[Optical Diagnostics for Thin Film Processing](#) Apr 29 2022 This volume describes the increasing role of in situ optical diagnostics in thin film processing for applications ranging from fundamental science studies to process development to control during manufacturing. The key advantage of optical diagnostics in these applications is that they are usually noninvasive and nonintrusive. Optical probes of the surface, film, wafer, and gas above the wafer are described for many processes, including plasma etching, MBE, MOCVD, and rapid thermal processing. For each optical technique, the underlying principles are presented, modes of experimental implementation are described, and applications of the diagnostic in thin film processing are analyzed, with examples drawn from

microelectronics and optoelectronics. Special attention is paid to real-time probing of the surface, to the noninvasive measurement of temperature, and to the use of optical probes for process control. Optical Diagnostics for Thin Film Processing is unique. No other volume explores the real-time application of optical techniques in all modes of thin film processing. The text can be used by students and those new to the topic as an introduction and review of the subject. It also serves as a comprehensive resource for engineers, technicians, researchers, and scientists already working in the field. The only volume that comprehensively explores in situ, real-time, optical probes for all types of thin film processing Useful as an introduction to the subject or as a resource handbook Covers a wide range of thin film processes including plasma etching, MBE, MOCVD, and rapid thermal processing Examples emphasize applications in microelectronics and optoelectronics Introductory chapter serves as a guide to all optical diagnostics and their applications Each chapter presents the underlying principles, experimental implementation, and applications for a specific optical diagnostic

Hemodynamic Rounds Nov 05 2022 The essential resource on cardiac hemodynamics—now in a new edition Hemodynamic Rounds, Fourth Edition is intended to help cardiologists, cardiovascular fellowship trainees, residents and other members of the medical community enhance their understanding of cardiac physiology and its associated hemodynamic presentations in health and disease. This includes the basic principles of flow and pressure measurements, systemic as well as coronary hemodynamics in normal and diseased states, and changes in hemodynamics following interventional procedures ranging from TAVI and valvuloplasty to stent placement. Like its popular predecessors, this new edition draws on case studies to illustrate characteristic cardiac hemodynamic findings and discusses the essential methods used in interpreting pressure waveforms as a diagnostic and monitoring tool. The text is organized into chapters on specific areas of the heart, common cardiac pathophysiologic conditions, and hemodynamic situations resulting from different therapeutic procedures. It includes discussions of both normal and abnormal pressure waveforms. This new edition has been revised throughout to include brand new content on aortic and mitral valve stenosis and regurgitation as well as TAVI and mitral clip hemodynamics. Highlights include: Essential and easy to understand resource for those required to interpret cardiac blood flow and blood pressure tracings Covers hemodynamic assessment by cardiac disorder, plus the bedside applications of hemodynamics Revised throughout and includes brand new content on valve stenosis and regurgitation and TAVI and mitral clip hemodynamics Hemodynamic Rounds: Interpretation of Cardiac Pathophysiology from Pressure Waveform Analysis, Fourth Edition is an indispensable tool for all physicians, nurses, and students responsible for measuring and interpreting cardiac waveforms in cardiac diagnosis and monitoring.

Kern's Process Heat Transfer Dec 26 2021 This book insures the legacy of the original 1950 classic, Process Heat Transfer, by Donald Q. Kern. This second edition book is divided into three parts: Fundamental Principles; Heat Exchangers; and Other Heat Transfer Equipment/ Considerations. - Part I provides a series of chapters concerned with introductory topics that are required when solving heat transfer problems. This part of the book deals with topics such as steady-state heat conduction, unsteady-state conduction, forced convection, free convection, and radiation. - Part II is considered by the authors to be the "meat" of the book – addressing heat transfer equipment design procedures and applications. In addition to providing a more meaningful treatment of the various types of heat exchangers, this part also examines the impact of entropy calculations on exchanger design. - Part III of the book examines other related topics of interest, including boiling and condensation, refrigeration and cryogenics, boilers, cooling towers and quenchers, batch and unsteady-state processes, health & safety and the accompanying topic of risk. An Appendix is also included. What is new in the 2nd edition Changes that are addressed in the 2nd edition so that Kern's original work continues to remain relevant in 21st century process engineering include: - Updated Heat Exchanger Design - Increased Number of Illustrative Examples - Energy Conservation/ Entropy Considerations - Environmental Considerations - Health & Safety - Risk Assessment - Refrigeration and Cryogenics - Inclusion of SI Units

Satan's Silence Jun 19 2021 Communities throughout the United States were convulsed in the 1980s and early 1990s by accusations, often without a shred of serious evidence, that respectable men and women in their midst—many of them trusted preschool teachers—secretly gathered in far reaching conspiracies to rape and terrorize children. In this powerful book, Debbie Nathan and Mike Snedeker examine the forces fueling this blind panic.

Mojave-Kern River-El Dorado Natural Gas Pipeline Projects May 31 2022 "The WyCal Supplement to the Mojave-Kern River-El Dorado Natural Gas Pipeline Final Environmental Impact Report/Statement (FEIR/S) is a joint document prepared by the California State Lands Commission (SLC) and the Federal Energy Regulatory Commission (FERC) to fulfill the requirements of the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA). These two agencies in coordination with the Bureau of Land Management (BLM), the USDA Forest Service (FS), and other federal agencies have directed the preparation of this joint federal and state document. This proposed pipeline project, like the Mojave Pipeline Company (Mojave) and Kern River Gas Transmission Company (Kern River) projects discussed in the FEIR/S, would transport natural gas from various sources outside of California to the Bakersfield, California, area for use in enhanced oil recovery (EOR) and related cogeneration projects. ... The proposed Wyoming-California Pipeline Company (WyCal) pipeline would extend from Lincoln County in southwestern Wyoming across Utah and southern Nevada to a juncture point in San Bernardino County in California, where it would intersect with another portion of the proposed route which would extend from western Mohave County in Arizona across San Bernardino County and into Kern County, California. They WyCal route in fact represents a combination of the Kern River proposed pipeline route from Wyoming and extending into southern Nevada, the East Las Vegas System Alternative, and the Mojave proposed pipeline route across southern California"--Page s-1.

The Sower and the Seer Dec 14 2020 This collection of twenty-two essays, a product of recent revivals of interest in both Midwestern history and intellectual history, argues for the contributions of interior thinkers and ideas in forming an American identity. The Midwest has been characterized as a fertile seedbed for the germination of great thinkers, but a wasteland for their further growth. *The Sower and the Seer* reveals that representation to be false. In fact, the region has sustained many innovative minds and been the locus of extraordinary intellectualism. It has also been the site of shifting interpretations—to some a frontier, to others a colonized space, a breadbasket, a crossroads, a heartland. As agrarian reformed (and Michigander) Liberty Hyde Bailey expressed in his 1916 poem “Sower and Seer,” the Midwestern landscape has given rise to significant visionaries, just as their knowledge has nourished and shaped the region. The essays gathered for this collection examine individual thinkers, writers, and leaders, as well as movements and ideas that shaped the Midwest, including rural school consolidation, women’s literary societies, Progressive-era urban planning, and Midwestern radical liberalism. While disparate in subject and style, these essays taken together establish the irrefutable significance of the intellectual history of the American Midwest.

[Flight of Passage](#) Aug 29 2019 Writer Rinker Buck looks back more than 30 years to a summer when he and his brother, at ages 15 and 17 respectively, became the youngest duo to fly across America, from New Jersey to California. Having grown up in an aviation family, the two boys bought an old Piper Cub, restored it themselves, and set out on the grand journey. Buck is a great storyteller, and once you get airborne with the boys you find yourself absorbed in a

story of adventure and family drama. And *Flight of Passage* is also an affecting look back to the summer of 1966, when the times seemed much less cynical and adventures much more enjoyable.

The American Popular Ballad of the Golden Era, 1924-1950 Feb 02 2020 In this pathbreaking book, Allen Forte uses modern analytical procedures to explore the large repertoire of beautiful love songs written during the heyday of American musical theater, the Big Bands, and Tin Pan Alley. Covering the work of such songwriters as Jerome Kern, Irving Berlin, Cole Porter, George Gershwin, Richard Rodgers, and Harold Arlen, he seeks to illuminate this extraordinary music indigenous to America by revealing its deeper organizational characteristics. In so doing, he aims to establish it as a unique corpus of music that deserves more intensive study and appreciation by scholars and connoisseurs in the broader fields of American popular music and jazz. Expressing much of the traditional tonality associated with European music in the eighteenth and nineteenth centuries, the love songs of the Golden Age are shown to draw on a rich variety of elements--popular harmony, idiomatic lyric-writing, and Afro-American dance rhythms. His analyses of such songs as "Embraceable You" or "Yesterdays" in particular exemplify his ability to convey the sublime, unpretentious simplicity of this great music.

[Swords and Cinema](#) Jul 29 2019 The battles and sieges of the Classical world have been a rich source of inspiration to film makers since the beginning of cinema and the 60s and 70s saw the golden age of the 'swords and sandals' epic, with films such as *Spartacus*. Ridley Scott's *Gladiator* led a modern revival

that has continued with the release of films like 300, The Eagle and Centurion and HBO's mini-series Rome. While Hollywood interpretations of Classical battle continue to spark interest in ancient warfare, to casual viewers and serious enthusiasts alike they also spark a host of questions about authenticity. What does Hollywood get right and wrong about weapons, organization, tactics and the experience of combat? Did the Spartans really fight clad only in their underpants and did the Persians have mysterious, silver-masked assassins in their armies? This original book discusses the merits of battle scenes in selected movies and along the way gives the reader an interesting overview of ancient battle. It should appeal to the serious student of ancient warfare, movie buffs and everyone in between.

Essence and Energies: Being and Naming God in St Gregory Palamas Feb 13 2021 St. Gregory Palamas (ca. 1296-1357) is among the most well-known and celebrated theologians of late Byzantium. This book provides a comprehensive account of the essence-energies distinction across his twenty-five treatises and letters written over a twenty-year period. An Athonite monk, abbot, and later Metropolitan of Thessalonica, Gregory is remembered especially for his distinction between God's essence and energies, and his celebrated doctrine still generates a great deal of debate. What does Palamas actually mean by the term 'energies'? Are they 'activities' that God performs, and, if so, how can they be eternal and uncreated? Indeed, how could God be simple if he possesses energies distinct from his essence? Going beyond the *Triads* and the *One Hundred and Fifty Chapters*, this book explores Palamas's answers to these longstanding questions by analysing all of the treatises produced by Palamas between the years 1338 and 1357. It seeks to understand what Palamas means when he speaks of God's 'energies,' how he seeks to prove that they are distinct from the divine essence, and how he explains that this distinction in no way violates the unity and simplicity of the one God in Trinity. *Essence and Energies* is a useful resource for upper-level undergraduates, postgraduates, and scholars interested in Byzantine theology in the fourteenth century.

Text and Ritual in Early China Nov 12 2020 In *Text and Ritual in Early China*, leading scholars of ancient Chinese history, literature, religion, and archaeology consider the presence and use of texts in religious and political ritual. Through balanced attention to both the received literary tradition and the wide range of recently excavated artifacts, manuscripts, and inscriptions, their combined efforts reveal the rich and multilayered interplay of textual composition and ritual performance. Drawn across disciplinary boundaries, the resulting picture illuminates two of the defining features of early Chinese culture and advances new insights into their sumptuous complexity. Beginning with a substantial introduction to the conceptual and thematic issues explored in succeeding chapters, *Text and Ritual in Early China* is anchored by essays on early Chinese cultural history and ritual display (Michael Nylan) and the nature

of its textuality (William G. Boltz). This twofold approach sets the stage for studies of the E Jun Qi metal tallies (Lothar von Falkenhausen), the Gongyang commentary to The Spring and Autumn Annals (Joachim Gentz), the early history of The Book of Odes (Martin Kern), moral remonstrance in historiography (David Schaberg), the •Liming• manuscript text unearthed at Mawangdui (Mark Csikszentmihalyi), and Eastern Han commemorative stele inscriptions (K. E. Brashier). The scholarly originality of these essays rests firmly on their authors' control over ancient sources, newly excavated materials, and modern scholarship across all major Sinological languages. The extensive bibliography is in itself a valuable and reliable reference resource. This important work will be required reading for scholars of Chinese history, language, literature, philosophy, religion, art history, and archaeology.

Innovation and Collaboration in the Digital Era Mar 05 2020 Innovation and Collaboration in the Digital Era provides a holistic approach to collaborative innovation, innovation management and innovation leadership. It is full of practical advice and includes 34 interviews with high-level politicians, innovation industry leaders, academics and entrepreneurs discussing the reality of innovation and how to create change for a positive impact. Many quotes are included from researchers and practitioners in the innovation field who have participated as guests in the author's podcast "Business of Collaboration" or in interviews with the Collabwith Magazine which she produces. This is a powerful book full of practical frameworks and one-page canvases which act as reminders of the value of making needs and expectations explicit. The author provides frameworks and tools that can be used to support collaboration journeys across different sectors and organizations. She also offers clarity to the reader for their innovation journey and brings a new perspective on how to innovate and understand innovation. Jara Pascual focuses on the importance of managing emotions and feelings of frustration which can be very common during a collaborative innovation process. She explores the interaction between Emotional Intelligence and business and shows how to remove and manage frustration and how to produce a positive outcome. Innovation and Collaboration in the Digital Era will empower the reader to take action and show how to change your conversation about innovation and collaboration. "Innovation and collaboration are among the most important concepts that drive human society forward. Jara Pascual explores their interplay in a unique way, with the chapters walking through the richness of the topics like a Mediterranean food market, full of colour, diversity and flavours. A remarkable, engaging and satisfying read." Johan Kestens, CIO New York Mellon Bank "Jara's voice is rigorous and inspiring on how to manage organizations in the current era. Indeed, there are strategic reasons for diversity. And indeed, good leaders are not just smart, but emotionally intelligent. A MUST READ!" Elena Arrieta, tech & innovation journalist. Currently working as Communications Manager at DigitalES, the Spanish Association for Digitalisation. "Jara Pascual is opening a new box for innovation. I was intrigued about the connection of Emotional Intelligence and business in particular in a startup context. Everyone is looking for recipes for personal and professional success and this approach might be the key for both." Sabine Stuiver, Co-founder and CMO Hydraloop "Jara Pascual, with colleague Celia Avila-Rauch, has been able to distill and apply the ability model of emotional intelligence to the art and science of innovation and innovation leadership. In our work we note that feelings are not always facts but that emotions as a form of data. More than that, emotions can assist or facilitate with decision making, creativity and innovation rather than getting in the way, but only if leaders are "smart" about emotions and develop and deploy their emotional intelligence skills." Shaping the Futures of Young Europeans Dec 02 2019 This book discusses how the ways that young people's educational trajectories into and beyond lower secondary education are regulated can influence their future lives. It draws on the results of empirical studies in eight European countries: Finland, France, Germany, Italy, Netherlands, Poland, Slovenia and the United Kingdom (England and Northern Ireland), carried out under the EU-funded GOETE project. The book explores the different ways that educational trajectories are – actively or passively – conceptualised, negotiated and organised in the individual countries, and the ways that these shape educational opportunities and life chances. Its central aims are to elaborate the different ways in which educational trajectories are governed in the eight countries, and to compare the differences between those approaches and their outcomes in the eight countries. It focuses on the relationships between the different (national and local) forms and outcomes of interactions between collective and individual actors,

structures, institutions, mechanisms, and discourses that exert influence on education policy and practice at various levels: inter- and trans-national, nation-state, regional, local or school levels. The chapters are organised in two parts. Part One develops and discusses the conceptual framework that drove the empirical analyses of the governance of educational trajectories. Part Two discusses different ways in which the spatial/scalar, discursive and institutional dimensions of the governance of educational trajectories affect the educational experiences and life courses of the young people in the eight countries. These chapters focus on different aspects of those experiences, such as issues of access to and coping within educational settings, the role of parents and students in the processes and consequences of transitions, provision for supporting migrant students, and conceptions of the relevance of education. Overall, the comparative approach to governance adopted in the volume makes it possible to identify key sources and consequences of the similarities and differences of the approaches to, and practices of, educational transitions adopted in the eight countries.
