Sport Coaching Research and Practice Mar 28 2022 Research shapes our understanding of practice in powerful and important ways, in sports coaching as in any other discipline. This innovative study explores the philosophical foundations of sport coaching research, examining the often implicit links between research process and practice, descriptions and prescriptions. Arguing that the assumptions of traditional single-disciplinary accounts, such as those based in psychology or sociology, risk over-simplifying our understanding of coaching, this book presents an alternative framework for sports coaching research based on critical realism. The result is an embedded, relational and emergent conception of coaching practice that opens

new ways of thinking about coaching knowledge. Drawing on new empirical case study research, it demonstrates vividly how a critical realist-informed approach can provide a more realistic and accountable knowledge to coaching stakeholders. This knowledge promises to have important implications for coaching, and coach education and development practices. *Sport Coaching Research and Practice: Ontology, Interdisciplinarity and Critical Realism* is fascinating reading for any student or researcher working in sports coaching, sport pedagogy, physical education, the philosophy or sociology of sport, or research methodology in sport and exercise.

Developing Resilience for Social Work Practice Jun 26 2019 The term 'resilience' refers to a person's capacity to handle difficulties, demands and pressure without experiencing negative effects. Traditionally, social work has focused on the nature and impact of resilience in children and adults who have experienced traumatic events, but it is increasingly recognised that social workers need to develop personal resilience to manage the emotional demands of the job effectively and sustainably. Developing Resilience for Social Work Practice provides social workers with a tool-box of strategies to help them enhance their resilience and protect their wellbeing. Written by experienced practitioners in the field, the book draws on key research to present a series of evidence-based interventions. These strategies are designed to help social work students and practitioners develop important qualities that underpin resilience, such as self-awareness, time management, relaxation skills and empathy as well enable them to gain support from their personal and professional networks. Grounded in both theory and practice, each chapter explores how the various resilience techniques can be applied to help social workers manage the complexities and challenges they face in everyday practice. The use of relevant and engaging case studies throughout is particularly useful in bringing the book to life for the reader.

Leadership, Coaching and Followership Aug 01 2022 This volume presents evidence-based ideas on all three converging forces to suit an array of individuals and their organisations. The volume is thick with evidence, detail and case studies that the reader can draw upon and apply to their own situations. ? Defining exactly what is leadership has been a persistent problem for researchers and theorists. Discovering how to create or produce leaders likewise has been a difficult challenge over the years. Written by

an academic, executive and coach, the author focuses on three important converging aspects: leadership, followership and coaching. Focus on leaders is disproportionate to what actually occurs within most organisations especially the relationship between the leader and the followers. That leadership is tantamount with being in control of a situation is challenged, together with the belief that leadership capability is primarily shaped in line with a set of success criteria. The coach plays a significant part in this process although rarely visible.

Responsive Literacy Coaching Oct 03 2022 In Responsive Literacy Coaching, Cheryl Dozier draws on twenty-four years of experience as an elementary classroom teacher and teacher educator to present both a theoretical framework and practical tools to enact responsive literacy coaching. Through thoughtful and purposeful coaching, teachers learn effective ways to improve literacy instruction and student achievement. The range of tools offered in the text invite customization based on the reader's specific instructional context. This framework empowers literacy coaches and teachers through

conversation, sustained engagement, and reflective analysis. Dozier argues that at its best, literacy coaching is responsive, collegial, thoughtful, thought-provoking, deliberate, reflective, and transferable. In this book she invites readers to enter into a coaching dialogue, through: vignettes that bring coaching interactions to life; prompts to engage both teachers and students; occasions for collaborative reflection; frequently-asked questions. As literacy tasks are documented and analyzed, coaching interactions logged and categorized, and assessment scores scrutinized, Dozier cautions coaches to avoid being so caught up in the doing of coaching that one forgets the purpose behind it. In this book she provides an occasion for them to step back, and ask, what is the goal of literacy coaching? What kind of literacy environments and experiences are we creating for our schools and our students? What is possible as we engage in transformative literacy practices? While the tools offered in this book do not provide a "quick fix," they foster critical thinking and sustained inquiry that leads to positive change for both teachers and students.
