New Principles of War Apr 27 2022 Influenced in part by the writings of Sun Tzu, Carl von Clausewitz, Henri Jomini, and other strategists, most major militaries have adopted principles of war

that are widely promulgated. Marvin Pokrant argues that these commonly accepted principles fail to reflect the ideas that led to them. Looking at the fundamental and enduring concepts behind the original principles of war, Pokrant presents nine new principles of war. To illustrate his points Pokrant uses numerous examples drawn from military history, including land, sea, and air warfare from ancient times to the present. By analyzing and reforming the principles of war, Pokrant provides a modern, relevant, and useful way to guide decisions made in times of war.

The Special Data Dissemination Standard Jun 05 2020 The Special Data Dissemination Standard (SDDS) was established by the IMF in 1996 to guide members that already had, or that might seek, access to international capital markets in providing key economic and financial data to the public. In the following year, the IMF established the General Data Dissemination Standard (GDDS), which seeks to prepare countries for meeting the requirements of the SDDS. Data supplied by countries subscribing to the SDDS, as well as information provided by countries participating in the GDDS, are posted on the Dissemination Standards Bulletin Board (DSBB) on the IMF's public website (<http://dsbb.imf.org>). This Guide is intended to assist subscribers of the SDDS, GDDS participants moving toward subscription to the SDDS, and users of the DSBB in becoming aware of the features and scope of the SDDS and the DSBB. It is intended to further the IMF's initiatives in data transparency and standards, to enhance the public availability of timely and comprehensive international statistics, and therefore to contribute to countries pursuit of sound macroeconomic policies and to the improved functioning of global financial markets.

Risk and Resilience in U.S. Military Families Mar 15 2021 War related separations challenge military families in many ways. The worry and uncertainty associated with absent family members exacerbates the challenges of personal, social, and economic resources on the home front. U.S.

military operations in Iraq and Afghanistan have sent a million service personnel from the U.S. alone into conflict areas leaving millions of spouses, children and others in stressful circumstances. This is not a new situation for military families, but it has taken a toll of magnified proportions in recent times. In addition, medical advances have prolonged the life of those who might have died of injuries. As a result, more families are caring for those who have experienced amputation, traumatic brain injury, and profound psychological wounds. The Department of Defence has launched unprecedented efforts to support service members and families before, during, and after deployment in all locations of the country as well as in remote locations. Stress in U.S. Military Families brings together an interdisciplinary group of experts from the military to the medical to examine the issues of this critical problem. Its goal is to review the factors that contribute to stress in military families and to point toward strategies and policies that can help. Covering the major topics of parenting, marital functioning, and the stress of medical care, and including a special chapter on single service members, it serves as a comprehensive guide for those who will intervene in these problems and for those undertaking their research.

Manual of Pediatric Intensive Care Oct 02 2022 Complete with Free CD-rom!!! This new manual is a practical, bedside guide to care of patients in the Paediatric ICU. Paediatric patients are very different than adults, and knowing this difference is never more critical than in the ICU. The fundamentals come first: sepsis, managing fluids and electrolytes, maintaining the airway and assessment of cardiovascular performance. After this, problems are organised by system: neurology, endocrine disorders, and the acute abdomen are a few of the topics covered. Trauma has a separate section, covering injuries to major body systems and injuries caused by burns, accidents, frostbite, lightning strikes and other events. Following this, the manual has three outstanding features: a section on procedures, such as chest tube insertion and subdural taps; a pharmacopoeia, detailing the critical dosing numbers needed for safe, effective therapy; and a section with algorithms, including decision trees from the American Heart Association. In all, few manuals pack as much information, for such an attractive price, as this one.

Why are the G-20 Data Gaps Initiative and the SDDS Plus Relevant for Financial Stability Analysis?

May 05 2020 In the wake of the recent global crisis the international community is giving an increased focus on stability of the financial system, so-called financial stability analysis. With the increasing need for data sets to undertake this analysis, the question naturally arises as to what types of data are needed? While various data initiatives are underway, two initiatives at the forefront are: (1) the IMF/FSB G-20 Data Gaps Initiative (DGI) created by the international statistical community and endorsed by the G-20 Finance Ministers and Central Bank Governors as well as the IMF's International Monetary and Financial Committee, and (2) the new Special Data Dissemination Standard Plus (SDDS Plus), aimed particularly at economies with systemically important financial

sectors. This paper explains the relevance of the DGI for financial stability analysis and the close link with the SDDS Plus. The importance of the SDDS Plus in promoting the dissemination to the public of a core set of data for financial stability analysis is emphasized.

EBOOK: Radical Consumption: Shopping for Change in Contemporary Culture Aug 27 2019 Ethical consumption, fair trade, consumer protests, brand backlashes, green goods, boycotts and downshifting: these are all now familiar consumer activities - and in some cases, are almost mainstream. They are part of the expanding field of 'radical consumption' in a world where we are encouraged to shop for change. But just how radical are these forms of consumption? This book offers an interdisciplinary approach to examining contemporary radical consumption, analyzing its possibilities and problems, moralities, methods of mediation and its connections to wider cultural formations of production and politics. Jo Littler argues that we require a more expansive vocabulary and to open up new approaches of enquiry in order to understand the area's many contradictions, strengths and weaknesses. Drawing on a number of contemporary theories, terms and debates in media and cultural studies, she uses a range of specific case studies to bring theory to life. By analysing practices of radical consumption, the book explores a number of key questions: Is ethical consumption merely a sop for the middle classes? What are the contradictions of green consumption? Should we understand corporate social responsibility as a form of consumer-oriented greenwash? Who benefits from the new forms of cosmopolitan caring consumption? Can such forms of consumption ever move beyond their niche market status to become an effective political force? Can we really buy our way to a better, more equitable or sustainable future? *Radical Consumption* is important reading for cultural, media and sociology students.

Handbook of Psychosocial Interventions for Veterans and Service Members Oct 29 2019 The United States is in the midst of the largest military demobilization in its history. This is leading to an increase in the demand for mental health clinicians who can provide services to hundreds of thousands of military veterans and members of the military. Nearly two million Americans have been deployed to the wars in the Middle East, and thousands of them have been deeply affected, either psychologically, physically, or both. Projections suggest that 300,000 are returning with symptoms of PTSD or major Depression; 320,000 have been exposed to probable Traumatic Brain Injuries; and hundreds of thousands are dealing with psychological effects of physical injuries. Other veterans and members of the military without injuries will seek treatment to help them with the psychological impact of serving in the military, being deployed, or transitioning and reintegrating back into the civilian world. As an example, hundreds of thousands of service members are also leaving the armed

forces earlier than they anticipated and will need to quickly adjust to life as civilians after assuming that they would have many more years in the military. Many will be leaving the military because of demobilizations and downsizing due to budget cuts. Current proposed cuts will shrink the military force to the same size it was in 1940. The Pew Center reports that 44% of veterans from the current wars are describing their readjustment to civilian life as difficult, and many of them are and will be turning to civilian mental health and primary care clinicians for assistance. The Handbook of Psychosocial Interventions for Veterans and Service Members is a one stop handbook for non-military clinicians working with service members, veterans, and their families. It brings together experts from the Department of Defense, the Department of Veterans Affairs, veteran service organizations, and academia to create the first comprehensive guidebook for civilian clinicians. In addition to covering psychiatric disorders such as depression, anxiety, and PTSD, this book also offers information about psychosocial topics that impact military personnel and their loved ones and can become part of treatment (e.g., employment or education options, financial matters, and parenting concerns), providing the most recent and cutting-edge research on the topics. Chapters are concise and practical, delivering the key information necessary to orient clinicians to the special needs of veterans and their families. The Handbook of Psychosocial Interventions for Veterans and Service Members is an essential resource for private practice mental health clinicians and primary care physicians, as well as a useful adjunct for VA and DOD psychologists and staff.
