YSEC Yearbook of Socio-Economic Constitutions 2020 Mar 26 2020 This book presents the very first, interdisciplinarily grounded, comprehensive appraisal of a future "Common European Law on Investment Screening". Thereby, it provides a foundation for a European administrative law framework for investment screening by setting out viable solutions and evaluating their pros and cons. Daimler, the harbour terminal in Zeebrugge, or Saxo Bank are only three recent examples of controversially discussed company takeovers in Europe. The "elephant in the room" is China and its "Belt and Road Initiative". The political will in Europe is growing to more actively control investments flowing into the EU. The current regulatory initiatives raise several fundamental, constitutional and regulatory issues. Surprisingly, they have not been addressed in any depth so far. The book takes stock of the current rather fragmented regulatory approaches and combines contributions from leading international academics, practitioners, and policy makers in their respective fields. Due to the volume's comprehensive approach, it is expected to influence the broader debate on the EU's upcoming regulation of this matter. The book is addressed to participants from academia as well as to representatives from government, business, and civil society.

Designing with Xilinx® FPGAsFeb 05 2021 This book helps readers to implement their designs on Xilinx® FPGAs. The authors demonstrate how to get the greatest impact from using the Vivado® Design Suite, which delivers a SoC-strength, IP-centric and system-centric, next generation development environment that has been built from the ground up to address the productivity bottlenecks in system-level integration and implementation. This book is a hands-on guide for both users who are new to FPGA designs, as well as those currently using the legacy Xilinx tool set (ISE) but are now moving to Vivado. Throughout the presentation, the authors focus on key concepts, major mechanisms for design entry, and methods to realize the most efficient implementation of the target design, with the least number of iterations.
A User's Guide to Postcolonial and Latino Borderland Fiction Nov 14 2021 Why are so many people attracted to narrative fiction? How do authors in this genre reframe experiences, people, and environments anchored to the real world without duplicating "real life"? In which ways does fiction differ from reality? What might fictional narrative and reality have in common--if anything? By analyzing novels such as Arundhati Roy's The God of Small Things, Amitav Ghosh's The Glass Palace, Zadie Smith's White Teeth, and Hari Kunzru's The Impressionist, along with selected Latino comic books and short fiction, this book explores the peculiarities of the production and reception of postcolonial and Latino borderland fiction. Frederick Luis Aldama uses tools from disciplines such as film studies and cognitive science that allow the reader to establish how a fictional narrative is built, how it functions, and how it defines the boundaries of concepts that appear susceptible to limitless interpretations. Aldama emphasizes how postcolonial and Latino borderland narrative fiction authors and artists use narrative devices to create their aesthetic blueprints in ways that loosely guide their readers' imagination and emotion. In A User's Guide to Postcolonial and Latino Borderland Fiction, he argues that the study of ethnic-identified narrative fiction must acknowledge its active engagement with world narrative fictional genres, storytelling modes, and techniques, as well as the way such fictions work to move their audiences.
