediately after impact. Shrinking the chance of error on each putt, Breed has perfected the 3-Degree technique to incorporate optimal grip, posture, and alignment, as well as intuitive skills such as mental conditioning and how to read the green. This breakthrough guide offers practice drills with dozens of photographs and illustrations, making the 3-Degree technique a powerful lesson in shaving crucial points off your score. Giving readers access to the proven wisdom of a world-class instructor, The 3-Degree Putting Solution is sure to spark new dialogues on how to putt like a pro.

**U.S. Navy Signalman 1 & C NAVEDTRA 14243** Mar 26 2022 Your choice to become a Signalman is a very good one. The Signalman rating is one of the oldest in the Navy, and visual communication—the first form of nautical communications—continues undiminished in importance today. You will find your job interesting, rewarding, and full of the satisfaction that comes of service to the Navy and the United States. At the level of operating forces, communications, as you will learn, is truly the voice of command in a visible way. The communication organization aboard ship is under the control of the commanding officer. In the transmission and reception of signals and messages, communicators actively participate in the exercise of command. The fleet needs capable personnel in all ratings, because an effective naval force is only as good as the people who man the ships. Even with the most modern equipment, the force is seriously handicapped without competent personnel to operate and maintain that equipment. Good people are plentiful, but their capability depends on their training. This manual contains the basic knowledge you need for advancement in the Signalman rating. Skills in personnel advancement requirements (PARS), including a performance test, also are required, but these can only be developed through practice and experience. Personnel Qualification Standard (PQS) is a qualification

for officers and enlisted personnel to perform certain duties. The Signalman PQS booklet, Visual Communication, NAVEDTRA 43354B, contains the fundamentals, systems, and watch stations recognized by CNET as the minimum qualification for Signalman supervisor aboard U.S. Navy ships. Included are expert lookout, flagbag operator, semaphore operator, searchlight operator, boat Signalman, amphibious Signalman, Signalman of the watch, in-port duty Signalman, recorder/messenger, signal bridge spotter, and AN/KAS-1 operator. This PQS will assist you in becoming a more productive member of the Signalman community. As a part of the Navy's training program, Signalman, is designed to help you meet the occupational standards for advancement in the Signalman rating. To become an expert is quite a challenge, and you will derive considerable satisfaction from mastering the art of signaling. Through your initiative, study, practice, and hard work, the time will come when your shipmates will look upon you as an expert.

**THE SIGNALMAN RATING LEARNING OBJECTIVES:** State the purpose of a Signalman aboard ship. Identify five areas in which Signalmen must be proficient. All the planning, organizing, and training that go into the makeup of a signal gang are designed for one purpose—to perfect the Signalman's ability to transmit and receive messages vital to the operation of the ship. The Signalman mans the visual communication link with semaphore flags, flaghoist, and searchlights. In addition to visual communications, a Signalman also must be proficient in navigation. Navigation duties include the reading, stowing, and correcting of charts; being able to help pilot a ship in restricted waters; and being familiar with the Rules of the Road, navigational aids, and using navigational equipment. (Navigational duties are discussed in chapter 9.) In addition, the Signalman must be skilled in voice radio operations and procedures; be able to properly render honors and ceremonies; be experienced in the principles of recognition and be quick to recognize personal flags and pennants of U.S. and foreign officers; be able to act as expert lookouts;

and be able to demonstrate know how in many other related skills.
