The Politics of Education Reform in the Middle East Oct 29 2019 Education systems and textbooks in selected countries of the Middle East are increasingly the subject of debate. This volume presents and analyzes the major trends as well as the scope and the limits of education reform initiatives undertaken in recent years. In curricula and teaching materials, representations of the "Self" and the "Other" offer insights into the contemporary dynamics of identity politics. By building on a network of scholars working in various countries in the Middle East itself, this book aims to contribute to the evolution of a field of comparative education studies in this region.
