*Lessons of the Lost* Nov 04 2022 The wilderness can be unforgiving and dangerous, yet fill our souls with awe and wonder. It can overwhelm us with beauty and stun us with fear, lift our spirits to the highest highs and send us crashing to the floor of creation. The wilderness is a classroom where we learn to survive, thrive and sometimes die. At some point in our lives, we have all been lost in a wilderness of some kind whether literal or metaphorical without any direction on how to find our way back home. Some have faced survival decisions in community disasters or personal trauma. Some have been lost in work, wandered in careers and professions. Some have been lost in relationships, crippling addictions, health challenges, or grief. Scott Hammond, a volunteer search and rescuer, knows that people who have been lost in the wilderness, in the workplace, or in life can teach us how to go beyond survival and thrive, regardless of the nature of our personal wildernesses. Through his experience rescuing others and real-life stories, Hammond provides valuable lessons designed to help those who are lost. These narratives communicate that small things matter, that no one is ever lost alone, and that movement creates opportunity. Being lost is not a geographic problem, but a mental and spiritual problem. Lost people may be deprived of the basics of food, water, and shelter, but they are first deprived of meaning. Restoring that meaning is the first step toward hope, and hope is the beacon that leads you home.

[A Surgeon's Lessons, Learned and Lost](#) Aug 01 2022 John Raffensperger, MD, describes how doctors in the mid-20th century learned medicine in the autopsy room, the laboratory, and at bedside, training to become well-rounded general physicians. Since then, many doctors have specialized during medical school, depending on X-rays and blood tests, rather than listening and "laying on of hands." Medicine became a de-personalized business, subject to greedy insurance executives and hospital administrators. "A compelling and candid account of how surgeons learn and refine their skills. John Raffensperger shares successes and failures, advances in medicine and surgery, the faults in today's system, what we might learn from health care systems in other countries, and the pitfalls of hospital politics." - Di Saggau, *Island Sun* newspaper,

Santiva/Captiva Florida “A candid narrative of more than forty years in practice and teaching of a pioneering pediatric surgeon, infused with historical perspective of medical education and medical practice ... Dr. Raffensperger has done it all over those years, developing new procedures, teaching medical students and residents at the bedside, serving as surgeon-in-chief at a leading center for pediatric surgery, the Children’s Memorial Hospital in Chicago, and authoring books ... His concern for patients’ welfare shines through the book as he calls for fundamental reforms based on a single payer national health insurance.” – John Geyman, MD, Professor Emeritus of Family Medicine, University of Washington, Seattle “In the field of contemporary health care, it is generally acknowledged that Dr. John Raffensperger is one of the most eminent pediatric surgeons of our day... We are now lucky to see him produce a memoir ... the portrayal of a life devoted to the care of sick children.” – F. Gonzalez-Crussi, MD, Emeritus Professor of Pathology, Northwestern University, Chicago

Award-winning author Bob Welch takes readers deeper into the nuances of this classic by Charles Dickens. **Christ's Object Lessons—Illustrated** Mar 28 2022 Heritage Edition—Over 100 illustrations of a century ago. Unabridged, original text consisting of inspiring and profound lessons from the stories and parables which Jesus told. Christ the Great Teacher gave much of His instruction as He walked with His disciples through the hills and valleys of Palestine or rested by the lake or river. In His parable teaching He linked divine truth with common things and incidents, as may be found in the experiences of the shepherd, the builder, the tiller of the soil, the traveler, and the homemaker. Familiar objects were associated with thoughts true and beautiful—thoughts of God’s loving interest in us, of the grateful homage that is His due, and of the care we should have one for another. Thus lessons of divine wisdom and practical truth were made forcible and impressive. The Scripture says, “All these things spake Jesus unto the multitude in parables; . . . that it might be fulfilled which was spoken by the prophet, saying, I will open My mouth in parables; I will utter things which have been kept secret from the foundation of the world.” Matt. 13:34, 35. Natural things were the medium for the spiritual; the things of nature and the life-experience of His hearers were connected with the truths of the written word. Leading thus from the natural to the spiritual kingdom, Christ’s parables are links in the chain of truth that unites man with God, and earth with heaven. In this volume the parables are grouped according to their subjects, and their lessons are developed and illustrated. The book is full of gems of truth, and to many readers it will give a richer meaning to the common surroundings of everyday life.

**Building the Resilient Community** Sep 21 2021 How do some communities around the world that suffer outrageous violence and trauma manage, with few outside resources, not only to survive, but to thrive? September 11, the devastation of hurricane Katrina, school shootings, and other events of community violence and trauma have taught us, as a nation and a church, about the fundamental importance of building a caring community that fosters resilience and hope. Building the Resilient Community takes a refreshing turn of perspective by giving priority not only to the formally educated voices of the West but to those among the most marginalized and invisible in the world: refugees. Based on ethnographic research in Kakuma Refugee Camp and remote villages of southern Sudan, Holton presents a communal case study of a group of devoutly Christian refugees known as the Lost Boys of Sudan and asks the question, Might they have something to teach us about being a resilient community? As Holton investigates their deeply embedded cultural and religious beliefs that nurture a profound sense of responsibility toward others, we find a communal relationship that reflects a unique sense of care and obligation. This deep frame for communal care breaks through as the root of a remarkable faith narrative that serves to help mitigate symptoms of trauma and to undergird resilience, and may do the same for us.

Japanese Lessons Jun 06 2020 Gail R. Benjamin reaches beyond predictable images of authoritarian Japanese educators and automaton schoolchildren to show the advantages and disadvantages of a system remarkably different from the American one... --The New York Times Book Review Americans regard the Japanese educational system and the lives of Japanese children with a mixture of awe and indignance. We respect a system that produces higher literacy rates and superior math skills, but we reject the excesses of a system that leaves children with little free time and few outlets for creativity and self-expression. In Japanese Lessons, Gail R. Benjamin recounts her experiences as a American parent with two children in a Japanese elementary school. An anthropologist, Benjamin successfully weds the roles of observer and parent, illuminating the strengths of the Japanese system and suggesting ways in which Americans might learn from it. With an anthropologist's keen eye, Benjamin takes us through a full year in a Japanese public elementary school, bringing us into the classroom with its comforting structure, lively participation, varied teaching styles, and non-authoritarian teachers. We follow the children on class trips and Sports Days and through the rigors of summer vacation homework. We share the experiences of her young son and daughter as they react to Japanese schools, friends, and teachers. Through Benjamin we learn what it means to be a mother in Japan--how minute details, such as the way mothers prepare lunches for children, reflect cultural understandings of family and education.
