Psychologie und Kritik Feb 24 2022 Die Autorinnen und Autoren gehen in einer interdisziplinären Perspektive dem Verhältnis von Psychologie und Kritik nach. Dabei stellen sie den historischen Transformationsprozess der Psychologisierung in den Vordergrund, der in der Nachkriegszeit einsetzte. Dieser Wandel umfasst nicht nur die Popularisierung psychologischen Wissens und die Verbreitung psychotherapeutischer Praktiken in der Alltagswelt. Vielmehr markiert die Psychologisierung auch eine Ausweitung der Disziplin „Psychologie“, die mit einer Wende hin zur Dominanz quantitativer Modelle sowie einer Marginalisierung theoriezentrierter Ansätze einhergeht. Schon in ihrer Formationszeit wurden beide Psychologisierungsprozesse von lautstarker Kritik begleitet.

Psychology of Driving Aug 09 2020 Do we become better or worse drivers as we age? Why do we indulge in risky behaviour when driving? Will technology remove the human role in driving forever? The Psychology of Driving is a fascinating introduction into the psychological factors at play when people get behind the wheel.

Exploring the role of personality traits and cognitive functions such as attention in driving, the book considers why human error is most often to blame in road accidents, and how we can improve driver safety. The book debunks the myth that men are better drivers than women and considers why some people indulge in knowingly risky behaviour on the road, including using mobile phones and drink/drug-driving. In a time when driverless cars are becoming a reality, The Psychology of Driving shows us how human behaviour and decisions can still affect our lives on the road.
