[Contemporary World History](#) Nov 02 2022 A comprehensive and balanced history of the world in the twentieth century and into the new millennium, William Duiker's text not only chronicles the key events in the revolutionary twentieth century, but also examines the underlying issues that have shaped the times. CONTEMPORARY WORLD HISTORY, 5E, takes a global approach to the subject while doing justice to the distinctive character of individual civilizations and regions. Duiker integrates political, economic, social, and cultural history, creating a chronologically ordered synthesis that gives students the true flavor of the most decisive moments in recent world history. In addition, Duiker's own photographs and selection of primary source documents, which illustrate much of the book, are especially effective in illustrating key points in the narrative. A new feature, Film & History, presents a brief analysis of the plot as well as the historical significance, value, and accuracy of eight films, including such movies as Khartoum (1966), Gandhi (1982), The Last Emperor (1987), and The Lives of Others (2006). [World History Encyclopedia](#) Feb 22 2022 In order to broaden our perspective and gain the deeper understanding necessary to function effectively in today's global arena, we need to focus on "big picture" trends and phenomena—religion and philosophy, science and technology, political organization, art and culture, population changes, environmental interactions, human migrations—across many countries and regions, rather than dwelling on the dates and details of traditional country-based history. This is what study of world history in the 21st century requires—and what ABC-CLIO's World History Encyclopedia provides.

[Southeast Asia in World History](#) Apr 02 2020 This book sketches an outline of Southeast Asian history from earliest times to the present, showing how the diverse political, economic, social, and cultural patterns developed over several thousand years and the role played by the region in the larger world. It discusses the connections to India and China, the great kingdoms such as Angkor, the maritime trade, and the emergence of diverse cultural

traditions, including the Theravada Buddhist, Islamic, and Vietnamese realms. Another third covers the period of Western expansion and colonization between 1500 and 1941, when various Western nations began to gradually influence and then reshape the region and Southeast Asians became more deeply involved with world trade. This includes an extensive discussion of the impact of colonialism on Southeast Asian societies, cultures, economies and politics. The final third examines the rise of nationalism and independence movements, decolonization, the wars in Indochina, and the links between past, present, and future.

Disunion Mar 14 2021 Since the 1950s, the domestic politics of the Republic of Vietnam (RVN) has puzzled outside observers. To these external analysts, the American-backed regime seemed to be plagued by instability and factionalism for no apparent reason. Their bewilderment, however, has obscured a deep

and complex history. In *Disunion*, Nu-Anh Tran shows how factional struggles in the Saigon-based republic reflected serious disagreements about political ideas at a pivotal moment in the lead-up to the Vietnam War. The book traces the emergence of Vietnam's anticommunist nationalists back to the struggle for independence and explores how their alliances were tested and then broken during the rule of the RVN's first president, Ngô Đình Diệm. The anticommunists rejected the authoritarianism and ideology of the Vietnamese communists and dreamed of building an independent, democratic government that would unite the Vietnamese nation. The RVN was supposed to be the fulfillment of this long-cherished vision. But discord soon erupted among the anticommunists. Politicians fiercely debated to what extent the government should be democratic and which groups had a legitimate place in political life. The unresolved disagreements provoked intense and continuous infighting that troubled the RVN throughout the regime's existence. Ultimately, the animosity undermined any possibility of realizing the anticommunists' shared vision for the country. Based on previously neglected primary sources and extensive research in Vietnamese and American archives, *Disunion* paints a rich and sensitive portrayal of leaders and activists in the RVN. Anticommunist nationalists were deeply devoted to their homeland and inspired by forward-looking visions, but they were also hobbled by their failure to live up to their lofty ideals. By examining these historical figures on their own terms, the book offers a fresh perspective on the political history of South Vietnam that has remained misunderstood to this day.

The First Vietnam War Jan 30 2020 How did the conflict between Vietnamese nationalists and French colonial rulers erupt into a major Cold War struggle between communism and Western liberalism? To understand the course of the Vietnam wars, it is essential to explore the connections between events within Vietnam and global geopolitical currents in the decade after the Second World War. In this illuminating work, leading scholars examine various dimensions of the struggle between France and Vietnamese revolutionaries that began in 1945 and reached its climax at Dien Bien Phu. Several essays break new ground in the study of the Vietnamese revolution and the establishment of the political and military apparatus that successfully challenged both France and the United States. Other essays explore the roles of China, France, Great Britain, and the United States, all of which contributed to the transformation of the conflict from a colonial skirmish to a Cold War crisis. Taken together, the essays enable us to understand the origins of the later American war in Indochina by positioning Vietnam at the center of the grand clash between East and West and North and South in the middle years of the twentieth century.

After Mandela: The Struggle for Freedom in Post-Apartheid South Africa Nov 21 2021 The most important historical and journalistic portrait to date of a nation whose destiny will determine the fate of a continent. A brutally honest exposé, *After Mandela* provides a sobering portrait of a country caught between a democratic future and a political meltdown. Recent works have focused primarily on Nelson Mandela's transcendent story. But Douglas Foster, a leading South Africa authority with

early, unprecedented access to President Zuma and to the next generation in the Mandela family, traces the nation's entire post-apartheid arc, from its celebrated beginnings under "Madiba" to Thabo Mbeki's tumultuous rule to the ferocious battle between Mbeki and Jacob Zuma. Foster tells this story not only from the point of view of the emerging black elite but also, drawing on hundreds of rare interviews over a six-year period, from the perspectives of ordinary citizens, including an HIV-infected teenager living outside Johannesburg and a homeless orphan in Cape Town. This is the long-awaited, revisionist account of a country whose recent history has been not just neglected but largely ignored by the West. *World History* Dec 31 2019 Noted teachers and scholars William J. Duiker and Jackson J. Spielvogel present a balanced, highly readable overview of world history that explores common challenges and experiences of the human past and identifies key patterns over time. Masculinity in Vietnam War Narratives Feb 10 2021 Occurring alongside the Women's Rights, Gay Rights, Civil Rights, and other identity movements of the 1960s, the Vietnam War was part of an era that rescripted gender and other social identity roles for many, if not most, Americans. This book examines the ways in which the war and its accompanying movements greatly altered traditional American conceptions of masculinity, as reflected in discourses ranging from fictional narratives to memoirs, films, and military recruiting advertisements. Analysis of two canonical fiction texts—John Del Vecchio's *The 13th Valley* and Bobbie Ann Mason's *In Country*—illustrates the interrelatedness of race, sexuality, disability and masculinity, an approach appearing in no other book-length study. The text illustrates how, decades later, the masculine anxieties of the Vietnam era persist.

Regionalism Globalisation and International Order Europe and Southeast Asia May 04 2020 Offering a comparative historical perspective of European and Southeast Asian regionalism, this illuminating study presents new and imaginative insights into the theory and practice of regionalism and the links between regional developments, globalization and international order.

The Vietnam War Nov 09 2020 Hailed as a "pithy and compelling account of an intensely relevant topic" (Kirkus Reviews), this wide-ranging volume offers a superb account of a key moment in modern U.S. and world history. Drawing upon the latest research in archives in China, Russia, and Vietnam, Mark Lawrence creates an extraordinary, panoramic view of all sides of the war. His narrative begins well before American forces set foot in Vietnam, delving into French colonialism's contribution to the 1945 Vietnamese revolution, and revealing how the Cold War concerns of the 1950s led the United States to back the French. The heart of the book covers the "American war," ranging from the overthrow of Ngo Dinh Diem and the impact of the Tet Offensive to Nixon's expansion of the war into Cambodia and Laos, and the final peace agreement of 1973. Finally, Lawrence examines the aftermath of the war, from the momentous liberalization--"Doi Moi"--in Vietnam to the enduring legacy of this infamous war in American books, films, and political debate.

Hyper-Structured Molecules II Dec 11 2020 Hyper-structured molecules are topologically well-defined molecules in two or three dimensions and are expected to show novel quantum effects in the molecules themselves or in molecular sequences. This book, covering the supramolecular chemistry and characterisation of hyper-structured molecules, provides an invaluable resource on the design and synthesis of topologically controlled molecules such as dendritic polymers, and on ways to handle them using techniques such as photon scanning tunnelling microscopy. The book presents a comprehensive discussion of the real application of hyper-structured molecules to organic quantum devices for molecular electronics, photonics and spinics and should be of interest to all researchers working in supramolecular chemistry and molecular electronics.

Emerging Markets Aug 31 2022 The rapid growth and development of emerging economies offer both opportunities and threats for international businesses. Understanding the economic development of emerging markets, combined with a knowledge of the increasingly complex international business market, enables better exploitation of opportunities in increasingly competitive world markets. Vietnam Oct 09 2020 Recent U.S. military interventions in Kosovo and Iraq have stirred public memories of the long and costly Vietnam conflict. Scholars and strategists, military leaders and media continue to raise questions such as what motivated the Vietnamese to wage a protracted conflict first against the French and later against the Americans at such great economic and emotional cost. In this fourth edition, SarDesai provides new insights on the decision-making process in Hanoi and Washington D.C. during the Vietnam conflict. He analyzes the extensive historiographical dialog in the 1990's involving scholars, strategists and policy-makers of the two countries. He addresses the postwar era of Vietnam's reconstruction, administrative reorganization, the U.N. sponsored Cambodian settlement, as well as Vietnam's membership and growing role in the ASEAN. SarDesai also looks at the new economic and strategic relationship between Vietnam and its former

foe marked by President Clinton's visit to Hanoi and the increasing U.S. investment and trade in Vietnam in the aftermath of the Bilateral Trade Treaty (BTA) of July 2000. Concise, clear, and manageable coverage of Vietnamese history for one semester courses. Updated and expanded in the 4th edition to cover the most recent events and issues facing Vietnam, as well as providing greater depth of coverage to primary historical material.

Kim Il Sung in the Khrushchev Era Dec 23 2021 Concentrating on the years 1953-64, this history describes how North Korea became more despotic even as other Communist countries underwent de-Stalinization. The author's principal new source is the Hungarian diplomatic archives, which contain extensive reporting on Kim Il Sung and North Korea, thoroughly informed by research on the period in the Soviet and Eastern European archives and by recently published scholarship. Much of the story surrounds Kim Il Sung: his Korean nationalism and eagerness for Korean autarky; his efforts to balance the need for foreign aid and his hope for an independent foreign policy; and what seems to be his good sense of timing in doing in internal rivals without attracting Soviet retaliation. Through a series of comparisons not only with the USSR but also with Albania, Romania, Yugoslavia, China, and Vietnam, the author highlights unique features of North Korean communism during the period. Szalontai covers ongoing effects of Japanese colonization, the experiences of diverse Korean factions during World War II, and the weakness of the Communist Party in South Korea.

The Lucifer Principle Jun 24 2019 "A philosophical look at the history of our species which alternated between fascinating and frightening . . . like reading Dean Koontz or Stephen King." —Rocky Mountain News The Lucifer Principle is a revolutionary work that explores the intricate relationships among genetics, human behavior, and culture to put forth the thesis that "evil" is a by-product of nature's strategies for creation and that it is woven into our most basic biological fabric. In a sweeping narrative that moves lucidly among sophisticated scientific disciplines and covers the entire span of the earth's—as well as mankind's—history, Howard Bloom challenges some of our most popular scientific assumptions. Drawing on evidence from studies of the most primitive organisms to those on ants, apes, and humankind, the author makes a persuasive case that it is the group, or "superorganism," rather than the lone individual that really matters in the evolutionary struggle. But biology is not destiny, and human culture is not always the buffer to our most primitive instincts we would like to think it is. In these complex threads of thought lies the Lucifer Principle, and only through understanding its mandates will we be able to avoid the nuclear crusades that await us in the twenty-first century. "A revolutionary vision of the relationship between psychology and history, The Lucifer Principle will have a profound impact on our concepts of human nature. It is astonishing that a book of such importance could be such a pleasure to read."—Elizabeth F. Loftus, author of Memory
