[A Healthy Life on a Healthy Planet Dec 14 2020](#) The majority of people are under the impression that pollution affects mostly the environment. Thus, we are mainly concerned with climate change and the disappearance of wildlife. We are convinced that pollution doesn't affect us as humans. However, the incidence rate of cancer is higher today than in the 1970s and we are witnessing more and more people with neurological, cardiovascular, pulmonary, and developmental diseases. Why is this so? This book explains how our health is very dependent on the quality of our environment. We are surrounded by a large quantity of foreign chemicals which affect our health. Two of the major contributors to our health are the combustion of carbon fuels and pesticides. It explains, demystifies and summarizes in a simple and concise manner how these two sources of pollutants affect our body; which pesticides and sources of energy are the most harmful; the possible alternatives; the habits and misconceptions are preventing us from having a healthy environment; and how each of us can contribute in the improvement of our health and, by the same token, our

environment.

**Organic Housekeeping May 31 2022** Longing for a kinder, gentler world? As the old saying goes, everything begins at home, and odds are, if you live in the all-American household, the air inside is more toxic than the air outside, even if you live in the most polluted of cities. You regularly handle the filthiest object in your home -- the kitchen sponge -- and put the same chemicals on your face that are used in brake fluid and antifreeze. The cleaning agents and personal care products commonly marketed to and used in American homes contain not only some very dangerous, toxic chemicals, but they also create an "overly clean," chemically bombed-out house that compromises immune systems. And with more than fifty million Americans suffering from allergies and other autoimmune diseases -- not to mention the developing and fragile immune systems of children and seniors -- large numbers of people are actually being made sicker and sicker by their homes. Learn to live a clean, healthy, more economical way with Ellen Sandbeck, the nontoxic avenger. In this must-have book for the twenty-first-century home, this passionate, witty advocate of all things organic will teach you how to maintain every part of the home -- from living room to septic tank, kitchen floor to bathroom sink -- using safe, simple cleansers and quick preventative measures as well as the most effective organic products on the market to get the job done. Learn time-saving, preventative housekeeping, such as taking thirty seconds to clean the shower while you shower. Take care of bathroom stains with baking soda and vinegar rather than commercial, toxic bathroom "bombs" peddled to you with such force by manufacturers. Need whiter whites? There is no bleaching power on earth stronger than the sun. Snow clean your fine rugs. Choose fruits and vegetables from the relatively pesticide residue-free list. Clean felt-tipped pen stains with vodka. Make furniture shine with olive oil and lemon. Your house will also smell as great as it looks.
