[How to Get Into Medical School in Australia Aug 09 2020](#) 'How to Get into Medical School in Australia' is the definitive guide on how to succeed in your application to medical school - and how to excel once there. The book provides comprehensive details of the

admissions processes - both undergraduate and graduate - in an easy-to-digest, chronological format, to help you manage your application step by step. This detailed handbook includes an overview of the admissions process and the career of a doctor, characteristics sought in potential medical students and how to optimise them, study techniques for high school and undergraduate students, information on how to prepare for the medical school entry exams (UMAT and GAMSAT), the pros and cons of undergraduate and postgraduate medical school, and timelines on when to begin preparing for each step of the application process. The guide also features advice on special applications (for mature age, indigenous, rural and international students), non-traditional routes of entry, how to optimise your medical school application form (including sample resumes), and the all-important medical school interview - including how to prepare, how to dress and how to answer questions successfully on the day, as well as several pages of practice interview questions. Once you have succeeded in gaining admission, the book also offers information on what medical school is like, and advice on how to excel and enjoy it (including a list of necessary textbooks). Additionally, the guide includes advice from people who have excelled in various parts of the process: those who aced their high school leaver's exams, medical students, and junior and senior doctors. They describe their experiences and, most importantly, provide tips and guidance on how to succeed in getting into and studying at medical school. Also included are the profiles of every medical school in Australia, detailing entry requirements, contact details, fees, numbers of places for students and the focus and academic ranking of each individual school.

The book provides the best concise, current, and comparative information for students interested in preparing for a career in veterinary medicine, as well as their advisors and counselors. It is the essential guide to becoming a DVM. As Executive Director of AAVMC Dr. Andrew McCabe writes, "These are exciting times for veterinary medicine, a profession that bridges animal, human, and ecosystem health. We understand that getting started and making sense of all the choices and requirements can be challenging, but you've come to the right place by accessing this publication, which provides the essential information you need to begin your journey."

Recent Trends in International Migration of Doctors, Nurses and Medical Students Sep 09 2020 This report describes recent trends in the international migration of doctors and nurses in OECD countries. Over the past decade, the number of doctors and nurses has increased in many OECD countries, and foreign-born and foreign-trained doctors and nurses have contributed to a significant extent. New in-depth analysis of the internationalisation of medical education shows that in some countries (e.g. Israel, Norway, Sweden and the United States) a large and growing number of foreign-trained doctors are people born in these countries who obtained their first medical degree abroad before coming back. The report includes four case studies on the internationalisation of medical education in Europe (France, Ireland, Poland and Romania) as well as a case study on the integration of foreign-trained doctors in Canada.

Research Prep. MCAT CARS May 06 2020 Prepare for the MCAT Critical Analysis & Reasoning Skills (CARS) section with Research Prep.'s question book. Our detailed questions and answer keys will provide you with everything you need to succeed on the MCAT CARS section. The MCAT CARS section comprises one section of the MCAT, and it covers three skill sets: Foundations of Comprehension, Reasoning Within the Text, and Reasoning Beyond the Text. The questions following each passage, within each skill set, will fall into sub-categories. These sub-categories represent the type of analysis that test takers will apply to answer each question. The questions will ask about passages that are each approximately 500 to 600 words long, and each passage will have a bank of 5 to 7 questions listed immediately thereafter. Generally, the MCAT CARS section will have 53 questions in total and 90 minutes of test time to complete the section. (The MCAT was slightly shortened and condensed during the COVID-19 pandemic, but the total time per CARS question remains the same.) Research Prep. and McKay Research will teach you how to tackle each question with a

straightforward approach: read the question stem to understand what is being asked; review the answer choices; and use the process of elimination to exclude any clearly incorrect possibilities. Research Prep. and McKay Research will help you to conquer many test questions. We will teach you how to best consult the passage to determine which of the answer choices is most fully supported by the text. The book will also show you how to choose the best answer to the question being asked and why it is the most fully supported by the text of the passage. The book teaches by asking questions and providing detailed answer keys so that you can increase your MCAT CARS score through practice!

Getting In Feb 12 2021 *Getting In: How Not To Apply to Medical School* is a tough, practical guide for people storming the ramparts of medical school admission boards. Paul Jung takes the pre-med or second-career aspirant from pre-application experiences through the application process with a very practical approach. The book is filled with the pitfalls and misconceptions applicants frequently make, rendering the subtitle particularly apt and (for those terrified of the unknowns) eminently appealing. The volume also includes self-diagnostic sections and common pitfalls to avoid when applying to medical school. Contrary to popular belief, applying to medical school doesn't have to be stressful and time-consuming. *Getting In* shows students caught in the web of medical school admissions boards how to apply to medical school the right way—setting themselves apart from the rest of the crowd. Jung takes pre-med and second-career aspirants through the entire ordeal and lets them know how important it is to apply as early as possible. From preparation and finding ways to obtain an application noticed by the admissions committee to information on the MCAT and getting through common interview traps, the book gives inside tips and helps applicants through what can be a stressful and uncertain time. The author allows readers a glimpse into common errors that others have made in their quests for acceptance, such as taking all required science courses in one semester or leaving large chunks of a medical application blank. Taking a down-to-earth, realistic approach, Jung acknowledges the pitfalls and misconceptions frequently made by applicants and even provides alternative solutions for discouraged students. The result is a well-written book that describes hardships and blunders but also gives good, practical information on how to succeed.

Medical Education: Theory and Practice E-Book Jan 02 2020 *Medical Education: Theory and Practice* is a new text linking the theory and the practice for graduate students and educators who want to go beyond the basics. The scholarship of medical education is, above all, a 'practice', but one that has a strong theoretical foundation. Neither theory nor practice stand still, and both are grounded in research. The novelty of this book lies in its interweaving of practice, theory, innovation and research. The book starts with a theorised, contemporary overview of the field. Next, it explores the theoretical foundations of medical education in depth. The remainder of the book reviews a whole range of educational contexts, processes and outcomes. This work has been edited by a distinguished, international team of medical educationalists and written by equally accomplished authors from across the globe.

Getting into Medical School Nov 11 2020 Getting into medical school is difficult, even for students with excellent college undergraduate records. Today, only about one-third of all students who apply to medical college are accepted—a statistic that emphasizes the vital importance of well-focused preparation on the part of medical school candidates. Getting into Medical School, now in its new twelfth edition, has gained a well-earned reputation as a time-proven source of sound advice and information on how medical school candidates can improve their chances for admission. Written by a medical doctor who is also an experienced student advisor, and updated to reflect today's medical school environment, this book emphasizes the importance of attaining a good score on the standardized MCAT (Medical College Admission Test). It also guides applicants through the arduous process of preparing the medical school application and advises them on how to make a good impression when invited for that all-important personal interview. The book concludes with a detailed medical school directory that lists up-to-date tuitions and fees, academic requirements, and application and enrollment information for more than 170 accredited medical and osteopathic colleges across the United States. Also included is a list of Web sites that provide helpful information to medical school candidates.
