[No More Masterpieces](#) May 31 2020 This groundbreaking account of postwar American art traces the profound influence of Antonin Artaud Proposing an original reassessment of art from the 1950s to the 1970s, *No More Masterpieces* reveals how artistic practice in postwar America was profoundly shaped by the work of the rebellious French poet and dramatist Antonin Artaud (1896-1948). A generation of artists mobilized Artaud's countercultural ideas to imagine new forms of representation and to redefine the relationship between artist and audience. The book shows how Artaud's radical writings inspired the experimental theatrical work of John Cage, Rachel Rosenthal, and Allan Kaprow; the attack on artistic and social conventions launched by assemblage artists Wallace Berman and Bruce Conner; and the feminist work of Carolee Schneemann and Nancy Spero. Lucy Bradnock traces the dissemination of Artaud's writings in America and demonstrates how his interest in political and cultural disorder, the dangers of authority, and the unreliability of representation found fertile ground in the context of the Cold War, disillusionment with the ideals of Abstract Expressionism, and the early years of identity politics.

[Change and Conflict in the U.S. Army Chaplain Corps Since 1945](#) Aug 22 2019 Army chaplains have long played an integral part in America's armed forces. In addition to conducting chapel activities on military installations and providing moral and spiritual support on the battlefield, they conduct memorial services for fallen soldiers, minister to survivors, offer counsel on everything from troubled marriages to military bureaucracy, and serve as families' points of contact for wounded or deceased soldiers—all while risking the dangers of combat alongside their troops. In this thoughtful study, Anne C. Loveland examines the role of the army chaplain since World War II, revealing how the corps has evolved in the wake of cultural and religious upheaval in American society and momentous changes in U.S. strategic relations, warfare, and weaponry. From 1945 to the present, Loveland shows, army chaplains faced several crises that reshaped their roles over time. She chronicles the chaplains' initiation of the Character Guidance program as a remedy for the soaring rate of venereal disease among soldiers in occupied Europe and Japan after World War II, as well as chaplains' response to the challenge of increasing secularism and religious pluralism during the "culture wars" of the Vietnam Era. "Religious accommodation," evangelism and proselytizing, public prayer, and "spiritual fitness" provoked heated controversy among chaplains as well as civilians in the ensuing decades. Then, early in the twenty-first century, chaplains themselves experienced two crisis situations: one the result of the Vietnam-era antichaplain critique, the other a consequence of increasing religious pluralism, secularization, and sectarianism within the Chaplain Corps, as well as in the army and the civilian religious community. By focusing on army chaplains' evolving, sometimes conflict-ridden relations with military leaders and soldiers on the one hand and the civilian religious community on the other, Loveland reveals how religious trends over the past six decades have impacted the corps and, in turn, helped shape American military culture.

[How to Write Social Sciences Research Paper: For Students and Professionals](#) May 23 2022 In a research project, the most critical part is writing the report in a way which presents not just our findings, but the process through which we arrived at these findings. It demands honesty about our research design and our perspectives, so that others can understand not just the research we have produced, but something about the way in which we have produced it. When carrying out research it is all too easy to become embroiled in our own research questions and objectives, so that when it comes to presenting our research we forget about situating it within the wider body of knowledge. For the lack of proper knowledge, many people find it difficult to writing up their paper. This book is intended to help you organize and write a quality research paper for Social Sciences. This book also gives you the idea about research design.

[Student's Guide to Writing College Papers, Fifth Edition](#) Jul 25 2022 Students of all levels need to know how to write a well-reasoned, coherent research paper—and for decades Kate L. Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. For its fifth edition, Chicago has reconceived and renewed this classic work for today's generation. Addressing the same range of topics as Turabian's *A Manual for Writers of Research Papers, Theses, and Dissertations* but for beginning writers and researchers, this guide introduces students to the art of formulating an effective argument, conducting high-quality research with limited resources, and writing an engaging class paper. This new edition includes fresh examples of research topics, clarified terminology, more illustrations, and new information about using online sources and citation software. It features updated citation guidelines for Chicago, MLA, and APA styles, aligning with the latest editions of these popular style

manuals. It emphasizes argument, research, and writing as extensions of activities that students already do in their everyday lives. It also includes a more expansive view of what the end product of research might be, showing that knowledge can be presented in more ways than on a printed page. Friendly and authoritative, the fifth edition of Student's Guide to Writing College Papers combines decades of expert advice with new revisions based on feedback from students and teachers. Time-tested and teacher-approved, this book will prepare students to be better critical thinkers and help them develop a sense of inquiry that will serve them well beyond the classroom.

*The Decision-Making Process of Investor-State Arbitration Tribunals* Jan 27 2020 In the course of a single investor-state dispute, an arbitrator may make numerous decisions, from interpreting the treaty or national laws to taking into account case law, customs and policies. In practice, this process raises important issues regarding the consistency of decisions and the predictability and legitimacy of the decision-making process in general. Investment arbitration tribunals have developed a specialised process of legal decision making adapted to the interpretational needs that arise in the context of an investor-state dispute and to the transnational characteristics of the investment arbitration framework. This is the first book to offer an in-depth analysis of the transnational characteristics of investment arbitration and to analyse the interpretive arguments of investment tribunals and the way they use treaties, precedent, policies, general principles of law and customary law in their decision-making process. Drawing on publicly available arbitral case law supplemented with personal interviews with investment arbitrators, the author touches on such concepts and practices as the following: - an overview of various decision-making genres of arbitral tribunals: attitudinal, economic, strategic and legal; - the legal argumentation triptych of language—rhetoric—dialogue; - the specific language arbitrators have developed when interpreting the law; - how arbitrators use the concepts 'standards', 'rules', 'principles' and 'rights'; - the importance of the legal reasoning of arbitral awards and the role of rhetoric therein; - concepts of 'acceptability', 'audience' and 'legitimacy'; - limitations of the public international law interpretive methodology enshrined in the Vienna Convention; - interpretation of precedents, customary law, general principles of law and policies; - the way national and international legal orders interact in the context of interpretation; and - how decision-making is connected to the issues of predictability, consistency and the rule of law. The core of the book proposes a novel, full-edged dialogical network theory for analysing the interpretation process. As an exemplary demonstration of developing theory to keep up with practice, this unique book provides a deeply engaged means for enhancing the practice of international arbitration. Its introduction of a new field of interdisciplinary analysis employing legal argumentation theories is sure to provide inestimable guidance for institutions and policymakers, especially in light of recent proposals for the creation of a permanent investment arbitration court. Given that unveiling the legal decision-making process is critical for the well-being of the whole dispute resolution procedure, and that being aware of how arbitrators interpret the law can constitute a roadmap for counsel's arguments and approaches when dealing with cross-border disputes, the topic of this book is relevant for both academics and practitioners, and its significance can only grow as recourse to investor-state arbitration continues to expand.

*Origines de la Recherche Scientifique Au Canada* Jul 01 2020 The teaching of engineering and a change in liberal arts curricula, both stimulated by industrial growth, encouraged the creation of specialized courses in the sciences. By the 1890s, Gingras argues, trained researchers had begun to appear in Canadian universities. The technological demands of the First World War and the founding, in 1916, of the National Research Council of Canada (NRC) accelerated the growth of scientific research. The Transactions of the Royal Society of Canada could no longer publish everything submitted to it because of the disproportionately large number of research papers from the fields of science. In response, the NRC created the Canadian Journal of Research, a journal specifically dedicated to the publication of scientific research. By 1930, a stable, national system of scientific research was in place in Canada. Following the dramatic increase in the national importance of their disciplines, scientists faced the problem of social identity. Gingras demonstrates that in the case of physics this took the form of a conflict between those who promoted a professional orientation, necessary to compete successfully with engineers in the labour market, and those, mainly in the universities, who were concerned with problems of the discipline such as publication, internal management, and awards. Physics and the Rise of Scientific Research in Canada is the first book to provide a general analysis of the origins of scientific research in Canadian universities. Gingras proposes a sociological model of the formation of scientific disciplines, distinguishing the profession from the discipline, two notions often confused by historians and sociologists of science.

*College Libraries and Student Culture* Dec 26 2019 How do college students really conduct research for classroom assignments? In 2008, five large Illinois universities were awarded a Library Services and Technology Act Grant to try to answer that question. The resulting ongoing study has already yielded some eye-opening results. The findings suggest changes ranging from simple adjustments in service and resources to modifying the physical layout of the library. In this book the editors, both anthropological researchers have been involved with the project since its beginning. This book: Summarizes the study's history, including its goals, parameters, and methodology; Offers a comprehensive discussion of the research findings, touching on issues such as website design, library instruction for faculty, and meeting the needs of commuter and minority students; Details a number of service reforms which have already been implemented at the participating institutions. This book deepens our

understanding of how academic libraries can better serve students' needs, and also serves as a model for other researchers interested in a user-centered approach to evaluating library services.
