Getting the books Revolutionary Wealth Alvin Toffler now is not type of inspiring means. You could not on your own going bearing in mind books amassing or library or borrowing from your connections to admission them. This is an entirely simple means to specifically get guide by on-line. This online broadcast Revolutionary Wealth Alvin Toffler can be one of the options to accompany you subsequent to having other time.

It will not waste your time. agree to me, the e-book will categorically sky you further matter to read. Just invest little epoch to right of entry this on-line statement Revolutionary Wealth Alvin Toffler as skillfully as review them wherever you are now.

[Revolutionary Wealth](#) Nov 05 2022 Explores how tomorrow's wealth might be made and by whom, examining the future economy of fields where growth opportunity exists, and voicing concerns about America's health, pension, education, and legal systems.

Prosumer Revisited May 31 2022 Papers from conference held March 2009 at the Wolfgang Goethe-Universit'at Frankfurt.

Creating and Delivering Your Value Proposition Jan 03 2020 In recent years, developing a value proposition has become a prime consideration for businesses. A value proposition is an analysis and quantified review of the business benefits, costs and value that a company can deliver to prospective customers and customer segments. Creating and Delivering your Value Proposition provides guidance for business leaders - demonstrating why having a strong value proposition is so important for a company. This practical new title shows readers how to build, deliver and harness value propositions to create profitable growth for a business, by utilizing the experience of clients and customers. Featuring global case studies and examples, Creating and Delivering your Value Proposition is an essential guide to understanding and developing a value-focused strategy for all senior practitioners.

Transparency and the open society Aug 10 2020 Greater transparency is increasingly seen as the answer to a wide range of social issues by governments, NGOs and businesses around the world. However, evidence of its impact is mixed. Using case studies from around the world including India, Tanzania, the UK and US, Transparency and the open society surveys the adoption of transparency globally, providing an essential framework for assessing its likely performance as a policy and the steps that can be taken to make it more effective. It addresses the role of transparency in the context of growing use by governments and businesses of surveillance and database driven decision making. The book is written for anyone involved in the use of transparency whether campaigning from outside or working inside government or business to develop policies.

The New Science of Success Oct 31 2019 A "How-to" on surviving and prospering during a new economic shift in business

Langfristig investieren Oct 12 2020 Manche Menschen halten die Arbeit des Datensammelns für geradezu tödlich langweilig. Andere sehen sie als Herausforderung. Und Jeremy Siegel hat daraus eine Kunstform gemacht. Man kann die Bandbreite an Argumenten, die Klarheit und das pure Vergnügen nur bewundern, mit denen Professor Siegel sein Anliegen untermauert, Aktien als Langfristanlage zu empfehlen. Dieses Buch enthält viel mehr als der Titel besagt. Sie lernen eine Menge über Wirtschaftstheorie, garniert mit einer faszinierenden Geschichte der Kapitalmärkte und der amerikanischen Wirtschaft. Indem Professor Siegel die historischen Daten mit maximaler Effektivität einsetzt, verleiht er den Zahlen ein Leben und eine Bedeutung, die sie in einem weniger fesselnden Umfeld niemals hätten.

Caring for School-Age Children Jun 27 2019 CARING FOR SCHOOL-AGE CHILDREN, 6th Edition, presents the most pertinent information needed by those involved in after-school programs. Current research has established the importance of quality after-school programs due to their tremendous impact on children's academic achievement, overall happiness, and self-esteem. To address this reality, the new edition presents the latest research and information on school-age child care, and offers numerous practical applications and activities that can be put to use immediately in a child care setting. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

[Funky Business Forever](#) Sep 10 2020 Looks at the issues affecting business today, including capitalism, politics, technology, the environment, and talent.

The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies Jul 29 2019

Future Wars Aug 22 2021 A New York Times bestselling author and military expert predicts and explores ten regions where war may erupt in the 1990s. Future Wars analyzes the probable course and outcome of wars in Central America, Southern Africa, China/Russia, Libya/Egypt, and more.

The Little Money Book Jun 07 2020 They say money is the root of all evil. That's debatable, but one thing that's not is that money and its attendant enterprises—buying, selling, lending, borrowing, credit cards, the stock market and banking—is an inescapable component of the fabric of modern life. How did this come to be? Money and the complex system that makes it work is a man-made product that we invented and yet, like Frankenstein, it has us all in its grip. From the poorest to the wealthiest, we worry about money. This highly accessible and easy-to-read synthesis of complex subjects asks some of the obvious questions about money and finance that few of us stop to think about. For instance, what is the real "value" of money? Well, astonishingly, nobody agrees. But most people seem to accept that it is lent into existence by the commercial banks. When you stash money in the bank, they must keep around 8 percent of that loan on deposit—in case there's a run on the bank—but all the rest is lent out again many times over. In other words, most of our mortgages

and bank loans are created as if by magic by a stroke of the pen. That's the strange truth behind modern money. We don't mine it, we don't find it on a beach, it bears no relation to anything real, but still some people have vast amounts of it and some people have none at all. And we hardly ever talk about it.

*Six Capitals* Aug 29 2019 This is the story of a 21st century revolution being led by the most unlikely of rebels: accountants. It is only the second revolution in accounting since double-entry bookkeeping emerged in medieval Italy - and it is of seismic proportions, driven by the 2008 financial crash and the environmental crisis. The changes it will wreak are profound and far-reaching. They will transform not only the way the world does business but alter the very nature of corporate capitalism. The accounts of nations and corporations are vital to the 21st century global economy. They translate value into the language of modern times - numbers and money - in the shape of GDP and profit figures. They rule the world. But increasingly the world is coming to realise that the seemingly endless growth that capital offers us is in fact limited by the earth's resources and comes at a huge price to the planet and our own wellbeing. It simply cannot be sustained. This revolution demands that we start accounting for nature and society. It urges us to rethink our idea of capital, insisting that the familiar categories of industrial and financial capital bequeathed by the mercantile and industrial ages be broadened to include four new categories of wealth: intellectual, human, social and natural. Incorporating them into our financial statements and GDP figures could be the only way to address the many crises we face today. Just two years ago this revolution seemed idealistic and unlikely. Today it is unfolding at speed. 2012 was the sea-change year, in which two key initiatives took root: an international movement to transform corporate accounting, and the rise of natural capital accounting for nations and the global economy. *Six Capitals* tells the story of their rise to prominence, which signals a new age in capitalism, and evaluates their promise - and their threat. The revolution is here. But will we embrace its potential or deny its urgency? Can accountants save the planet - or will we destroy it for future generations?

*Powershift* Oct 04 2022 Alvin Toffler's *Future Shock* and *The Third Wave* are among the most influential books of our time. Now, in *Powershift*, he brings to a climax the ideas set forth in his previous works to offer a stunning vision of the future that will change your life. In *Powershift*, Toffler argues that while headlines focus on shifts of power at the global level, equally significant shifts are taking place in the everyday world we all inhabit—the world of supermarkets and hospitals, banks and business offices, television and telephones, politics and personal life. The very nature of power is changing under our eyes. *Powershift* maps the “info-wars” of tomorrow and outlines a new system of wealth creation based on individualism, innovation, and information. As old political antagonisms fade, Toffler identifies where the next, far more important world division will arise—not between East and West or North and South, but between the “fast” and the “slow.” In *Powershift*, Alvin Toffler has formulated the deepest, most comprehensive synthesis yet written about the civilization of the twenty-first century. It is one of the most important books you will ever read. Praise for *Powershift* “[A] sweeping synthesis . . . by placing the accelerated changes of our current information age in the larger perspective of history, Mr. Toffler helps us to face the future with less wariness and more understanding.”—*The New York Times Book Review* “An insightful guide to a bewildering present and a frightening future . . . thought-provoking on every page.”—*Newsday*

*Toward the Sustainable Development of Agriculture and the Rural Milieu* Dec 02 2019

*Infinite Wealth* Oct 24 2021 With advances in information technology people are being empowered to connect, collaborate, create wealth and self-order without bureaucracy or representative government. *Infinite Wealth* shows how the frantic change within organizations is part of a process of creating a new type of wealth creation enterprise enabled through the Internet. *Infinite Wealth* illuminates our environment, allowing us to clearly see the big picture and how the individual pieces of today's activity fit into a coherent new worldview, thus making sense of today's chaos. This revolutionary synthesis empowers you to understand what is occurring and to make effective personal choices regarding your work and life.

*Granddad's Money Camp* Nov 24 2021

*Leap for the World* Nov 12 2020 A young Korean woman with a heart full of passion and determination made a leap for the world by setting out on an impassioned quest for her lifelong career. Emboldened by the lonely days of studying abroad in Australia and undaunted by the challenges she faced working in foreign countries, she became the successful founder and CEO of her company, CEO SUITE. With 18 centers throughout Asia (as of 2015), she is an inspiring example of hard work, faith and perseverance. Mee has appeared in many broadcasts including *Age of Global Success* by KBS Korea, *The CEO* by MBN Korea and *The INNERview* by Arirang TV. Her business has been featured in hundreds of global media channels such as *New Straits Times*, *Business Times*, *Asian Wall Street Journal*, *Cosmopolitan*, and *Far Eastern Economic Review*. She received an annual Alumni Award of Merit (2008) from Yonsei University Korea and Future Female Leaders Award from *The Women's News* (2011). She is a Founder of the CEO SUITE Charity Foundation; a vice president of the Korean Chamber of Commerce in the Republic of Indonesia; a member of WPO (World President Organization), Indonesia Chapter; and a member of ANGIN (the first Angel investors in Indonesia). She also served as a President of Sudirman Rotary Club in Indonesia and founded Learning Farm Indonesia (an organic farm/learning center for street children).

*My Life, My Smartphone* Jan 15 2021 This book, “My Life, My Smartphone” is the life history of the author for 40 years from the 1980s. Succeeding to some extent by organizing, editing and utilizing data information materials with a memo in step 1, with an electronic notebook in step 2, with mobile phone in step 3, and with smartphone in step 4, this book pointing this out to millions of people around the world. The contents of this book are summarized as follows: 1~ This book guides you through how to organize, edit, and utilize data information materials with a smartphone, especially memos and AI speakers. 2~ In terms of the effect, it greatly increases the working effect of employees of large corporations, public officials, and the self-employed. Thus, I believe that if Apple purchases this book in bulk and have all its employees read it, work efficiency will increase significantly. 3~ By planning this utilization as a meditation prayer, and creating productive knowledge through creative Idea compassion, love, and empathy that spreads the wings of the imagination and shines, this leads them to be healthy and happy, successful in their work and to make big money even in the face of a global crisis, including COVID-19. 4~ We are also providing the world's first software that reminds you how to quickly organize and edit a lot of data, information, and materials that have gold in the hardware called smartphones, and how to use them for a long time. 5~ By letting them know the great utilization of smartphones and encouraging most of the millions of people around the world who have not yet used smartphones to purchase smartphone, I believe that smartphone sales can explode to 4 billion units in the future.

*Revolutionary Wealth* Apr 29 2022 Starting with the publication of their seminal bestseller, *Future Shock*, Alvin and Heidi Toffler have given millions of readers new ways to think about personal life in today's high-speed world with its constantly changing, seemingly random impacts on our businesses, governments, families and daily lives. Now, writing with the same rare grasp and clarity that made their earlier books classics, the Tofflers turn their attention to the revolution in wealth now sweeping the planet. And once again, they provide a penetrating, coherent way to make sense of the seemingly senseless. *Revolutionary Wealth* is about how tomorrow's wealth will be created, and who will get it and how. But twenty-first-century wealth, according to the Tofflers, is not just about money, and cannot be understood in terms of industrial-age economics. Thus they write here about everything from education and child rearing to Hollywood and

China, from everyday truth and misconceptions to what they call our "third job"—the unnoticed work we do without pay for some of the biggest corporations in our country. They show the hidden connections between extreme sports, chocolate chip cookies, Linux software and the "surplus complexity" in our lives as society wobbles back and forth between depressing decadence and a hopeful post-decadence. In their earlier work, the Tofflers coined the word "prosumer" for people who consume what they themselves produce. In *Revolutionary Wealth* they expand the concept to reveal how many of our activities—whether parenting or volunteering, blogging, painting our house, improving our diet, organizing a neighborhood council or even "mashing" music—pump "free lunch" from the "hidden" non-money economy into the money economy that economists track. Prosuming, they forecast, is about to explode and compel radical changes in the way we measure, make and manipulate wealth. Blazing with fresh ideas, *Revolutionary Wealth* provides readers with powerful new tools for thinking about—and preparing for—their future.

*Die Zukunft* Feb 25 2022 Al Gore, der ehemalige Vizepräsident der USA, Friedensnobelpreisträger und Bestsellerautor, wagt in seinem neuen Buch einen Blick in die Zukunft. Er identifiziert diejenigen Kräfte, die unser Leben in den kommenden Jahrzehnten am stärksten verändern werden, und zeichnet so ein beeindruckend detailliertes Bild der Welt von morgen. Denn, so Gore, nur wem es gelingt, die Chancen und Risiken der Zukunft zu erkennen, kann sie auch gestalten. Wir leben in einer Zeit umwälzender Veränderungen. Aus der Vielzahl der Kräfte, die unsere Welt formen, greift Al Gore diejenigen heraus, die unsere Zukunft am radikalsten prägen werden: Neben der weiter zunehmenden Globalisierung der Wirtschaft sind das die Verschiebung der geopolitischen Machtverhältnisse, eine fehlgeleitete, allein auf Wachstum ausgerichtete Wirtschaftspolitik, der nicht nachhaltige Umgang mit unserer Umwelt und unseren Ressourcen sowie die Revolutionen in der digitalen Kommunikation, in der Biotechnik, den Neurowissenschaften und der Gentechnik. Inwiefern wir diese Entwicklungen gewinnbringend nutzen können und ab wann sie für uns zum Risiko werden, das debattiert Gore in seinem neuen, umfassenden Bestseller über unsere Zukunft.

Information Technology for Participatory Development Sep 30 2019 This Book, Putting Together Papers Presented At The Special Session On Information And Local Administration Of The National Seminar On Right To Information, Attempts To Deal With The Various Aspects Related To Information Technology For Participatory Development.

*Coping with Continuous Change in the Business Environment* Apr 05 2020 Aimed at knowledge management professionals and students in the field of knowledge management, information science, information systems and software engineering, the book provides answers to the 'what-is' and 'why-is' questions with regard to knowledge management. It investigates the concepts and elements, the drivers, and challenges involved in knowledge management. In the second part of the book the 'how' and 'with-what' characteristics of knowledge management are covered. Although knowledge management is primarily concerned with non-technical issues, this book concentrates on the technical issues and challenges. A new technology framework for knowledge management is proposed to position and relate the different knowledge management technologies as well as the two key applications of knowledge management, namely knowledge portals and knowledge discovery (including text mining). Best practices for a number of knowledge management issues are discussed. A new technology framework for knowledge management is proposed to position and relate the different knowledge management technologies. Written by internationally acknowledged KM researchers and practitioners.

The Global Entrepreneur Dec 26 2021 WEALTH CREATING BUSINESS OPPORTUNITIES WHO ARE GLOBAL ENTREPRENEURS? There is a new breed of entrepreneurs today - the Global Entrepreneur. They are different from past entrepreneurs; they are completely wired for Information Age businesses, they know how to harness knowledge and technology, and frequently engage a network of global business partners to help operate their international ventures. The Global Entrepreneur understands that the soft assets of knowledge and technology are greater creators of wealth than hard assets such as land, equipment, factories and mines. They realize the management models and organizational paradigms of the Industrial Era are giving way to a fresh appreciation of virtualization, strategic alliances, empowerment of individuals, and a new understanding that plentitude creates wealth. What is really new is that Global Entrepreneurs frequently use virtual organizations, virtual products, and micro-virtual manufacturing processes to develop efficient global ventures. They are strongly motivated towards creating a global enterprise for generating substantial personal wealth. WHO SHOULD BUY THIS BOOK? There are three individual groups who will benefit from reading this book. Nascent Entrepreneurs. These are individuals who are thinking about owning a business, but haven't taken the leap. This book provides a roadmap and shows you the essentials for starting a successful business. Small Business Owners. Small and medium enterprises are finding it increasingly difficult to achieve new growth in today's economic environment. This book shows business owners how to explore and find extraordinary growth in developing fast-growing foreign markets. Students. College students in the 1600 U.S. institutions that teach entrepreneurship can use this book to better understand the dynamic contribution of entrepreneurship to world economic growth and wealth creation.

*Cyber Politics In Us-china Relations* Mar 05 2020 Cyber issues are of utmost importance and sensitivity for US-China relations today. The combination of cyber and politics is also developing from 'low politics' to 'high politics'. This book discusses cyber politics in US-China relations from four distinct aspects: first, the overall analysis of the role and manifestation of cyber politics in international relations from a theoretical perspective; second, the main issues regarding cyber politics in US-China relations; third, the factors influencing cyber politics in US-China relations; and fourth, the prospect and practice of cyber politics in US-China relations. Based on an exploration of issues in cybersecurity, cyberspace governance, ideology and the power tussle in cyberspace between the US and China, as well as an analysis of the factors influencing cyber politics in the bilateral relations from the perspective of strategy, discourse, and trust, this book asserts that cyberspace is rapidly becoming a new arena for the geopolitical games between the US and China. A new form of cyber geopolitics is thus emerging.

*Axial Shift* Mar 17 2021 This book uses historical analysis, constitutional economics, and complexity theory to furnish an account of city subsidiarity as a legal, ethical, political, and economic principle. The book contemplates subsidiarity as a constitutional principle, where cities would benefit from much wider local autonomy. Constitutional economics suggests an optimal limit to jurisdictional footprints (territories). This entails preference for political orders where sovereignty is shared between different cities rather states where capital cities dominate. The introduction of city subsidiarity as a constitutional principle holds the key to economic prosperity in a globalizing world. Moreover, insights from complexity theory suggest subsidiarity is the only effective response to the 'problem of scale.' It is a fitness trait that prevents highly complex systems from collapsing. The nation-state is a highly complex system within which cities function as 'attractors.' The collapse of such systems would ensue if there were strong coupling between attractors. Such coupling obtains under legal monism. Only subsidiarity can make the eventuality of collapse improbable. The emergent and self-organizing properties of subsidiarity entail a shift in policy emphasis towards cities with a wide margin of autonomy.

*War and Anti-war* Jan 27 2022 This book examines the subject that has haunted mankind since its origins - war. Beginning with an analysis of warfare in the past, it offers insights into today's conflicts - and a portrait of the future face of battle. Its premise is that the forms of war follow forms of economic activity. In pre-industrial agrarian societies, men fought hand-to-hand. With the age of mass production came

mass destruction - the savage bombing sorties of World War II and Vietnam, as well as the omnipresent threat of nuclear annihilation. The smart bombs of the Gulf conflict, it warns, are precursors of what war could become as the information age unfolds: a battlefield dominated by intelligent weapons systems, from tiny, antlike robots that crawl into an adversary's headquarters to autonomous arms that, once programmed, decide when, and towards whom, they fire. The authors show how changes in the media business and the global economy are blurring the distinction between news and psychological warfare, and they call for bloodless battle (anti-war) as a new approach to world peace.

Machtbeben Sep 03 2022

The Savvy Investor's Guide to Building Wealth Through Traditional Investments Feb 13 2021 Would you like to be a millionaire? While alternative investments are an option, this easy-to-read guide focuses on traditional investments - stocks, bonds, and cash or cash equivalents. Especially written for novice investors, if you want to become a millionaire and don't have the luck to buy a lottery ticket, this is the guide for you.

Six Capitals Updated Edition Feb 02 2020 FULLY REVISED AND UPDATED 'A fascinating read. Gleeson-White artfully captivates the reader as she explores the fast-evolving language, metrics, actors and laws that are profoundly reshaping "capital" in the 21st century.' KATE RAWORTH, author of Doughnut Economics Climate change is here and capitalism is implicated: it's programmed to privilege profit and growth over human communities and the living earth. We need to change this system - and we need to do it now. Six Capitals charts the rise of four movements designed to overthrow capitalism as we know it: multi-capital accounting, for society, nature and profit; the push for a new corporation legally bound to benefit nature and society while making a profit; ecosystem accounting for nations; and legal rights for nature, which resonate with indigenous earth-centred laws. These movements are critical for the future of human life on this planet. Together they override the profit-driven modern corporation, the growth-driven nation state and the legal status of the natural world as lifeless property. Multi-capital and ecosystem accounting, benefit corporations and the rights of nature movement are here to stay. Six Capitals tells their story, from their first emergence in the postwar era to today. This revised, updated edition is for the new generations of business leaders, entrepreneurs, activists, accountants, economists, scientists, farmers, food growers and distributors, teachers, parents, politicians, bureaucrats and concerned citizens everywhere. 'broaden financial reports to include measures of social and environmental issues and just watch how it changes the behaviour of business people. Gleeson-White makes a good case for the success of her unlikely revolutionaries.' ROSS GITTINS, Sydney Morning Herald 'Six Capitals reveals the critical role of accounting in reimagining the way we do business and make policy in the twenty-first century. It's time for everyone to pay attention.' CARL OBST, lead author, United Nations System of Environmental-Economic Accounting

Infinite Wealth Aug 02 2022 With advances in information technology people are being empowered to connect, collaborate, create wealth and self-order without bureaucracy or representative government. Infinite Wealth shows how the frantic change within organizations over the past twenty years, is part of a process of creating a new type of wealth creation enterprise enabled through the Internet. The transition from bureaucracy to mass privatization is part of a shift from an Industrial Age to an Information Age civilization. Two hundred years ago we did the same thing as all of the Agricultural Age social institutions were replaced by those of the Industrial Age. Today we are witnessing a shift towards owning partners or networks of self-directed teams connected through the Internet. It is a win/win collaboration where the more an individual partner wins the (financially and otherwise) more the organization, partners, customers and all stakeholders win. As we move closer to mass privatization, Internet based organizations arise with thousands of independent owning partners specializing in various niches. Infinite Wealth illuminates our environment, allowing us to clearly see the big picture and how the individual pieces of today's activity fit into a coherent new worldview, thus making sense of today's chaos. This revolutionary synthesis empowers you to understand what is occurring and to make effective personal choices regarding your work and life. Regardless of who you are, presently you have the unprecedented opportunity to significantly increase your personal wealth and happiness while helping to create a thriving win/win world. Synthesizes management trends to show a new system for organizing work, business and society for the Information age Shows why in the next ten years you are likely to become wealthy while helping to create a win/win world Passionately written, globally focused, and grounded in the author's extensive business experience

Powershift Mar 29 2022

Material Dharma May 19 2021 In this book, the author integrates science, economics, politics and religion to formulate a materialist Hindu philosophy, the purpose of which is to achieve a superpower India, the core Hindu civilization, by creating superpower people, and reforming and homogenizing Hindu society. In simple terms his theory is that the left-leaning secular liberal elite ruling India for the past fifty years has forsaken God, and in return, God has forsaken India. A return to God and unleashing powerful creative, destructive and homogenizing forces originating from Darwinian capitalism is the way for India and Indians to regain their lost glory. The book discusses the three basic forms of power, i.e. wealth, violence and knowledge and how to gain them for self and nation. The author blends concepts from emerging computing technology such as fuzzy logic, genetic algorithms, optimization and neural networks with social and biological sciences and shows how the advice rendered in the battlefield setting of the Bhagavad-Gita is very relevant in our emerging Darwinian and materialistic civilization.

Powershift May 07 2020 Toffler argues that while headlines focus on shifts of power at the global level, equally significant shifts are taking place in our everyday world--supermarkets, hospitals, banks, television, and politics. As old antagonisms fade, Toffler identifies where the next, far more important world division will arise . . . between the "fast" and the "slow". "Thought-provoking on every page".--Newsday.

Wisdom of Wealth Apr 17 2021 The study of wealth is so fascinating. Having wealth is a dream for every human being. By pursuing different professions, we all chase wealth. These quotes contain a wealth of wisdom in a single line. These are timeless and immeasurable treasures of wisdom. Wealth is the product of man's capacity to think. - Ayn Rand Markets always climb the wall of worry. - Rakesh Jhunjhunwala Gold is the money of kings; silver is the money of gentlemen; barter is the money of peasants; but debt is the money of slaves. - Norm Franz Money: whether you have it or not, whether you want it or not, whether you like it or not, it will define your days. - Phil Knight Nine-tenth of wisdom consists in being wise in time. - Theodore Roosevelt Whenever you find yourself on the side of the majority, it's time to pause and reflect. - Mark Twain Traditional wisdom is long on tradition and short on wisdom. - Warren Buffett Never mistake motion for action. - Earnest Hemmingway

Creating a New Civilization Jul 01 2022 Describes the forces that are shaping the future, discusses changes in family life, business, technology, culture, and values, and looks at the state of democracy in the next century

Mabira Forest Giveaway Jul 09 2020 The environmental challenges facing Uganda and the East African region are real. Unplanned natural resource exploitation by corrupt governments, criminal networks, bad governance, and changing rainfall patterns have negatively impacted the lives of millions of Africans. A nascent movement of environmentalists is now making their voices heard to reclaim their land, resources, and future. Now, author Tony Akaki adds his voice and perspective in addressing the unfolding environmental disaster by

*focusing on the Mabira Forest giveaway plan proposed by Ugandan President Yoweri Museveni to give nearly one-quarter of the Mabira Forest to the Sugar Corporation of Uganda (SCOUL) owned by the Mehta Group to facilitate the growth of more sugarcane. Akaki raises all the issues regarding the impact on the environment, the potential to affect ecotourism, medical research on indigenous flora and fauna, the loss of rain supplying Lake Victoria, and the potential for environmental disaster with deforestation. He provides a powerful argument for saving the environment and fighting to preserve Uganda's forests and natural resources.*

*The Open-Source Everything Manifesto Dec 14 2020 What the world lacks right now—especially the United States, where every form of organization from government to banks to labor unions has betrayed the public trust—is integrity. Also lacking is public intelligence in the sense of decision-support: knowing what one needs to know in order to make honest decisions for the good of all, rather than corrupt decisions for the good of the few. The Open-Source Everything Manifesto is a distillation of author, strategist, analyst, and reformer Robert David Steele life's work: the transition from top-down secret command and control to a world of bottom-up, consensual, collective decision-making as a means to solve the major crises facing our world today. The book is intended to be a catalyst for citizen dialog and deliberation, and for inspiring the continued evolution of a nation in which all citizens realize our shared aspiration of direct democracy—informed participatory democracy. Open-Source Everything is a cultural and philosophical concept that is essential to creating a prosperous world at peace, a world that works for one hundred percent of humanity. The future of intelligence is not secret, not federal, and not expensive. It is about transparency, truth, and trust among our local to global collective. Only "open" is scalable. As we strive to recover from the closed world corruption and secrecy that has enabled massive fraud within governments, banks, corporations, and even non-profits and universities, this timely book is a manifesto for liberation—not just open technology, but open everything.*

*War and Anti-war Sep 22 2021 Citing the millions of lives that have been lost during Cold War conflict, a study predicts where and how future wars will be fought and present a paradigm for peace through technology, communication, and human innovation. Reprint.*

*The Road to Freedom and the Demise of Nation States Jul 21 2021 This book describes why the politically democratic state is a mythical and illegitimate concept that does not and cannot work and why, without the corrective market feedback of profits and losses, this unstable, unmanageable, inefficient and authoritative social organization will cause its own demise. The Road to Freedom and the Demise of Nation States maps out an alternative path leading to a new contractual social organization based upon individual sovereignty and freedom. Under this natural government of decentralized economic democracy, individuals vote with their money ballot for the products and services they want, including protection and jurisprudence. The Road to Freedom constitutes an evolutionary continuation of the principles of individual sovereignty and freedom underlying the American Revolution, as expressed in the Declaration of Independence, leading to worldwide peace and prosperity.*

*Creating Wealth Jun 19 2021 The power of local currencies Communities everywhere are challenged by issues such as health, elder and child care, housing, education, food security and the environment. On the surface, these problems appear to be rooted in economic crisis—forexample budget cuts have triggered reduced public services, soaring food prices have created food security concerns, and the subprime mortgage disaster has spawned record increases in foreclosures and homelessness. However if communities could match their unmet needs with their underutilized resources, many would find that while their economies may be struggling when measured in traditional terms, they possess enough genuine wealth to allow all their inhabitants to enjoy a vastly improved quality of life. Creating Wealth demonstrates how a healthy society can be attained through developing new systems of exchange. Using creative initiatives such as time banks, systems of barter and exchange and local currencies, cities and towns can empower themselves and build vibrant, healthy, sustainable local economies. In addition to presenting many compelling case studies of successful alternative currencies in action, Creating Wealth also explores the different types of capital that communities have to draw on, including natural, built, social, human, institutional, cultural, technological, and financial. This book will appeal to community activists, city planners and other public officials, and anyone interested in developing strong local economies. Gwendolyn Hallsmith is the founder and director of Global Community Initiatives and the author of The Key to Sustainable Cities . Bernard Lietaer is the world's leading authority on complementary currencies and the author of The Future of Money .*
