Sydney Dec 10 2020 Renowned and much-loved travel writer Jan Morris turns her eye to Sydney: 'not the best of the cities the British Empire created ... but the most hyperbolic, the youngest at heart, the shiniest.' Sydney takes us on the city's journey from penal colony to world-class metropolis, as lively and charming as the city it describes. With characteristic exuberance and sparkling prose, Jan Morris guides us through the history, people and geography of a fascinating and colourful city. Jan Morris's collection of travel writing and reportage spans over five decades and includes such titles as Venice, Hong Kong, Spain, Manhattan '45, A Writer's World and the Pax Britannica Trilogy. Hav, her novel, was shortlisted for the Booker Prize and the Arthur C. Clarke Award. 'Sydney should be flattered. A great portrait painter has chosen it for her recent subject . . . Few writers - a handful of novelists apart - have got so far under the city's skin as Morris . . . Few Sydneysiders could match her knowledge of their city's history and its anecdotes' The Times 'The writing is, at times, like surfing: sentences rise like vast waves above which she rides, never overbalancing into gush . . . Jan Morris convincingly explains modern Sydney through its history' Observer

Heaven's Command Oct 08 2020 Jan Morris tells the epic story of the rise of the British Empire, from the accession of Queen Victoria in 1837 to her Diamond Jubilee in 1897. In this celebrated masterwork she vividly evokes every aspect of the 'great adventure', ranging from ships and botanical gardens to hill stations and sugar plantations, as she traces the impact of empire on places as diverse as Sierra Leone and Fiji, Zululand and the Canadian prairies. The Pax Britannica Trilogy also includes Pax Britannica: The Climax of an Empire and Farewell the Trumpets: An Imperial Retreat. Together, these three works of history trace the dramatic rise and fall of the British Empire, from the accession of Queen Victoria in 1837 to the death of Winston Churchill in 1965. Jan Morris is also world-renowned for her collection of travel writing and reportage, spanning over five decades and including such titles as Venice, Coronation Everest, Hong Kong, Spain, A Writer's World and most recently, Contact! 'How many professional historians can write books that give so much pleasure? This is a book planned by an architect, fitted together by a craftsman, and polished by a cabinet-maker.' Sunday Times

Farewell the Trumpets Sep 18 2021 Farewell the Trumpets: An Imperial Retreat traces the momentous decline and fall of the greatest of empires - from Queen Victoria's Diamond Jubilee to the death of Winston Churchill in 1965. With characteristic balance, this masterpiece of narrative history describes the long retreat and final dissolution of the British Empire. The Pax Britannica Trilogy includes Heaven's Command: An Imperial Progress and Pax Britannica: The Climax of an Empire. Together these three works of history trace the dramatic rise and fall of the British Empire, from the accession of Queen Victoria in 1837 to the death of Winston Churchill in 1965. Jan Morris is also world-renowned for her collection of travel writing and reportage, spanning over five decades and including such titles as Venice, Coronation Everest, Hong Kong, Spain, A Writer's World and most recently, Contact! 'The British Empire is fortunate in having found in Morris a chronicler and memorialist who can do it justice. . . Morris writes with inspired gusto, firmly rooted in erudition, which carries the book into the realms of literature.' Sunday Telegraph 'One of our finest writers on Empire - alive to its glory, yet with a beady eye for the corruptions and failures which were at its heart, along with the dreams.' Observer

Wisdom, Science, and the Scriptures Dec 22 2021 This collection of essays is offered in admiration of and in gratitude for the work of Ernest Charles Lucas. The title of the volume acknowledges Ernest's particular areas of interest and expertise. The word wisdom comes first for two reasons: firstly because the Bible's Wisdom literature is a particular love about which Ernest has published a number of books, and secondly because wisdom is a characteristic of the man. Several of the contributions to this volume pick up the theme of biblical wisdom, while others touch on the practical application of a wisdom shaped by the Scriptures to vital contemporary issues. The second word of the title, science, reflects both Ernest's first career as a research bio-chemist and his interest as a theologian in exploring the relationship between science and faith. This area of interest is reflected in a number of the contributions to this collection, including Ernest's passionate interest in and concern about climate change. The final words of the title are and the Scriptures. Ernest has, at one time or another, taught every part of the Bible and retained a keen interest in the discipline of Biblical Studies. Once again, this is reflected in some of the contributions. There are other aspects to Ernest Lucas and among them is a love of sport, especially cricket. And so the collection ends with a reflection on this wonderful pastime.

Ignaz Maybaum Nov 08 2020 Ignaz Maybaum (1897-1976) is widely recognized as one of the foremost Jewish theologians of the post-Holocaust era.

Although he is mentioned in most treatments of post-Holocaust Jewish theology, his works are out of print and are only accessible to a small readership.

Nicholas de Lange (who worked closely with Maybaum in his lifetime), has made a representative selection from his writings, under various headings:

Judaism in the Modern Age, Trialogue between Jew, Christian, and Muslim, the Holocaust, and Zion. In an Introduction, he sets Maybaum's thoughts against the background of their time, indicates their main lines, and assesses how much of them is still of value today.

The Genetics of Cancer Jan 23 2022 It has been recognized for almost 200 years that certain families seem to inherit cancer. It is only in the past decade, however, that molecular genetics and epidemiology have combined to define the role of inheritance in cancer more clearly, and to identify some of the genes involved. The causative genes can be tracked through cancer-prone families via genetic linkage and positional cloning. Several of the genes discovered have subsequently been proved to play critical roles in normal growth and development. There are also implications for the families themselves in terms of genetic testing with its attendant dilemmas, if it is not clear that useful action will result. The chapters in *The Genetics of Cancer* illustrate what has already been achieved and take a critical look at the future directions of this research and its potential clinical applications.

The Devil's Alphabet Mar 13 2021 From Daryl Gregory, whose *Pandemonium* was one of the most exciting debut novels in memory, comes an astonishing work of soaring imaginative power that breaks new ground in contemporary fantasy. Switchcreek was a normal town in eastern Tennessee until a mysterious disease killed a third of its residents and mutated most of the rest into monstrous oddities. Then, as quickly and inexplicably as it had struck, the disease—dubbed *Transcription Divergence Syndrome (TDS)*—vanished, leaving behind a population divided into three new branches of humanity: giant gray-skinned argos, hairless seal-like betas, and grotesquely obese charlies. Paxton Abel Martin was fourteen when TDS struck, killing his mother, transforming his preacher father into a charlie, and changing one of his best friends, Jo Lynn, into a beta. But Pax was one of the few who didn't change. He remained as normal as ever. At least on the outside. Having fled shortly after the pandemic, Pax now returns to Switchcreek fifteen years later, following the suicide of Jo Lynn. What he finds is a town seething with secrets, among which murder may well be numbered. But there are even darker—and far weirder—mysteries hiding below the surface that will threaten not only Pax's future but the future of the whole human race.

The Routledge Handbook of Consumer Behaviour in Hospitality and Tourism Oct 27 2019 Consumer behaviour is one of the most explored topics in tourism and hospitality marketing, interchangeably denoted by the terms 'traveller behaviour', 'tourist behaviour' or 'guest behaviour'. Consumer behaviour acts as an origin for every tourism and hospitality marketing activity. It offers an understanding of why people tend to choose certain products or services and what sort

of factors influence them in making their decision. The decision process of buying tourism products or services takes time, because they are mostly intangible in nature due to which there are many risks involved in their buying process. The Routledge Handbook of Consumer Behaviour in Hospitality and Tourism aims to explore and critically examine current debates, critical reflections of contemporary ideas, controversies and pertinent queries relating to the rapidly expanding discipline of consumer behaviour in hospitality and tourism. The Handbook offers a platform for dialogue across disciplinary and national boundaries and areas of study through its diverse coverage. It is divided into six parts: Part I offers an overview of consumer behaviour; Part II focuses on the service quality perspectives of consumer behaviour; Part III deliberates on customer satisfaction and consumer behaviour linkages; Part IV explores the patronage behaviour of consumers; Part V addresses the vital issues concerning online consumer behaviour; and Part VI elaborates upon other emerging paradigms of consumer behaviour. Although there is no dearth of empirical studies on different viewpoints of consumer behaviour, there is a scarcity of literature providing conceptual information. The present Handbook is organised to offer a comprehensive theoretical body of knowledge narrating consumer behaviour, especially for hospitality and tourism businesses and operations. It attempts to fill this research gap by offering a 'globalised' volume comprising chapters organised using both practical and academic approaches. This Handbook is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, International Business and Consumer Behaviour.

Thinking Again: A Diary Apr 01 2020 Jan Morris, one of "Britain's greatest living writers" (Times, UK), returns with this whimsical yet deeply affecting volume on life as a redoubtable nonagenarian. The irrepressible Jan Morris—author of such classics as Venice and Trieste—is at it again: offering a vibrant set of reminiscences that remind us "what a good, wise and witty companion Jan Morris has been for so many readers for so long" (Alexander McCall Smith, New York Times Book Review). "Like Michel de Montaigne" (Danny Heitman, Wall Street Journal), Morris waxes on the ironies of modern life in all their resonant glories and inevitable stupidities—from her daily exercise (a "statutory thousand paces of brisk walk") to the troubles of Brexit; her enduring yet complicated love for America; and honest reflections on the vagaries and ailments of aging. Both intimate and luminously wise, Thinking Again is a testament to the virtues of embracing life, creativity, and, above all, kindness.

Venice Mar 01 2020 Often hailed as one of the best travel books ever written, Venice is neither a guide nor a history book, but a beautifully written immersion in Venetian life and character, set against the background of the city's past. Analysing the particular temperament of Venetians, as well as its waterways, its architecture, its bridges, its tourists, its curiosities, its smells, sounds, lights and colours, there is scarcely a corner of Venice that Jan Morris has not investigated and brought vividly to life. Jan Morris first visited the city of Venice as young James Morris, during World War II. As she writes in the introduction, 'it is Venice seen through a particular pair of eyes at a particular moment - young eyes at that, responsive above all to the stimuli of youth.' Venice is an impassioned work on this magnificent but often maddening city. Jan Morris's collection of travel writing and reportage spans over five decades and includes such titles as Sydney, Coronation Everest, Hong Kong, Spain and Manhattan '45. Since its first publication, Venice has appeared in many editions, won the W.H. Heinemann award and become an international bestseller. 'The best book about Venice ever written' Sunday Times 'No sensible visitor should visit the place without it . . . Venice stands alone as the essential introduction, and as a work of literature in its own right.' Observer

Animal Models in Eye Research Aug 06 2020 The eye is a complex sensory organ, which enables visual perception of the world. Thus the eye has several tissues that do different tasks. One of the most basic aspects of eye function is the sensitivity of cells to light and its transduction through the optic nerve to the brain. Different organisms use different ways to achieve these tasks. In this sense, eye function becomes a very important evolutionary aspect as well. This book presents the different animal models that are commonly used for eye research and their uniqueness in evaluating different aspects of eye development, evolution, physiology and disease. * Presents information on the major animal models used in eye research including invertebrates and vertebrates * Provides researchers with information needed to choose between model organisms * Includes an introductory chapter on the different types of eyes, stressing possible common molecular machinery

Raising Stony Mayhall Jan 11 2021 From award-winning author Daryl Gregory, whom Library Journal called "[a] bright new voice of the twenty-first century," comes a new breed of zombie novel—a surprisingly funny, vividly frightening, and ultimately deeply moving story of self-discovery and family love.

In 1968, after the first zombie outbreak, Wanda Mayhall and her three young daughters discover the body of a teenage mother during a snowstorm. Wrapped in the woman's arms is a baby, stone-cold, not breathing, and without a pulse. But then his eyes open and look up at Wanda—and he begins to move. The family hides the child—whom they name Stony—rather than turn him over to authorities that would destroy him. Against all scientific reason, the undead boy begins to grow. For years his adoptive mother and sisters manage to keep his existence a secret—until one terrifying night when Stony is forced to run and he learns that he is not the only living dead boy left in the world.

The Palgrave Handbook of Peacebuilding in Africa Jul 17 2021 This handbook offers a critical assessment of the African agenda for conflict prevention, peacemaking, peacekeeping, and peacebuilding; the challenges and opportunities facing Africa's regional organisations in their efforts towards building sustainable peace on the continent; and the role of external actors, including the United Nations, Britain, France, and South Asian troop-contributing countries. In so doing, it revisits the late Ali Mazrui's concept of Pax Africana, calling on Africans to take responsibility for peace and security on their own continent. The creation of the African Union, in 2002, was an important step towards realising this ambition, and has led to the development of a new continental architecture for more robust conflict management. But, as the volume's authors show, the quest for Pax Africana faces challenges. Combining thematic analyses and case studies, this book will be of interest to both scholars and policymakers working on peace, security, and governance issues in Africa.
