The Hot Shoe Diaries Sep 15 2021 When it comes to photography, it's all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it...using small hot shoe flashes. In The Hot Shoe Diaries, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.

Natives and Exotics Apr 29 2020 Ambitious in its scope and scale, this environmental history of World War II ranges over rear bases and operational fronts from Bora Bora to New Guinea, providing a lucid analysis of resource exploitation, entangled wartime politics, and human perceptions of the vast Oceanic environment. Although the war's physical impact proved significant and oftentimes enduring, this study shows that the tropical environment offered its own challenges: Unfamiliar tides left landing craft stranded; unseen microbes carrying endemic diseases disabled thousands of troops. Weather, terrain, plants, animals—all played an active role as enemy or ally. At the heart of Natives and Exotics is the author's analysis of the changing visions and perceptions of the environment, not only among the millions of combatants, but also among the Islands' peoples and their colonial administrations in wartime and beyond. Judith Bennett reveals how prewar notions of a paradisiacal Pacific set up millions of Americans, Australians, New Zealanders, and Japanese for grave disappointment when they encountered the reality. She shows that objects usually considered distinct from environmental concerns (souvenirs, cemeteries, war memorials) warrant further examination as the emotional quintessence of events in a particular place. Among native people, wartime experiences and resource utilization induced a shift in environmental perceptions just as the postwar colonial agenda demanded increased diversification of the resource base. Bennett's ability to reappraise such human perceptions and productions with an environmental lens is one of the unique qualities of this study. Impeccably researched, Natives and Exotics is essential reading for those interested in environmental history, Pacific studies, and a different kind of war story that has surprising relevance for today's concerns with global warming.

Flash Techniques for Location Portraiture Oct 16 2021 Small-flash photography has become widely popular because of its portability and affordability, and this book offers insights on mastering the use of small-unit, hot shoe-mounted flashes called flashguns. Demonstrating the various light modifiers, techniques, and setups designed for these small powerhouses of light, the book explores how to achieve creative results from working with a single flashgun, multiple flashguns, and colored filters, as well as making adjustments with the camera's white-balance settings. The guide lists the tools required for location-portrait photography and discusses different lighting setups—from shooting in direct sunlight to night and low-light photos—for various location-portrait situations, giving photographers the confidence to make lighting decisions to produce professional results.
