[Deadly Dozen](#) Apr 14 2021 Wyatt Earp, Billy the Kid, Doc Holliday—such are the legendary names that spring to mind when we think of the western gunfighter. But in the American West of the late nineteenth and early twentieth centuries, thousands of grassroots gunfighters straddled both sides of the law without hesitation. *Deadly Dozen* tells the story of twelve infamous gunfighters, feared in their own times but almost forgotten today. Now, noted historian Robert K. DeArment has compiled the stories of these obscure men. DeArment, a life-long student of law and lawlessness in the West, has combed court records, frontier newspapers, and other references to craft twelve complete biographical portraits. The combined stories of *Deadly Dozen* offer an intensive look into the lives of imposing figures who in their own ways shaped the legendary Old West. More than a collective biography of dangerous gunfighters, *Deadly Dozen* also functions as a social history of the gunfighter culture of the post-Civil War frontier West. As Walter Noble Burns did for Billy the Kid in 1926 and Stuart N. Lake for Wyatt Earp in 1931, DeArment—himself a talented writer—brings these figures from the Old West to life. John Bull, Pat Desmond, Mart Duggan, Milt Yarberr, Dan Tucker, George Goodell, Bill Standifer, Charley Perry, Barney Riggs, Dan Bogan, Dave Kemp, and Jeff Kidder are the twelve dangerous men that Robert K. DeArment studies in *Deadly Dozen: Twelve Forgotten Gunfighters of the Old West*.

Fail-Safe Nov 21 2021 From the New York Times—bestselling authors, the “chilling and engrossing” nuclear-showdown thriller with “a multi-megaton wallop” (*Chicago Tribune*). Originally published during the Cuban Missile Crisis, this suspenseful novel takes off as a group of American bombers—armed with a deadly payload of nuclear weapons—heads towards Moscow, their motives mysterious. Suddenly, a nuclear apocalypse looms closer than it ever has, and the lives of millions depend on the high-stakes diplomacy of leaders on both sides of the divide. The

basis for a classic 1964 movie starring Henry Fonda, this two-million-copy bestseller is not only a terrifying thriller, but a fascinating social commentary on Cold War politics and a look at how, in a world poised on the brink, accidents and mistakes can have catastrophic consequences. Exploring the thin line between peace and global destruction that characterized this turbulent era, it is as timely as ever—"gripping, exciting, and almost unbearably fascinating" (Los Angeles Times). "Excruciatingly tense." —The Wall Street Journal

[How Star Wars Conquered the Universe](#) Aug 31 2022 In 1973, a young filmmaker named George Lucas scribbled some notes for a far-fetched space-fantasy epic. Some forty years and 37 billion later, Star Wars -- related products outnumber human beings, a growing stormtrooper army spans the globe, and "Jediism" has become a religion in its own right. Lucas's creation has grown into far more than a cinematic classic; it is, quite simply, one of the most lucrative, influential, and interactive franchises of all time. Yet incredibly, until now the complete history of Star Wars -- its influences and impact, the controversies it has spawned, its financial growth and long-term prospects -- has never been told. In *How Star Wars Conquered the Universe*, veteran journalist Chris Taylor traces the series from the difficult birth of the original film through its sequels, the franchise's death and rebirth, the prequels, and the preparations for a new trilogy. Providing portraits of the friends, writers, artists, producers, and marketers who labored behind the scenes to turn Lucas's idea into a legend, Taylor also jousts with modern-day Jedi, tinkers with droid builders, and gets inside Boba Fett's helmet, all to find out how Star Wars has attracted and inspired so many fans for so long. Since the first film's release in 1977, Taylor shows, Star Wars has conquered our culture with a sense of lightness and exuberance, while remaining serious enough to influence politics in far-flung countries and spread a spirituality that appeals to religious groups and atheists alike. Controversial digital upgrades and poorly received prequels have actually made the franchise stronger than ever. Now, with a savvy new set of bosses holding the reins and Episode VII on the horizon, it looks like Star Wars is just getting started. An energetic, fast-moving account of this creative and commercial phenomenon, *How Star Wars Conquered the Universe* explains how a young filmmaker's fragile dream beat out a surprising number of rivals to gain a diehard, multigenerational fan base -- and why it will be galvanizing our imaginations and minting money for generations to come.

William Maxwell Jun 04 2020 Best known as the longtime fiction editor at *The New Yorker*, William Maxwell worked closely with greats like Vladimir Nabokov, John Updike, Mary McCarthy, John Cheever, and many others. His own novels include *They Came Like Swallows* and *So Long, See You Tomorrow*, and have become so highly acclaimed that many now consider him to be one of the twentieth-century's most important writers. Barbara A. Burkhardt's *William Maxwell: A Literary Life* represents the first major critical study of Maxwell's life and work. Writing with an economy and elegance befitting her subject, Burkhardt addresses Maxwell's highly autobiographical fiction by skillfully interweaving his biography with her own critical interpretations. She begins each chapter with commentary on the biographical circumstances and literary influences that affected each of his compositions. By contextualizing his novels and short stories in terms of events including his mother's early death from influenza, his marriage, and the role of his psychoanalysis under the guidance of Theodore Reik, Burkhardt's subsequent literary analyses achieve an unprecedented depth. Drawing on a wide range of previously unavailable material, Burkhardt includes letters written to Maxwell by authors like Eudora Welty and Louise Bogan, excerpts from Maxwell's unpublished manuscripts and correspondence, and her own interviews with key figures from his life, including John Updike, Roger Angell, *New Yorker* fiction editor Robert Henderson, and Maxwell's family and friends. She also presents several lengthy sessions with Maxwell himself. A must for anyone already familiar with the understated charms of Maxwell's writing, this volume also represents a major addition to the growing collection of *New Yorker* lore, sure to fascinate anyone interested in the fiction, history, and personalities connected with the most influential weekly. Barbara A. Burkhardt is an assistant professor of English at the

University of Illinois at Springfield. A close acquaintance of Maxwell, she organized his correspondence for the Maxwell archives at the University of Illinois at Urbana-Champaign library, as well as writing the catalog for two exhibitions.

The Haunted Stars May 28 2022 It meant little to Robert Fairlie, a serious and dedicated young philologist, that the United States and Soviet Russia were at odds about the Moon. He had little interest in the first rocket landings or the bases that the two nations had established there. And he neither knew nor cared why the Americans would not agree to mutual inspections of these bases. Yet the Americans had reason enough: and quite unexpectedly, because of his specialised knowledge of languages, he found himself sharing the burden of an incredible secret. For what the American base had yielded was astounding evidence that space had already been conquered many centuries before by a people who had once spanned the stars. There had been machines and destructive weapons beyond the comprehension of present-day scientists which, if knowledge of them fell into the wrong hands, could plunge the world into unutterable chaos. Fairlie's trip to the closely-guarded rocket base in New Mexico turned out to be only the first step on a fantastic journey amid the unexplored stars to the home-world of the space-conquerors of long ago. It was a journey into the appalling reality of stellar space still haunted by the past cosmic struggle whose scale in space and time dwarfed the rivalries of tiny Earth's quarrelling nations.

Studies in Ethnopragnmatics, Cultural Semantics, and Intercultural Communication Jun 28 2022 This book is the second in a three-volume set that celebrates the career and achievements of Cliff Goddard, a pioneer of the Natural Semantic Metalanguage approach in linguistics. It focuses on meaning and culture, with sections on "Words as Carriers of Cultural Meaning" and "Understanding Discourse in Cultural Context". Often considered the most fully developed, comprehensive and practical approach to cross-linguistic and cross-cultural semantics, Natural Semantic Metalanguage is based on evidence that there is a small core of basic, universal meanings (semantic primes) that can be expressed in all languages. It has been used for linguistic and cultural analysis in such diverse fields as semantics, cross-cultural communication, language teaching, humour studies and applied linguistics, and has reached far beyond the boundaries of linguistics into ethnopsychology, anthropology, history, political science, the medical humanities and ethics.

Across The Sea of Stars Apr 26 2022 Far out across the sea of stars is an inverted universe where space is white and the stars are black. This universe is beyond an anomaly known as the Great Rift, which separates our universe from an infinity of abstract galaxies, planetary systems, and beings totally alien to anything known or imagined on our side of the universe. In this inverted universe is a hideous organism known as Yethla. It is confined to its own universe by the Great Rift until, one day, it finds a way to break through the barrier and enter our side of the universe. This is the story about the NSA2275 mining ship and its crew who leave the Jupiter Perimeter Space Dock in the year 2402 on an exploratory mission to locate a rare mineral in a far distant galaxy. What they find on a desolate planet has been buried for over a million years and will change their lives forever and open their eyes to what is far beyond the sea of stars.

[I Was Chaplain on the Franklin](#) Sep 27 2019 "Sudden death was everywhere. . ." On the morning of March 19, 1945, about fifty miles off the coast of Japan, the aircraft carrier USS Franklin was bombed by Japanese aircraft.

Two heavy bombs penetrated the hangar deck killing everyone inside. The planes on the flight deck were knocked into the air, their whirling propellers smashing gas tanks which spilled 17,000 gallons of gasoline. Fires raged from stem to stern on three decks. For four interminable hours, explosions rocked the Franklin. All communications, fire mains and power were gone. Into the thick of the choking smoke and fury came a hero with a white cross on his helmet. "Padre" to the Catholic, "Rabbi Joe" to the Jewish boys, Chaplain O'Callahan was "Father" to everyone on board. Father O'Callahan tells of his own experiences, recapturing the perilous and heroic drama of the Franklin. He leads you through blazing decks to observe gallant engineers and pharmacists, doctors and stewards man the battle stations. He recalls moments of his own inspired leadership. He describes a host of dramatic episodes on a stricken ship that refused to sink. When the Franklin finally limped into Pearl Harbor, it was the most damaged ship ever to reach port. Its casualty list was the highest in Navy history--432 dead and over 1,000 wounded. "Big Ben" was bombed, battered, bruised and bent, but like the spirit of the men on board, she was not broken. For his conspicuous gallantry above and beyond the call of duty, Father O'Callahan won the only Congressional Medal of Honor ever awarded a navy chaplain. His inspiring account of the Franklin's travail is more than a story of heroism, war, and men. It is a powerful and unforgettable story of faith.

Things Bogans Like Jan 24 2022 Now includes new material, MAXTREME UPDATED EPILOGUE. It is time to bring to the world's attention the modern Australian bogan. The word is still associated with flannelette, VB, utes and mullets. This is WRONG. The word bogan needs to be reassessed. Meet the nouveau-bogue. The modern bogan. Today's bogan defies income, class, race, creed, gender, religion and logic. For better or worse, Australia is contending with a different beast from the Paul Hogan bogan. This is a bogan with money. A bogan with aspirations. A bogan with Ed Hardy t-shirts. The new bogan will not rest until it owns a plasma TV so large that Two and a Half Men gets rounded up to three. Things Bogans Like is a landmark sociological publication and, far more importantly, essential reading for anyone who has ever bought a Buddhist-themed water feature, a four-litre energy drink or watched Today Tonight. This book is judge and jury of what it is to be a bogan in the twenty-first century. Brace your ego for some tough love. 'Most comics are worried about looking like snobs and so this rich vein has been largely untapped. These blokes dive in fearlessly and the result is the funniest thing in Australia right now.' [Erotic Reckonings](#) May 04 2020 Drawing on classical and feminist psychoanalytic theory, Thomas Simmons argues that mentor-apprentice relationships are inescapably erotic, though not necessarily sexual. Pound and Winters manifest profound conflicts between allegiance to a tradition of knowledge and allegiance to apprentices; both tend to master the apprentice, to bind her to a body of knowledge.

Youth, Class and Everyday Struggles Jul 18 2021 The concept of everyday struggles can enliven our understanding of the lives of young people and how social class is made and remade. This book invokes a Bourdieusian spirit to think about the ways young people are pushed and pulled by the normative demands directed at them from an early age, whilst they reflexively understand that allegedly available incentives for making the 'right' choices and working hard – financial and familial security, social status and job satisfaction – are a declining prospect. In Youth, Class and Everyday Struggles, the figures of those classed as 'hipsters' and 'bogans' are used to analyse how representation works to form a symbolic and moral economy that produces and polices fuzzy class boundaries. Further to this, the practices of young people around DIY cultures are analysed to illustrate struggles to create a satisfying and meaningful existence while negotiating between study, work and creative passions. By thinking through different modalities of struggles, which revolve around meaning making and identity, creativity and authenticity, Threadgold brings Bourdieu's sociological practice together with theories of affect, emotion, morals and values to broaden our understanding of how young people make choices, adapt, strategise, succeed, fail and make do. Youth, Class and Everyday Struggles will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, of fields including: Youth Studies, Class and Inequality, Work and Careers, Subcultures, Media and Creative Industries, Social Theory and Bourdieusian Theory.

Selecting the Mercury Seven Oct 21 2021 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism. This work provides biographical details of all thirty-two finalists for the seven coveted places as America's pioneering astronauts. All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities. Most had served as wartime fighter and bomber pilots; some were test pilots on top secret and sophisticated aviation projects, while others were fleet admirals, prisoners of war, and proposed pilots for spaceflight programs such as the Dyna-Soar (X-20). The names of all 32 finalists have been kept secret until very recently. "Selecting the Mercury Seven" also relates the history and difficulties behind the initial choice of candidates. The lives, motivations, military careers, and achievements of the unsuccessful twenty-five finalists are explored first in fully authorized biographies. Test pilots for the U.S. Navy, Air Force, and Marine Corps, each man has a fascinating and very different story to tell. All thirty-two men had to endure meticulous, demeaning, and brutal week-long medical examinations at the Lovelace Clinic in New Mexico. This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio, where they were subjected to extreme fitness and physiological testing, the sole purpose of which was to sort out the Supermen from the near-supermen. The final part of the book examines the accomplishments and spaceflights of the seven successful candidates, bringing their amazing stories right up to date.

Boganomics Jul 30 2022 The authorities on all things bogan and authors of THINGS BOGANS LIKE are back with an historical, sociological, geographic and cultural study that traces bogan culture back to society's very foundation. Identifying prototypical and stereotypical bogans through time, they examine the bogan of the 19th century and their pre-war descendants, before moving onto the specimen often considered the quintessential bogan, identified by a love of '80s metal, flannelette and Victoria Bitter. They then track the bogan's leap into the 21st century - where they can be seen across the country, clad in garish garb, holding their nationalism close to their chest, and slavishly following every celebrity trend. BOGANOMICS is an important book for all Australians as understanding is the bridge to unity. Read this book to broaden your knowlege ... or to laugh ... a lot.

Auraria Oct 09 2020 Water spirits, moon maidens, haunted pianos, headless revenants, and an invincible terrapin that lives under the mountains. None of these distract James Holtzclaw from his employer's mission: to turn the fading gold-rush town of Auraria, GA, into a first-class resort and drown its fortunes below a man-made lake. But when Auraria's peculiar people and problematic ghosts collide with his own rival ambitions, Holtzclaw must decide what he will save and what will be washed away. Taking its inspiration from a real Georgia ghost town, Auraria is steeped in the folklore of the Southern Appalachians, where the tensions of natural, supernatural and artificial are still alive.
