Developing as an Educational Leader and Manager Jun 26 2019 'This book is refreshing and distinctive. It takes the individual as the starting-point and builds outwards from there, to the vital but often neglected interpersonal dimension and the turbulent contexts of modern education. Vignettes help to make the theory concrete and activities bring the reader right into the frame.' - Ron Glatter, Emeritus Professor of Educational Administration and Management, The Open University and Hon. President of BELMAS Effective leadership combines organisational skills and personal qualities. Building on notions of leadership at all levels, this book contains an invaluable bank of creative ideas to help teachers already in management positions, as well as those just starting out, to reflect on their personal and leadership development. With a focus on organisational improvement and leading strategically within changing policy contexts, chapters interrogate key leadership issues such as managing people, values and context. Examples from the UK and internationally further demonstrate how to develop as a successful and sustainable leader. Content includes: · the influence of local and national contexts; · accountability; · working with stakeholders across boundaries and borders; · approaches to change; · becoming a strategic leader; · the educational leader as researcher. This is an essential resource for practising and aspiring educational leaders and managers and students on postgraduate or personal development courses, in the UK and internationally.

Turning Ideas into Research Sep 02 2022 How do you turn a really good idea into a really good question, and how do you turn this into successful research? Barbara Fawcett and Rosalie Pockett use their expertise as supervisors and researchers to provide you with the frameworks and the theoretical and practical guidance you need to design, carry out and communicate your research effectively. Using a range of examples that relate research to the real world, they demonstrate: how to develop research questions how to select appropriate theoretical frameworks how to integrate theoretical perspectives with empirical research how to gather and interpret data how to ensure that the research undertaken makes a difference. The authors' user-friendly approach emphasizes the importance of participation, collaboration and inclusivity, and examines worldviews and understandings of knowledge in order to enable greater critical reflection. Chapters provide guidance on achieving impact with your research, and feature reflective questions to enhance your engagement with the issues covered. This text is the ideal companion as you set about transforming your ideas into robust research.

Management Research Nov 11 2020 For many post-graduate students undertaking a research project for the first time is a daunting prospect. Gaining the knowledge and skills needed to do research typically has to be done alongside carrying out the project itself. Students often have to conduct their research independently, perhaps with limited tutor contact. What is needed in such situations is a resource that supports the new researcher on every step of the research journey, from defining the project to communicating its findings. Management Research: Applying the Principles provides just such a resource. Structured around the key stages of a research project, it is designed to provide answers to the questions faced by new researchers but without neglecting the underlying principles of good research. Each chapter

includes 'next steps' activities to help readers apply the content to their own live research project. The companion website provides extensive resources, including video tutorials, to support the development of practical research skills. The text reflects the richness and variety of current business and management research both in its presentation of methods and techniques and its choice of examples drawn from different subject disciplines, industries and organizations. Management Research: Applying the Principles combines diversity of coverage with a singularity of purpose: to help students complete their research project to a rigorous standard.

100 Activities for Teaching Research Methods Dec 13 2020 A sourcebook of exercises, games, scenarios and role plays, this practical, user-friendly guide provides a complete and valuable resource for research methods tutors, teachers and lecturers. Developed to complement and enhance existing course materials, the 100 ready-to-use activities encourage innovative and engaging classroom practice in seven areas: finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills. Each of the activities is divided into a section on tutor notes and student handouts. Tutor notes contain clear guidance about the purpose, level and type of activity, along with a range of discussion notes that signpost key issues and research insights. Important terms, related activities and further reading suggestions are also included. Not only does the A4 format make the student handouts easy to photocopy, they are also available to download and print directly from the book's companion website for easy distribution in class.

Psychoanalytic Work with Families and Couples May 06 2020 Psychoanalytic Work with Families and Couples rethinks the ways in which conflicts present today in psychoanalytic consulting rooms and the nature of suffering in family, couple, and sibling bonds. Based on two major concepts, that of device (drawn from the philosophers Foucault, Deleuze, and Agamben) and that of link (developed by Berenstein and Puget), the authors have developed new approaches to clinical practice with families and couples that focus on the complexity, singularity, and immanence of patient-analyst interaction in the session. In thinking about link dynamics, moreover, they go beyond the consulting room to reflect on how these dynamics develop in other spaces, such as institutions, organizations, and the fraternal circle of colleagues. Part I, Couples and Families Today, discusses changes undergone by families and couples in the last thirty years and their effects on psychoanalytic practice. Attributing a link logic to suffering and to the situations that condition it implies making significant decisions regarding our clinical strategy, our choice of a device and of an interpretive path. Faithful to the idea that the clinical dimension calls for transformations, the second part, Facing Clinical Challenges, includes clinical materials from manifold treatment devices that attest to changes both in contemporary paradigms and in the professional lives of psychoanalysts. Psychoanalytic Work with Families and Couples will be of great interest to all practicing psychoanalysts and psychoanalytic psychotherapists.

Introduction to Research - E-Book Jan 02 2020 Bridge the gap between research and practice with Introduction to Research: Understanding and Applying Multiple Strategies, 5th Edition. Developing Research Project Skills with Children Feb 01 2020 The title Developing Research Project Skills with Children, embraces the concepts development and with. Development with signals dialectical involvement among the researcher, policies and practices, and human and material resources. That is, we are changed by our engagement with people, objects, and practices inasmuch as such engagement changes human and material resources. Childhood curiosity, their delight in asking questions, and commitment to fairness are important qualities for a novice researcher. My experiences teaching young children led me to believe that they want opportunities to learn that honor their interests and provide a forum for their voices. In addition, students enjoy working freely within and across non-invasive structures. Psychological safety may be generated by structures such as circles. This handbook outlines an emancipatory approach to childhood research that ignites excitement among participants. Children want opportunities to learn on their own terms. They seek the freedom to pursue their interests from the perspectives of their lived experiences. An emancipatory approach to childhood project research locates control with the student. Within this context, the student defines the main research topic, constructs research questions, determines information gathering techniques, creates products that illuminate key ideas, demonstrates understanding of preliminary data-analysis procedures, and develops findings, reporting, and recommendations. Freedom of choice, independent and creative thinking skills, planning strategies, and diversification of product and process promises enhanced self-esteem and self-efficacy. Stage 1 of the planning process guides the child to enter a topic of interest in the center circle. Next, he/she enters four research questions, one in each remaining circle. Stage 2 of the planning process guides the child to record what they already know about the research questions. The four circles in Stage 2 are located on a separate page from Stage 1. Within this context, previously learned information regarding a concept enhances understanding of new knowledge. Students also enter the names of diverse information sources and products in the relevant circles. These additions will be used to communicate key aspects of the study from a multimodal perspective.

The SAGE Encyclopedia of Communication Research Methods Apr 28 2022 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.
