An Inquiry-Based Introduction to Engineering Nov 09 2020

The text introduces engineering to first-year undergraduate students using

Inquiry-Based Learning (IBL). It draws on several different inquiry-based instruction types such as confirmation inquiry, structured inquiry, guided inquiry, and open inquiry, and all of their common elements. Professor Blum's approach emphasizes the student's role in the learning process, empowering them in the classroom to explore the material, ask questions, and share ideas, instead of the instructor lecturing to passive learners about what they need to know. Beginning with a preface to IBL, the book is organized into three parts, each consisting of four to ten chapters. Each chapter has a dedicated topic where an initial few paragraphs of introductory or fundamental material are provided. This is followed by a series of focused questions that guide the students' learning about the concept(s) being taught. Featuring multiple inquiry-based strategies, each most appropriate to the topic, *An Inquiry-Based Approach to Introduction to Engineering* stands as an easy to use

Strengthening Mathematical Reasoning among Middle School Students with Hidden or Unmet Potential Apr 14 2021

This work seeks to contribute to the national dialogue regarding best practices in teaching middle school mathematics. The authors are committed to improving mathematics achievement and opportunities for students whose inherited circumstances place them at a perceptible disadvantage. Most refer to said students as “risks.” We hold the position that these students, irrespective of their backgrounds, possess Hidden or Unmet Potential and the unveiling of their potential can be accelerated when they are exposed to high-quality mathematics teaching. This book is a practitioner’s guide to creative mathematics activities centered on algebraic,

proportional, and geometric reasoning aligned with mathematics standards. This approach has the potential to accelerate the mathematical confidence and accentuate the mathematical proficiencies of students.

There are three primary goals that this book wishes to achieve: (1) Herein is the most prevalent standardized electrical calculations for use in reducing redundancy in the work effort, reducing repetitive errors, and freeing up more time for productive and innovative and imaginative engineering solutions. (2) Providing a standardized checklist worksheet for field survey work of existing conditions to help facilitate

obtaining all the necessary materials the first time around and without errors and omissions. And (2) the maximum security achievable for our highly classified facilities that we are dependent upon for our survival. Four secondary goals we wish to achieve are (1) various methods for conserving energy and resources, (2) the evaluation of life cycle of energy-saving design techniques and equipment selection, (3) the use of a standardized value engineering (VE) guide when performing value engineering workshops, and (4) employing various A and E, VE methods that can be employed for reducing first costs, operating costs, and life cycle costs (LCCs), all the while conserving energy and resources.

SAFETY AND HEALTH FOR ENGINEERS A comprehensive resource for making products, facilities, processes, and

operations safe for workers, users, and the public Ensuring the health and safety of individuals in the workplace is vital on an interpersonal level but is also crucial to limiting the liability of companies in the event of an onsite injury. The Bureau of Labor Statistics reported over 4,700 fatal work injuries in the United States in 2020, most frequently in transportation-related incidents. The same year, approximately 2.7 million workplace injuries and illnesses were reported by private industry employers. According to the National Safety Council, the cost in lost wages, productivity, medical and administrative costs is close to 1.2 trillion dollars in the US alone. It is imperative—by law and ethics—for engineers and safety and health professionals to drive down these statistics by creating a safe workplace and safe products, as well as maintaining a safe environment.
