The Labyrinth Key Dec 24 2021 In a secret war waged in worlds both virtual and real, the fates of nations depend on the definitive weapon. And that weapon is knowledge—knowledge to die for. . . . The race is heating up between the U.S. and China to develop a quantum computer with infinite capabilities to crack any enemy’s codes, yet keep secure its own secrets. The government that achieves this goal will win a crucial prize. No other computer system will be safe from the reach of this master machine. Dr. Jaron Kwok was working for the U.S. government to build such a computer. But in a posh hotel in Hong Kong, a Chinese policewoman sifts through the bizarre, ashlike remains of what’s left of the doctor. With the clock ticking, alliances will be forged—and there are those who will stop at nothing to discover what the doctor knew. As the search for answers intensifies, it becomes chillingly clear that the quantum computer both sides so desperately want will be more powerful, more dangerous than anyone could have ever imagined. For in the twenty-first century, machines become gods, gods become machines, and the once-impossible now lies within reach. The key to unlimited knowledge will create the ultimate weapon of mass destruction—or humanity’s last chance to save itself. . . .

Specialty Competencies in Group Psychology Jun 25 2019

Human beings are born into groups, educated in groups, and belong to many groups, yet routinely attribute individual motives to their actions when in fact group-influenced behaviors are the more likely culprit. The theory, research, and practice of group dynamics, group psychology, and group psychotherapy illuminate useful ways for us to learn group skills and to better understand how we are influenced by groups. In *Specialty Competencies in Group Psychology* Sally Barlow provides a comprehensive overview of the foundational and functional competencies related to the field of group psychology. Barlow describes the potential treatment benefits of group work and shows how the wide range of applicability makes this a relevant volume across diverse areas, regardless of the population receiving treatment or the theoretic orientation of the therapist. This volume distills the uniqueness and contributions of the specialty in a way that benefits not only psychologists who specialize in group psychotherapy, but also clinicians who have previously taken a more traditionally individual approach to treatment. Series in Specialty Competencies in Professional Psychology Series Editors Arthur M. Nezu and Christine Maguth Nezu As the field of psychology continues to grow and new specialty areas emerge and achieve recognition, it has become increasingly important to define the standards of professional specialty practice. Developed and conceived in response to this need for practical guidelines, this series presents methods, strategies, and techniques for conducting day-to-day

practice in any given psychology specialty. The topical volumes address best practices across the functional and foundational competencies that characterize the various psychology specialties, including clinical psychology, cognitive and behavioral psychology, school psychology, geropsychology, forensic psychology, clinical neuropsychology, couples and family psychology, and more. Functional competencies include common practice activities like assessment and intervention, while foundational competencies represent core knowledge areas such as ethical and legal issues, cultural diversity, and professional identification. In addition to describing these competencies, each volume provides a definition, description, and development timeline of a particular specialty, including its essential and characteristic pattern of activities, as well as its distinctive and unique features. Written by recognized experts in their respective fields, volumes are comprehensive, up-to-date, and accessible. These volumes offer invaluable guidance to not only practicing mental health professionals, but those training for specialty practice as well.

As encryption becomes more widely adopted, organizations also must contend with an ever-growing set of encryption keys. Effective management of these keys is essential to ensure both the availability and security of the encrypted information. Centralized management of keys and certificates is necessary to perform the complex tasks that are related to key and certificate generation, renewal, and backup and recovery. The IBM® Enterprise Key Management Foundation (EKMF) is a flexible and highly secure key management system for the enterprise. It provides centralized key management on IBM zEnterprise® and distributed platforms for streamlined, efficient, and secure key and certificate management operations. This IBM Redbooks® publication introduces key concepts around a centralized key management infrastructure and depicts the proper planning, implementation, and management of such a system using the IBM Enterprise Key Management Foundation solution.
