The Heritage of Edirne in Ottoman and Turkish Times Sep 21 2021 Modern scholarship has not given Edirne the attention it deserves regarding its significance as one of the capitals of the Ottoman Empire. This edited volume offers a reinterpretation of Edirne's history from Early Ottoman times to recent periods of the Turkish Republic. Presently, disconnections and discontinuities introduced by the transition from empire to nation state still characterize the image of the city and the historiography about it. In contrast, this volume examines how the city engages in the forming, deflecting and creative appropriation of its heritage, a process that has turned Edirne into a UNESCO heritage hotspot. A closer historical analysis demonstrates the dissonances and contradictions that these different interpretations and uses of heritage produce. From the beginning, Edirne was shaped by its connectivity and relationality to other places, above all to Istanbul. This perspective is employed at many different levels, e.g., with regard to its population, institutions, architecture, infrastructures and popular culture, but also regarding the imaginations Edirne triggered. In sum, this multi-disciplinary volume boosts urban history beyond Istanbul and offers new insight into Ottoman and Turkish connectivities from the vantage point of certain key moments of Edirne's history.

Remembering the Cold War Dec 25 2021 Remembering the Cold War examines how, more than two decades since the collapse of the Soviet Union, Cold War legacies continue to play crucial roles in defining national identities and shaping international relations around the globe. Given the Cold War's blurred definition – it has neither a widely accepted commencement date nor unanimous conclusion – what is to be remembered? This book illustrates that there is, in fact, a huge body of 'remembrance,' and that it is more pertinent to ask: what should be included and what can be overlooked? Over five sections, this richly illustrated volume considers case studies of Cold War remembering from different parts of the world, and engages with growing theorisation in the field of memory studies, specifically in relation to war. David Lowe and Tony Joel afford careful consideration to agencies that identify with being 'victims' of the Cold War. In addition, the concept of arenas of articulation, which envelops the myriad spaces in which the remembering, commemorating, memorialising, and even revising of Cold War history takes place, is given prominence.

Multiculturalism and Democracy in North Africa Oct 30 2019 Investigating the connections between multiculturalism, minorities, citizenship, and democracy in North Africa, this book argues that multiculturalism in this region – and in the Arab world at large – has reached a significant level in terms of scale and importance. In the rest of the world, there has been a trend – albeit a contested one – toward a greater recognition of minority rights. The Arab world however, particularly North Africa, seems to be an exception to this trend, as Arab states continue to promote highly unitary and homogenizing ideas of nationhood and state unity, whilst discouraging, or even forbidding, minority political mobilization. The central theoretical premise of this book is that North Africa is a multicultural region, where culture is inherently linked to politics, religion, gender, and society, and a place where democracy is gradually taking root despite many political and economic hurdles. Addressing the lacuna in literature on this issue, this book opens new avenues of thought and research on diversity, linking policy based on cultural difference to democratic culture and to social justice. Multiculturalism and Democracy in North Africa will be of use to students and researchers with an interest in Sociology, Cultural Studies, and Political Science more broadly.

Secret Diplomacy Aug 21 2021 This volume investigates secret diplomacy with the aim of understanding its role in shaping foreign policy. Recent events, including covert intelligence gathering operations, accusations of spying, and the leaking of sensitive government documents, have demonstrated that secrecy endures as a crucial, yet overlooked, aspect of international diplomacy. The book brings together different research programmes and views on secret diplomacy and integrates them into a coherent analytical framework, thereby filling an important gap in the literature. The aim is to stimulate, generate and direct the further development of theoretical understandings of secret diplomacy by highlighting 'gaps' in existing bodies of knowledge. To this end, the volume is structured around three distinct themes: concepts, contexts and cases. The first section elaborates on the different meanings and manifestations of the concept; the second part examines basic contexts that underpin the practice of secret diplomacy; while the third section presents a series of empirical cases of particular relevance for contemporary diplomatic practice. While the fundamental conditions diplomacy seeks to overcome – alienation, estrangement and separation – are imbued with distrust and secrecy, this volume highlights that, if anything, secret diplomacy is a vital, if misunderstood and unfairly criticised, aspect of diplomacy. This book will be of much interest to students of diplomacy, intelligence studies, foreign policy and IR in general.

Factories of Memory: Cinematic Representations of the 12 September Military Coup Jan 14 2021 12 September 1980, the third successful military coup in the history of

Turkey has had a debilitating impact on the social, political and cultural life of the country. This study examines the representations of the 12 September coup through the lens of film as memory. Based on the content analysis of the two films, *Beynelmîlel* (2006) and *Bu Son Olsun* (2012), and their reception, this study examines the representations of the 12 September military coup by means of the concepts of cultural memory, communicative and material memory (memory of objects), and construes whether the reconstruction of this particular past event is challenged by the abovementioned cinematic products as a way to impinge upon the collective memories of this seminal event in Turkey.

Focusing on dance performances as well as on scenarios of cultural movements on a global scale, it not only challenges the concept of intercultural dance performances, but through its innovative approach also calls attention to the specific qualities of "interweaving" as a form of movement itself. Divided into four sections, this volume features an international team of scholars together developing a new critical perspective on the cultural practices of movement, travel and migration in and beyond dance.

Endgame for ETA Oct 23 2021 The violent Basque separatist group ETA took shape in Franco's Spain, yet claimed the majority of its victims under democracy. For most Spaniards it became an aberration, a criminal and terrorist band whose persistence defied explanation. Others, mainly Basques (but only some Basques) understood ETA as the violent expression of a political conflict that remained the unfinished business of Spain's transition to democracy. Such differences hindered efforts to 'defeat' ETA's terrorism on the one hand and 'resolve the Basque conflict' on the other for more than three decades. *Endgame for ETA* offers a compelling account of the long path to ETA's declaration of a definitive end to its armed activity in October 2011. Its political surrogates remain as part of a resurgence of regional nationalism - in the Basque Country as in Catalonia - that is but one element of multiple crises confronting Spain. The Basque case has been cited as an example of the perils of 'talking to terrorists'. Drawing on extensive field research, Teresa Whitfield argues that while negotiations did not prosper, a form of 'virtual peacemaking' was an essential complement to robust police action and social condemnation. Together they helped to bring ETA's violence to an end and return its grievances to the channels of normal politics.

compelling human story.

Strategic Cultures in Europe Nov 04 2022 European countries work together in crisis management, conflict prevention and many other aspects of security and defence policy. Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges. Yet, despite the repeated interaction, fundamental assumptions about security and defence remain remarkably distinct across European nations. This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey, drawing on the concept of 'strategic culture', in order to examine the chances and obstacles for closer security and defence cooperation across the continent. Along the lines of a consistent analytical framework, international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots.

Is the Planet Full? Jul 28 2019 What are the impacts of population growth? Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? While it is common to hear about the problems of overpopulation, might there be unexplored benefits of increasing numbers of people in the world? How can we both consider and harness the potential benefits brought by a healthier, wealthier and larger population? May more people mean more scientists to discover how our world works, more inventors and thinkers to help solve the world's problems, more skilled people to put these ideas into practice? In this book, leading academics with a wide range of expertise in demography, philosophy, biology, climate science, economics and environmental sustainability explore the contexts, costs and benefits of a burgeoning population on our economic, social and environmental systems.

Transnational Feminist Perspectives on Terror in Literature and Culture Aug 01 2022 This book offers a transnational feminist response to the gender politics of torture and terror from the viewpoint of populations of color who have come to be associated with acts of terror. Using the War on Terror in Afghanistan and Iraq, this book revisits other such racialized wars in Palestine, Guatemala, India, Algeria, and South Africa. It draws widely on postcolonial literature, photography, films, music, interdisciplinary arts, media/new media, and activism, joining the larger conversation about human rights by addressing the problem of a pervasive public misunderstanding of terrorism conditioned by a foreign and domestic policy perspective. Deb provides an alternative understanding of terrorism as revolutionary dissent against injustice through a postcolonial/transnational lens. The volume brings counter-terror narratives into dialogue with ideologies of gender, race, ethnicity, nationality, class, and religion, addressing the situation of women as both perpetrators and targets of torture, and the possibilities of a dialogue between feminist and queer politics to confront securitized regimes of torture. This book explores the relationship in which social and cultural texts stand with respect to legacies of colonialism and neo-imperialism in a world of transnational feminist solidarities against postcolonial wars on terror.

The Mormon Image in the American Mind May 06 2020 What do Americans think about Mormons - and why do they think what they do? This is a story where the Osmonds, the Olympics, the Tabernacle Choir, Evangelical Christians, the Equal Rights Amendment, Sports Illustrated, and even Miss America all figure into the equation. The book is punctuated by the presidential campaigns of George and Mitt Romney, four decades apart. A survey of the past half-century reveals a growing tension inherent in the public's views of Mormons and the public's views of the religion that inspires that body.

Human Frailties Jun 18 2021 Every day we hear stories about the consequences of human frailties for individuals, their families and friends, and their organizations. Some of

these stories are about alcohol and drug addiction and other harmful lifestyle choices, but human frailty also leads to all kinds of unethical and illegal behaviour. Individuals are convicted of bribery and corruption, price fixing, theft and fraud, sexual harassment and abuse of authority. Politicians fiddle their expenses, sports people cheat and fix matches and school and university students and teachers cheat to enhance exam results. Studies have shown that business students cheat more than others and efforts to teach ethical behaviour in business schools make little difference. The media who bring us stories of others' frailties themselves engage in unethical and illegal conduct in pursuit of an edge over their rivals. The contributions to this latest addition to Gower's Psychological and Behavioural Aspects of Risk Series place the spotlight on individuals, their behavioural choices and the consequences that follow for theirs and others' lives and careers. The conclusion is that people do have choices and options and that, whilst there are no easy or quick fixes in addressing self-limiting behaviours, successful avoidance of the worst outcomes can be achieved. This book provides guidance on the practical steps that need to be taken in order to gain a sense of proportion of what is important and of how we are doing, if we are to address our frailties and stop making unethical choices.

Structural Change and Industrial Development in the BRICS Nov 11 2020 This book provides a unique and timely analysis of the role of structural change in the economic development of Brazil, Russia, India, China, and South Africa (BRICS) with a consideration for the role of industry, and in particular manufacturing. The emergence of BRICS reflects an ongoing change in the international economic order. BRICS now account for very substantial part of global GDP, global manufactured value added and global manufactured exports. The book examines their economic experiences and structural change in BRICS over the past three decades, identifying both differences and commonalities, and deriving lessons for other industrializing countries. Section I contains comparative studies focusing on the commonalities and differences of the experiences of BRICS. Section II includes six country studies providing a more detailed analysis of the long-run experiences of each of the countries. Section III consists of a set of seven thematic studies focusing on specific topics such as global value chains, the role of transnational corporations in the food chain, the role of foreign versus domestic investment, the role of domestic versus foreign demand in economic growth the diffusion of environmental energy technology and the similarities, and the differences in industrial policies pursued in the five countries. The book contains a summary chapter that provides an integrated perspective of the various contributions from the point of view of poverty reduction and development. It asks, whether the patterns of structural change and industrial development that BRICS experienced, had an impact on poverty outcomes, and if so, what were the channels and the consequences?

Tarnished Hero Jun 06 2020 James mark Sullivan was part of the post-famine Irish immigration to the United States in the late 19th century. Overcoming family misfortune, he moved from newsboy to journalist to Yale-educated lawyer. Relocating to New York City, his association with Tammany Hall involved him in the "Crime of the Century" Becker-Rosenthal murder case, a role not previously explored. Sullivan's involvement won him a patronage appointment as ambassador to Santo Domingo. Scandals about graft and corruption forced his resignation. However, another factor which contributed to his dismissal, unexplained until now, was his effort at subversion of his government's policy of neutrality, which was connected to his ties to Irish nationalism. He later established the

first indigenous Irish film company with a pronounced Nationalist agenda, making several films which are now classics of the silent film era. Following the death of his wife and son during the influenza epidemic of 1918, he returned to the United States. Failing to revive his legal career, he removed to Florida, dying in relative obscurity.

Who Owns the World's Media? Apr 04 2020 Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. *Who Owns the World's Media?* moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

Tainted Democracy Feb 01 2020 Hungary, once the poster-child of liberal democracy, is fast becoming an autocracy under Viktor Orbán. After winning an absolute majority in 2010, Orbán launched a series of 'reforms', fundamentally undermining the country's twenty-year, post-Cold War liberal consensus. For supporters and foes alike, the rise and rise of Hungary's prime minister is a vivid example of how democracy can be subverted from within. Zsuzsanna Szélényi, a leading member of Orbán's Fidesz in its early years, has witnessed first-hand the party's shift from liberalism to populist nationalism. Offering an insider's account of Fidesz's evolution since its creation, she explains how the party rose to leadership of the country under Orbán and made sweeping legal, political and

economic changes to solidify its grip on power—from reining in the public media to slashing the number of parliamentary seats. She answers a key question: why has Orbán been so successful, winning widespread support within Hungary and wielding considerable influence in European politics? And how can Hungary's opposition party Together, which she co-founded in 2014, work to turn the country around? Underpinned by Szelényi's own experiences at the heart of Hungarian politics, *Tainted Democracy* offers accessible, nuanced insights into the global rise of populist autocracy—and how it can be challenged.

Security Community Practices in the Western Balkans Apr 16 2021 In the early 1990s, the Western Balkans were the scene of prolonged and bloody inter-ethnic wars. Numerous issues remain unresolved; Bosnia is a dysfunctional state; Kosovo a disputed territory; Macedonia a fragile republic, however, it is hard now to imagine the renewal of inter-state armed conflict. Investigating the causes and mechanisms driving peaceful transformation in the Balkans, this book examines developments in the region and contributes to discussions on security community building. Focusing on how different professional communities work together in the creation of regional peace and security, it sheds new light on how diplomats, policemen, soldiers and others brought about the transformation from conflict to peace through their everyday practices. Conducted collaboratively by a research community based within the region, this volume will be highly relevant to scholars and researchers studying the Balkans, regional security, security communities and policymakers.

Enhancing China's Medium-Term Growth Prospects Jun 26 2019 China's current growth model—which has delivered steady and robust growth for two decades and lifted some 500 million individuals out of poverty—has become too reliant on credit and investment, and has begun to experience diminishing returns. Delays in advancing the government's reform agenda will mean that vulnerabilities continue to grow and the probability of stalled convergence increases. On the other hand, with reforms to accelerate TFP growth and shift the economy away from its continued reliance on capital accumulation, China can grow at a healthy pace and maintain its convergence toward the level of high income economies. Evidence from China's provinces indicates that there is room to improve productivity and sustain such a convergence toward the level of more prosperous economies.

Greece's Horizons Oct 11 2020 The Greek economic crisis has imperilled the stability of the eurozone, generating much global anxiety. Policymakers, analysts, and the media have daily debated the course of the Greek economy, prescribing ways to move forward. This collection of essays progressively moves from an analysis of the causes of the crisis and the policy responses so far to a debate on some of the country's advantages and capabilities that should underpin its new development model and propel the return to growth. The book analytically chooses to view the glass as half-full and seeks to provide

motivation and inspiration for change by indicating some of the economic sectors where Greece maintains a comparative advantage. Therefore, it challenges the emerging picture of Greece as a country doomed to failure, where everything falls apart.

Non-State Challenges in a Re-Ordered World Jun 30 2022 There is a sprawling scholarship on violence, crime, and corrupt state rule; yet few have interpreted these challenges as transformative at the global scale and as a potential source of alternative, non-state, legitimacy. This volume challenges "Westphalian conservatism" in a provocative yet plausible manner, shedding light at the ubiquity and diversity of unfolding non-state agendas and at their effect on the imagined state community. Focusing on civil war parties, warlords, commercial providers of security, multinational companies and criminal organizations, the book directs attention to theoretical questions and policy challenges arising from non-state armed expansion. To accomplish this, the contributors present a range of case studies and comparisons within three thematic sections: the first takes stock of how, when, and in what measure state and state-system legitimacy are challenged by non-state violent or criminal activity; the second addresses the nature, effectiveness, and side-effects of different state-mandated reaction to non-state activities; and third focuses on the recombination of state and non-state actors contributing to processes of socio-political transformation. This volume provides a current analysis of different armed and violent actors encroaching on the state's monopoly of violence. It seeks to spark debate about global political change and will be of interest to students and scholars of global governance, global security, and international relations.

Kenya's Past as Prologue Feb 24 2022 During the run-up to Kenya's 2013 general elections, crucial political and civic questions were raised. Could past mistakes, especially political and ethnic-related violence, be avoided this time round? Would the spectre of the 2007 post-electoral violence positively or negatively affect debates and voting? How would politicians, electoral bodies such as the IEBC, the Kenyan civil society, and the international community weigh in on the elections? More generally, would the 2013 elections bear witness to the building up of an electoral culture in Kenya, characterized by free and fair elections, or would it show that voting is still weakened by political malpractices, partisan opinions and emotional reactions? Would Kenya's past be inescapable or would it prepare the scene for a new political order? *Kenya's Past as Prologue* adopts a multidisciplinary perspective - mainly built upon field-based ethnography and a selection of case studies - to answer these questions. Under the leadership of the French Institute for Research in Africa (Institut français de recherche en Afrique, IFRA), political scientists, historians and anthropologists explore various aspects of the electoral process to contribute in-depth analyses of the last elections. They highlight the structural factors underlying election and voting in Kenya including the political system, culture and political transition. They also interrogate the short-term trends and issues that influence the new political order. The book provides insight into specific case studies, situations and contexts, thus bringing nuances and diversity into focus to better assess Kenya's evolving electoral democracy.
