Risk Assessment and Security for Pipelines, Tunnels, and Underground Rail and Transit Operations Jan 31 2020 Risk Assessment and Security for Pipelines, Tunnels, and Underground Rail and Transit Operations details a quantitative risk assessment methodology for systematically analyzing various alternatives for protecting underground rail, oil and gas pipelines, pipeline freight transportation, and other tunnel systems from terrorism threats and other disasters. It examines the engineering, environmental, and economic impacts and addresses both direct and collateral damage. The book describes how to employ the methodology of quantitative psychology for effectively assessing risk in homeland security, defense actions, and critical infrastructure protection. Using pipelines, tunnels, underground rapid rail, and transit systems as examples, it maintains an emphasis on applying quantitative psychology to risk management in the areas of homeland security and defense. Outlines the background and system operations of pipelines, tunnels, underground rail, and transit systems as well as other super-speed futuristic trains Covers materials used for fabricating weapons of mass destruction and operations for terrorism Deals with the probabilistic risk estimation process, event tree analysis, and fault tree analysis Discusses the risk and vulnerability assessment tools and methodologies used by experts and governmental agencies Approved for public release by the U.S. Federal Government, this book presents regulations, standard processes, and risk assessment models recommended by the U.S. Department of Homeland Security and other federal and state agencies. Describing how to evaluate terrorism threats and warnings, it details protocols for preventive measures and emergency preparedness plans that are based on economic analysis. With comprehensive coverage that includes risk estimation and risk acceptability analysis, the book provides a foundational

understanding of risk and the various defensive systems that can improve safety and security as well as thwart terrorists' efforts to sabotage critical infrastructure.

Steueroptimale Gestaltung grenzüberschreitender M&A-Transaktionen May 05 2020 Grenzüberschreitende Geschäftstätigkeiten bei Unternehmen werden im Zuge der Globalisierung und Internationalisierung immer mehr zur Normalität. Sie bieten für Käufer und Verkäufer wirtschaftlich große Chancen, die jedoch durch große Risiken begleitet werden. Eine frühzeitige und effiziente Strukturierung der M&A-Transaktion ist deshalb entscheidend. Bei Unternehmenskäufen bzw. -verkäufen beeinflussen steuerliche Fragestellungen sowohl die Bewertung des Kaufgegenstandes als auch die Strukturierung der Veräußerung. Deren Komplexität steigt aufgrund sich verändernder in- und ausländischer Rahmenbedingungen zunehmend. Die Steuerplanung im Rahmen von M&A-Transaktionen ist äußerst komplex und erfordert eine ganzheitliche Optimierung. Die vorliegende Arbeit analysiert systematisch die Besteuerung grenzüberschreitender M&A-Transaktionen zwischen Deutschland und den USA und entwickelt ein gesamteinheitliches Konzept zur Steueroptimierung internationaler Unternehmenskäufe resp. -verkäufe. Es werden eine genaue Definition des Begriffs der M&A-Transaktion sowie die steuerlichen Motive für die Durchführung einer grenzüberschreitenden M&A-Transaktion herausgearbeitet. Aus den hieraus resultierenden Zielen werden Steuerplanungsüberlegungen mit Fokus auf grenzüberschreitende M&A-Transaktionen angestellt. Im Mittelpunkt steht die steueroptimale Gestaltung einer Akquisition sowohl aus Sicht des Erwerbers als auch des Veräußerers. Ausgehend von der Steuerplanung grenzüberschreitender M&A-Transaktionen, werden im Hinblick auf die beiden Länder Deutschland und USA die zu untersuchenden Fallkonstellationen gebildet. Das gesamteinheitliche Konzept zur Steueroptimierung internationaler Unternehmenskäufe resp. -verkäufe sowie die Belastungskonsequenzen der einzelnen Fallkonstellationen werden auf Basis des aufgestellten Zielsystems kritisch hinterfragt.

Zur Dogmatik des Verhältnismäßigkeitsgrundsatzes im Völkerrecht der bewaffneten Konflikte und im Völkerstrafrecht Mar 27 2022 Art. 8 II b) iv) IStGH-Statut sanktioniert den, der einen offensichtlich unverhältnismäßigen Angriff durchführt. Aber was ist, wenn nicht-erforderliche Angriffsmittel eingesetzt werden, obwohl militärischer Vorteil und Kollateralschaden in einem angemessenen Verhältnis zu einander zu stehen scheinen? Dieser Frage geht das Werk auf den Grund. Dabei wird zunächst die Prinzipientheorie auf das Konfliktsvölkerrecht angewandt und sodann die Entstehungsgeschichte des ZP I im Hinblick auf den Zusammenhang von Erforderlichkeit und Verhältnismäßigkeit im engeren Sinne analysiert. Die Ergebnisse beider Ansätze münden im Entwurf eines "targeting cycle", aus dem sich ergibt, dass auch derjenige, der nicht-erforderliche Waffen einsetzt, ein Kriegsverbrechen begeht.

The Effect of Diplomacy Dec 24 2021 This book characterizes the existing relationships among Liberia, China and the United States of America as “triangular”. The three countries sampled are known to be democratic states but run different forms of governments- both Liberia and the United States run a Republican form of government, while China runs a socialist system of government. Both United States and China have been chosen for the purpose of this study because they are stable, and are the world’s economic powers. The two

countries are actively engaged with African leaders, governments and states. These two states have been selected because they depict and reflect an alteration in governance, resources and economic powers. This book presents an in-depth, insightful analysis of critical issues on the continent and beyond. These issues include Africa in International Relations, the new scramble for the continent's richer resources, and the core causes of poverty, corruption, bad governance and counter-terrorism in Africa. The deep political "love" towards African governments and states by the two global economic powers in recent time realism argues that it is it that has made the continent the frontline competition for oil, and the two main competitors for Africa are U.S. and China. This study provides a vivid picture of Liberia, U.S. and China's triangular relations, a detailing of the three countries long standing bilateral and multilateral relationship. It goes further to discuss few African states relations with China and the U.S. Both U.S. and China are the world's two leading economic powers and are permanent members of the United Nations Security Council with veto and are competing actors on the international stage. In recent time the two countries have been engaged in a trade war, a situation which is having an adverse effect on global trade. The dissertation, which traces the history of Liberia, U.S. and China's triangular relations, their engagement in Africa and foreign aid support towards African governments and states, is a unique research and stands as a "milestone", and "result-oriented". The book is based on proven scholarly writings. The study attempts to validate existing publications or wide-ranging perceptions about the world's leading economic powers- China and U.S presence in Africa. The study highlights China and the U.S. presence in Africa and their engagement with African leaders, governments and nations. Chapter one is the general introduction and presents the background of the study, statement of the problem, research focus, objectives, justification, and significance of the entire research. Chapter two traces the history and examines Liberia, U.S. and China engagement and presence in Africa and the impacts of foreign aid in Africa; and chapter three provides the methods employed during the study. These methods include research strategy and design, data collection as well as data analysis, sampling method, structure review and limitations of the study. Chapter four provides a vivid picture of Liberia, U.S. and China's triangular relations, while chapter five evaluates the successes and challenges of Liberia's foreign relations, covering the last seven decades from one regime and to the other, from the presidency of ex-president Joseph Jenkins Roberts to present. Chapter Six provides insights of America and China's foreign aid to Africa and also analyzed U.S. foreign assistance to African governments and states, and compares that to China's foreign aid assistance to African government. Chapter Seven of the study emphasizes on the curse of rampant corruption and the scourge of bad governance by African leaders and governments and the role of corrupt African leaders, political bureaucracies, foreign capitalists and authoritarian officials. Chapter Eight assesses the role of contemporary Liberian media and its impact on democratic governance and national development. The work discusses in detail the western media's perception of Africa and how the global media have been able to dump negative news materials and information. Chapter Nine examines the Liberian political system and democratic governance in the context of the new world order, respect for constitutionalism and looks at the uncompromising role of Liberian women in contemporary politics, and narrates how Liberia became the torch-bearer of democracy in Africa. Chapter Ten sums up the findings of the study, presents the summary and gives my recommendations and offer further opinions about future research. Bibliography and appendixes are treated separately out of these chapters. The book contains 566 pages, 3,123 paragraphs, 202,916 words and 2,470,268 characters both single and double spacing while it contains 9,750 punctuation marks, 855 in-text citations. The research work also contains 590 references and 16,265 lines. The dissertation is organized into three major parts and comprises ten major chapters; it sums up with the findings of the study and gives recommendations.

Fundamentals of Automotive Technology Jun 17 2021 *Fundamentals of Automotive Technology: Principles and Practice* covers crucial material for career and technical education, secondary/post-secondary, and community college students and provides both rationales and step-by-step instructions for virtually every non-diagnosis NATEF task. Each section provides a comprehensive overview of a key topic area, with real-life problem scenarios that encourage students to develop connections between different skill and knowledge components. Customer service, safety, and math, science, and literary principles are demonstrated throughout the text to build student skill levels. Chapters are linked via cross-reference tools that support skill retention, critical thinking, and problem-solving. Students are regularly reminded that people skills are as important as technical skills in customer service fields.
