Young Lord of Khadora Jul 26 2022 Ages ago the continent was invaded by massive armies intent on creating a new home for themselves. The peaceful indigenous peoples fled before the marauding hordes and hid defiantly in the mountain peaks awaiting a signal from god. They learned the arts of magic and warfare as they hid from the intruders, who divided the land amongst themselves and set up a civilization where the many toil and slave for the elite few. The Forgotten Legacy series begins with Young Lord of Khadora as Marak, a young soldier in the service of one of the clans of Khadora, is chosen as a sacrifice for the benefit of his lord. Marak is sent on a fool's mission to defeat one of the small bands of indigenous people known as the Chula, a race of dreaded cat-people. Volume 1 of Forgotten Legacy.

Theory and Design of Charged Particle Beams Aug 23 2019 This indispensable work offers a broad synoptic description of beams, applicable to a wide range of other devices, such as low-energy focusing and transport systems and high-power microwave sources. The monograph develops the material from the basic principles in a systematic way and discusses the underlying physics and validity of theoretical relationships, design formulas and scaling laws. Assumptions and approximations are clearly indicated throughout. This new, revised and updated edition has 10% additional content, and features, among others, a new chapter on beam physics research from 1993 to 2007, significant enhancement of chapter 6 on emittance variation, updated references and color image plates.

*The Chinese Particle Le* Apr 30 2020 Ever since the start of Chinese linguistic studies, the description of the Chinese particle LE has remained elusive. The classification has evolved from a listing of sentences and the discussion of contrastive pairs to a more context and discourse-oriented analysis. The development in recent years of inferential models and situation semantics has opened the way for a renewed study of the use of the Chinese particle LE. This book discusses the Chinese data from a 'mental space' perspective and finally reveals the role so-called Chinese 'sentence LE' plays in the construction and maintenance of discourse.
